We are happy to offer you now a total of six varieties. 2-Year-old, Field-Grown **J** HYBRID TEA I Field's Giant-deep rich For Only K. A. Victoria—pure white \$439
Golden Charm—bright PPD. ED. McFARLAND Each varieties.

Each variety is dramatically different in the color, markings and texture of the leaves. All have flowers of bright red excepting one, "Blue Flame," which has flowers of soft skyblue.

"Flame Vistati" Editor McFarland-clear CHOCOLATE SOLDIER I Poinsettia—brilliant red
These are five of the best and
most popular of all Hybrid Tea
Roses, in a good range of colors.
We send you two-year-old, fieldgrown plants that are guaranteed to bloom this year from
June until frost. This is a
money-saving bargain because
roses are scarce again this year. CHOCOLATE SOLDIER (Episcia Chocolate Soldier). Large leaves like Scarlet Flame Violet excepting their background color is reddish-checolate, and the veins are silvery green—they set off the scarlet flowers beautifully. No. 2N5—1.98 each; 3 for 5.40, ppd. Poinsettia-brilliant red No. A2252X "Flame Violets" are as easy to grow as African Violets. In fact, they are close cousins. They grow much alike, and require much the same care—plenty of light, but no direct sun, and a warm temperature. But Flame Violets will trail and, if you desire, you can train them over the pot, along the window sill, on a plastic trellis, or from a hanging basket.

* "Flame Violet" is a POINSETTIA WE VIOLET ket.

"Flame Violet" is a trademark name owned by Flame Violet, Inc., Shenandoah, Iowa. Thousand-Flowered (Episcia Coccinea). Many people think this is the "most beautiful house plant in the world." The flowers are a brilliant scarlet, contrasting vividly with what are probably the most gorgeous leaves of any house plant. They are broad, thick and plush-like, and of a deep bronzegreen color with veinings of bright emerald green. No. 2N7—1.98 each; 3 for 5.40, postpaid. **CUSHION MUMS** Figure 10 Figure 10 Figure 12 Figure Every Plant a Solid Mound of Color 2N55|X—1 e a c h of Scarlet, "Blue Flame," and Christmas Flame Violets—all 3 for only 5.00, ppd. Each plant blooms from late August until frost, making a solid mound of flowsolid mound of flowers 12 to 18 inches high and 2½ feet across—blossoms so thick they literally cover the foliage. Ideal for borders and foundation plantings, and you never miss a dozen stems of flowers cut daily for indoor bouquets. We ship you healthy, green, pot-grown, pre-fertilized plants. 1 each of pink, bronze, yellow, red, white and the new purple. The Bronze Medal awarded to "EARLY SURECROP" HYBRID CUCUMBER by the All-America Selections Committee.

HOW TO GROW CUCUMBERS

Cucumbers like
rich soil but do
fairly well most anywhere. Plant seed liberally because bugs

sometimes take some of the seedlings. Don't crowd cucumbers—give them plenty of room. Make the hills at least 4×6 feet and more if you have space. Plant when the ground is warm and figure about 36 hills to a packet of seed or 100 hills to the ounce. For late pickles, plant in June.

SPECIAL

OFFER

pkt. National Pickle pkt. Early Fortune pkt. "Giant Imp'd" Long Green

All 3 Postpaid 25C

CLIMBING

CUCUMBER 366-(58 days.) distinct climbing variety, used to cover trellises and fences.

Cucumbers are dark green, very uniform. Pkt. 15c; oz. 35c; 1/4 lb. 75c, postpaid.

Henry Field's Garden PEAS

INOCULATE ALL PEAS

Be sure to inoculate all peas, beans and sweet peas. NITRAGIN inoculation will help you get bigger yields and faster growth. Takes Just a minute to treat the seed—no trouble at all. A 15c packet is enough for 5 lbs. of seed. Full directions on proceed.

4015-NITRAGIN 15c per packet,

Henry Field peas are all northern grown and carefully selected for disease resistance, type and vigor.

Plant the smooth varieties just as soon as you can get into the ground. Wrinkled varieties a little later. For a fall crop, use early sorts, planting them about the middle of August. One pound of seed to a 50-foot row.

"Wrinkled" MARDELAH

SWEET ALASKA PEAS

155-(55 days). This wilt-resistant pea is best described by saying it is a "Wrinkled Alaska." It makes a vine growth like the Alaska, and is fully as hardy. The pods, which are 21/2 to 3 inches long, are chock full of tiny, sweet, tender peas. A good variety for canning and freezing. Triple size pkt. (3 oz.) 15c; 1/2 lb. 30c; 1 lb. 55c; 3 lbs. 1.35, postpaid.

For a continuous supply of peas—early, main crop and late. Fine varieties.

Arieties.

½ lb. Extra Early Alaska—WiltResistant.

½ lb. American Wonder—main orop.

1/2 lb. Alderman—the late one.

All 3 for only 69c, ppd.

ALDERMAN (Not Illustrated)

167-(75 days.) The big, prolific, late pea. A vigorous English variety which we class as late. Pods are large and the vines require support. Triple size pkt. (3 oz.) 15c; 1/2 lb. 30c; 1 lb. 50c, postpaid.

APREMIUM GEM-The Extra Early One

154-(58 days.) Probably the most popular of the early garden peas. Vines dwarf, about 15 in. in height. Blunt ended pods 2% in. long with 6 to 7 peas to the pod. Very productive, fine flavor, considered by many to be sweetest of early peas. Triple size pkt. (3 oz.) 15c; ½ lb. 30c; 1 lb. 50c; 3 lbs. 1.18, postpaid.

LITTLE MARVEL—Tender, Heavy Yielder

152—(62 days.) It will be a long time 'til we find a better one than this. For quality, yield, earliness, or any other point, it's hard to beat. A vigorous grower and a beauty yields yyields. heavy yielder. Vines grow about 18 in. high and are loaded with dark green, nearly round, square ended pods about 3 in. long. 7 or

8 large peas to the pod. 3 quarts of pods will often shell out a quart of peas. Tender and sweet, and of finest quality. One of the favorites because it's one of the best. Triple size pkt. (3 oz.) 15c; 1/2 lb. 35c; 1 lb. 60c; 3 lbs. 1.50,

BLACK EYED PEAS (Not Illustrated)

168—Genuine old-fashioned southern kind. Really more of a bean than a pea. Use green in the summer-time and dried for winter. Grows as easily as any other garden peas. Triple size pkt. (3 oz.) 15c; ½ lb. 35c; 1 lb. 55c; 3 lbs. 1.35, postpaid.

FREEZONIAN

150-(63 days.) An All-150—(63 days.) An All-America winner especially recommended for freezing, as skin does not loosen and peel. Peas large and tasty; quality excellent. Vines grow about 30 inches tall, producing dark green blunt pods about 3½ inches long. Resistant to fusarium wilt. Although especially fine Although especially fine for freezing, it is also

ideal for canning. An excellent variety for both home and market gardeners. Triple size pkt. (3 oz.) 15c; ½ lb. 35c; 1 lb. 58c; 3 lbs. 1.45, ppd.

The Drouth Resister

AMERICAN WONDER

149-(60 days.) Always comes into bearing ahead of the other wrinkled ones. The dwarf vines grow about 1 ft. tall and are covered with medium size pods. Peas are of good quality, tender and of fine flavor. Especially well liked because of its resistance to drouth. Triple size pkt. (3 oz.) 15c; 1/2 lb. 30c; 1 lb. 50c; 3 lbs. 1.20, postpaid.

-(62 days.) Vigorous dark green vines that grow 20 to 24 inches but do not need staking ter if staked). Pods are large. Filled with 7 to 9 great big sweet peas. Triple size pkt. (3 oz.) 15c; 1/2 lb. 35c; 1 lb. 50c; 3 lbs. for 1.20,

EXTRA EARLY ALASKA

Earliest Pea Known

146-(56 days.) One of our biggest sellers. An improved, wiltresistant strain of an old favor-ite. Very hardy and aheavy yielder. Sure to crop, easy to grow. Medium size, well filled pods. Peas are of excellent quality, and, as they ripen all at once, are easy to gather. If you

want a lot of good early peas, plant this one. Triple size pkt. (3 oz.) 15c; ½ lb. 30c; 1 lb. 50c; 3 lbs. 1.20,

EDIBLE PODDED PEAS

160-DWARF GRAY SUGAR. 160—DWARF GRAY SUGAK. (62 days.) Here is the pea that you can eat just like green beans—pods and all. Not only does this eliminate Not only does this eliminate the shelling, but you'll get more food value this way. And best of all, they are sweet and delicious. Easy to grow, too. Triple size pkt. (3 oz.) 15c; ½ lb. 30c; 1 lb. 50c, nostnaid.

LARGE PODDED MARVEL

The Little Glant Marvel

153—(65 days.) Like Little Marvel, but pods are larger. Sweet, tender and juicy. Has dwarf vine. Well filled pods always contain plenty of large peas. Triple size pkt. (3 oz.) 15c; ½ lb. 30c; 1 lb. 50c; 3 lbs. 1.25, postpaid.

GREEN BEANS

A pound will plant 2 rows, 50 ft. long. Cover beans about 2 inches. Space rows 20 to 30 inches apart in rich, warm soil. Make first planting when severe frost damage is past.

▲ TOPCROP— Outyields All Others!

112-(51 days.) The 1950 All-America Gold Medal green snapbean developed by the U.S.D.A. Outyields all others! Resistant to mosaic. Pods straight, smooth, 51/2 to 6 inches long. In addition, are completely stringless, fiberless and very meaty. Quality unexcelled. Very good flavor. Can't be beat for cooking and excellent for freezing, canning and market. Seeds are round, mottled brown. Triple size pkt. (3 oz.) 15c; ½ lb. 40c; 1 lb. 63c; 3 lbs. 1.59, ppd.

ALL AMERICA BEAN OFFER

Two Prize Winners

1/2 Lb. TOPCROP Green Bean
1950 All-America Winner
1/2 Lb. CHEROKEE Wax Bean
1948 All-America Winner

WADE BUSH BEAN-1952 Gold Medal Winner

117-(54 days.) This brand new bean, like Topcrop above, has the distinction of being one of the very few vegetables ever to win an All-America Gold Medal. We can't say enough for it! Pods deep green, 5½ to 6 in. long, round and slender. Pods kept off ground, as bush grows upright. Resistant to mosaic and pow-dery mildew. Tops in qual-ity and flavor. Because of its smoothness and uni-formity is ideal for canning and freezing. Also good market variety as is "slow wilting." Triple size pkt. (3 oz.) 25c; ½ lb. 50c; 1 lb. 75c; 3 lbs. 1.75, ppd.

TENDER GREEN

Entirely Stringless, Fiberless

Enfrely Stringless, Fiberless 106—(54 days.) An extremely meaty, fine quality, smooth green bean. Pods are plump, long and dark green in color. Completely free from fiber and strings. Plants are of strong, upright growth and bear an enormous crop of beans. One of the best green beans on the market today. A dandy for home

the total and for home cooking, canning and freezing. Triple size pkt. (3 oz.) 15c; ½ lb. 35c; 1 lb. 58c; 3 lbs. 1.48, postpaid.

BOUNTIFUL—Famous Canner

144—(50 days.) You folks here in the corn belt ought to grow more of this one. It's a very heavy yielder. We've never had a failure. Its big, green, showy pods, excellent quality and savory flavor make it an excellent variety for canning. Fine for market, too. Bountiful is the right name. Triple size pkt. (3 oz.) 15c; 1/2 lb. 38c; 1 lb. 58c; 3 lbs. 1.48, postpaid.

STRINGLESS GREEN POD

The Standard of All

107-(51 days.) The ideal family bean and the "measuring stick" to which all varieties are compared. An early dwarf green bean that is a heavy bearer of choice, plump pods. Very meaty, fine flavored and tender. No strings whatever. Besides other good qualities, will stand more drouth than most any other variety. Triple size pkt. (3 oz.) 15c; 1/2 lb. 35c; 1 lb. 59c; 3 lbs. 1.49, postpaid.

POLE

One of the nicest things about pole beans is that they can be grown along the garden fence, and this makes them especially valuable for city gardening. For those who have corn fields, just plant a few climbing beans along the edge of the field and the cornstalks will support the beans. You women folks who tend the garden should plant pole beans in the corn field and let the corn cultivator do the tending for you. Saves time and work.

Plant FILLBASKET pole beans by all means. This came from Missouri originally and we're very proud of it.

FILLBASKET POLE BEAN

If you want the biggest yield plant this one.

121—(66 days.) BLUE LAKES. Really fills your basket in a hurry. Yields enormous; strong grower, vigorous climber. Pods very dark green, brittle, long and slender. Beans, small, white, kidney-shaped. Delicious bean flavor, very meaty and of good quality. Especially flavor, very meaty and of good quality. Especially fine for home canning and freezing. Makes finest shelled beans in the world. Triple size pkt. (3 oz.) 15c; $\frac{1}{2}$ lb. 30c; 1 lb. 55c; 3 lbs. 1.35, postpaid.

INOCULATE ALL BEANS

Be sure to inoculate all beans, peas and sweet peas with NTTRAGIN for bigger yields and faster growth. Inoculation helps the plant take nitrogen from the air and fertilize your soil. Just dust Nitragin on the seed—no trouble at all. Never fails to increase the yield. Pays for itself many times over. A 15c packet enough for 5 bs. of seed. Full directions on packet. 4015—Nitragin, 15c per pkt., postpaid.

SIEVA CLIMBING LIMA

CLIMBING LIMA
109—(77 days.)
An early pole lima
—very similar to
Henderson's Bush.
Seeds white, flat,
smooth and delicious. Grows 6 to
10 ft tall. Withstands heat. Bears
until frost. Triple
size pkt. (3 oz.)
15c; ½ lb. 30c;
1 lb. 55c; 3 lbs.
1.38, ppd.

143—(90 days.) Special strain. Beans delicious, large, bright green, turn yellow when mature. Fix for table just like lima or dry just like lima or dry beans. Let pods stand in boiling water for few minutes for easy shelling. Excellent source of protein. Triple size pkt. (3 oz.) 15c; 1/2 lb. 30c; 1 lb. 50c; 3 lbs. 1.20, ppd.

YARD LONG or Asparagus Bean

129-(70 days.) Unusual novelty. A vigor-ous growing vine with pods sometimes 4 ft. long. Has an excellent asparagus - like flavor. Plant for the fun of it. Triple size pkt. (3 oz.) 15c, postpaid.

*

SCARLET RUNNER

138—(64 days.) Grow it for the beau-tiful scarlet flowers. Vines grow 15 feet or more. Makes nice decoration as well as fine oration as well as fine snap beans. Triple size pkt. (3 oz.) 15c; ½ lb. 35c; 1 lb. 65c; 3 lbs. 1.59, postpaid.

YELLOW BUSH BEANS

Seems like when most folks think of beans they think of green beans and forget the kind that, to our way of thinking, is best of all—the yellow bush beans.

If you have never planted or eaten yellow bush beans don't pass them up this year. They yield equally as much as the green ones, are as tender and just as stringless and, almost without exception, have a better, more pleasing flavor. This year, try several varieties. You will like them we know. They require the same care and culture as green

SURE CROP STRINGLESS

Heavy Searer 120-(51 days.)

Has handsome 6 to 61/2 in. golden yellow pods, slightly curved and about 1/2 in. wide. Pods are meaty, tender, brittle and sweet. Completely string-less. Plants are disease and drouth resist-

ant, vigorous, branching and never fail to bear big crop. An especially fine bean for canning, freezing or mar-ket. Triple size pkt. (3 oz.) 15c; ½ lb. 38c; 1 lb. 65c; 3 lbs. 1.59, ppd. 15c:

BEANS OF CLIMBING BEANS

KENTUCKY WONDER POLE BEAN **Heavy Yielder**

Heavy Yielder

134—(65 days.) Many claim this is finest of all pole beans. Without a doubt the most popular and dependable. Early and highly productive. Pods are 7 to 9 in. long, round, wrinkled, crease backed, brittle, meaty and of an extra fine flavor. Seeds are brown. Triple size pkt. (3 oz.) 15c; ½ lb. 35c; 1 lb. 55c; 3 lbs. 1.35, postpaid

PURPLE POD POLE BEAN

Delicious Flavor

122—(65 days.) A new bean. Grows like Kentucky Wonder, but is larger and better flavored, The seed stock came from some of Henry's neighbors in Missouri. Climbs well: yields abundantly. Meat is thick, of excellent quality and stringless. Pods are beautiful reddish purple but purple but turn light green when cooked. Delicious in flavor. A great favorite in southern Missouri, Triple size pkt. (3 oz.) 25c: 1/2 lb. 50c, postpaid.

CORNHILL BEAN-Climbs Corn or Vines Alone

130—(74 days.) CUTSHORT. Tender cornfield bean. Good climber. Gives good crop of short, fat, fine tasting pods. Triple size pkt. (3 oz.) 15c; ½ lb. 30c; 1 lb. 50c; 3 lbs. 1.20, postpaid.

KENTUCKY WONDER WAX

The Yellow Pole Bean

139—(67 days.) Most popular of all wax pole beans. Beautiful yellow pod. Vigorous grower. Pods large, oval-shaped; seed chocolate brown. Bears until frost. None better for canning—good for green shell beans, too. Triple size pkt. (3 oz.) 15c; ½ lb. 45c; 1 lb. 60c; 3 lbs. 1.50, postpaid.

IMPROVED | MISSOURI WONDER

Biggest of All

Biggest of All 133—(66 days.) We got this in Missouri and it is a dandy. Plant with Stouell's Evergreen sweet corn. Fods come on early; are crease backed and well filled. They are huge in size, light green in color, and are of a fine, "real bean" flavor. Makes fine snap bean. Triple size pkt. (3 oz.) 156; ½ b. 35c; 1 ib. 55c; 3 lbs. 1.35, postpaid.

MONEY SAVING BEAN OFFER

3 Bush Beans

3 oz. Stringless Green Pod 39c. Tendergreen 3 oz. Golden "No Wilt" POSTPAID

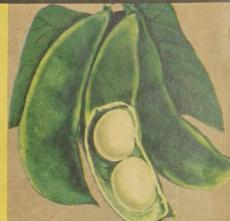

All 3 for

Rust-Proof GOLDEN WAX

Pverybody likes this one. It is early and has a heavy flat pod. The vines grow erect, holding beans well off the ground. Never has strings. Heavy yielder and hardy. Good quality. Triple size pkt. (3 oz.) 15c; ½ b. 40c; 1 lb. 65c; 3 lbs. 1.59, postpaid.

LIMA BEANS We have the two kinds of limas—pole and bush—listed together below. Both are good and everybody ought to plant some of each. Years ago only people in the middle or southern states could grow limas, but we have d'veloped new early types which do well away up in Canada. Don't plant limas until after frost danger is past. Plant bush limas 6 to 8 in. apart in rich soil. Here in our trial grounds we often plant pole limas in hills about 4 ft. apart. Then tie four poles together at the top and make sort of a tepee. They do well this way. Regardless of which kind you plant, though, we know you will like them.

GREEN SEEDED BABY LIMA

Grow Both Pole and Bush Limas

We have the two kinds of limas-pole

114—(67 days.) An improvement over old-fashioned baby limas. Beans are bright green during shelling stage. Fine for canning, good for dry beans, too. An excellent beans, too. An excellent grower, stands hot dry weather. Tremendous yielder of good flavored beans. Triple size pkt. (3 oz.) 15c; ½ lb. 35c; 1 lb. 60c; 3 lbs. 1.50, postpaid.

HENDERSON'S BUSH BABY LIMA

127—(67 days.) Best lima yielder. Small white lima yielder. Small white bean. Great for shell bean, canning or winter drying. Stands dry weather. Dependable. Triple size pkt. (3 oz.) 15c; ½ lb. 35c; 1 lb. 55c; 3 lbs. 1.35, postpaid.

DWARF BABY POTATO LIMA

115—(72 days.) An All-America Silver Medal winner. Seeds small, thick, bright green, good flavored. Prolific yielder. Fine for canning or freezing. Triple size pkt. (3 oz.) 15c; ½ lb. 35c; 1 lb. 60c; 3 lbs. 1.25, ppd.

PEANUTS

Yes, you folks in the Midwest can grow peanuts just as well as not. Plant just like beans, in soft, loose soil, after it gets thoroughly warm in the spring. Thin to a foot apart in the row and keep well hoed.

JUMBO PEANUTS

218—Great big kind, enormously productive. Plant them the same time you plant beans. Not as early as the Early Northern, but as the Early Northern, but you are reasonably sure of a crop with this variety in most sections. Do best on light sandy soil. Dig in the fall before frost, and hang them under a shed or in any airy room to care, 1/4 lb. 15c; 1/2 lb. 28c; 1 lb. 50c; 3 lbs. 1.35, postpaid.

219—The early peanut for the Midwest. Will ripen anywhere in the corn belt. Nuts are snall and of fine flavor. Contains a high percentage of oil. Pods usually contain two kernels with lots of them on the

EARLY NORTHERN

with fors of them on the vine. Adhere well to the plant when digging. Raise some for hog feeding as well as plenty for the liddles to roast during the winter. ½ lb. 15c; ½ lb. 28c; 1 lb. 50c; 3 lbs. 1.35, postpaid. Peppers do well on any soil except that which is too low and too wet. Give them plenty of room. Start in the house or in the hot bed and from then on handle just as you would tomatoes. One cance will make 1,500 plants. We offer both sweet and hot varieties. See Page 8 for Plants.

WORLD BEATER-The Thick-Fleshed One

641—(75 days.). Early, heavy, sure yielder. As good, if not better, than any of them. One of our heaviest sellers. Flesh thick, mild and sweet. Stands shipping well. Pkt. 15c; ½ oz. 37c; oz. 63c, postpaid.

CALIFORNIA WONDER Mild and Sweet

648—Large, thick meated, unusually solid. Fruit four-lobed and very uniform. Color bright crimson. Fruit up to 4 inches in size. Beautiful in salad. Pkt. 10c; ½ oz. 25c, postpaid.

KING OF THE NORTH Earliest Large Sweet

640—Especially valuable in northern states. Fruits enormous, color brilliant red, size usually 6 in. long and 3 or 4 in. in diameter. Thick flesh, sweet and mild. Pkt. 15c; ½ oz. 38c; oz. 65c. postpaid.

PIMENTO

LONG RED CAYENNE

HYBRID SWEET CORN

What, When, and How to Plant

Hybrid sweet corn is a great improvement over old open pollinated corn. Our hybrids have uniform maturity, extremely high yields, and disease resistance. Plant almost as soon as you can get them into ground in spring. ½ lb. seed is enough for 100 hills. Use 10 to 12 lbs. per acre. Plant every 10 days 'til middle of July for corn

Our Sweet Corn Now Specially Treated

All of our sweet corn seed is treated with a special seed treatment. This special treatment protects seed; stimulates growth of feeder roots; assures better, faster germination; and gives bigger yields. You get all this at the extractions of the second seed of the second s faster germination; and gives bigger yields. You get all this at no extra cost!

HYBRID SWEET CORN MIX

Have Corn All Season for Only 15c!

173—A blend of our best HYBRID Sweet Corns. Gives you delicious corn coming on each week—ALL SEASON. No need to make several plantings. Earliest corn 60 days. Latest 115 days. 3 oz. pkt. 15c; ½ ib. 35c; 1 ib. 59c; 3 lbs., 1.49, postpaid.

Best OPEN POLLINATED SWEET CORN

COUNTRY GENTLEMAN

189—(93 days.) Long slender grains with ears right size for eating on the cob. Very tender, white and sweet. Heavy producer. Fine for canning. Triple size pkt. (3 oz.) 15c; ½'b. 32c; 1 lb. 56c; 3 lbs. 1.38, postpaid.

STOWELL'S EVERGREEN

188-(96 days.) Giant white orn. For canning and drying and roasting ears. Always has more corn to the cob than any other variety. Triple size pkt. (3 oz.) 15c; ½ lb. 32c; 1 lb. 56c; 3 lbs. 1:38, postpaid.

GOLDEN BANTAM

177—(80 days.) Recognized as the standard yellow. Grows 4½ to 5 ft. tall, very productive, early, sweet, tender. A favorite. Triple size pkt. (3 oz.) 15c; ½ lb. 35c; 1 lb. 50c; 3 lbs. 1.20, postpaid.

TRUCKER'S FAVORITE

187—(85 days.) Southern Sweet Corn. A good white garden corn, though actually not a sweet corn. Grows anywhere. Ears large —7 to 9 in, long. 12 to 16 rows of kernels. Triple size pkt. (3 oz.) 15c; ½ lb. 25c; 1 lb. 40c; 3 lbs. 90c, postpaid.

* EARLY SUNSHINE

174—(76 days.) Full week earlier than Golden Bantam, with larger ear. Has 10 to 12 rows of creamy, yellow kernels. Large for an early sort. Triple size pkt. (3 oz.) 15c; ½ lb. 30c; 1 lb. 50c; 3 lbs. 1.20. postpaid.

* New HOOSIER GOLD

172—(80 days.) A new introduction by U.S.D.A. and Indiana Ag. Experiment Station. Matures just ahead of Golden Cross. Big 8 to 9-inch ears with 12 rows of medium deep, bright golden yellow kernels. Five to six-foot stalks bear two big ears. Has wonderful eating qualities as corn is of unusually fine flavor. Triple size pkt. (3 oz.) 20c; ½ lb. 40c; 1 lb. 75c; 2 lbs. 1.25, postpaid.

IOCHIEF An All-America

185—(87 days.) A Gold Medal Winner. Has large, deep, golden yellow kernels that are sweet and tender. Ears 16 rowed, are as large as Golden Cross Bantam, but mature 2 days later and remain edible longer. Plants tall and sturdy. An excellent variety for freezing and canning. Triple size pkt. (3 oz.) 20c; ½ lb. 45c; 1 lb. 68c; 3 lbs. 1.65, postpaid.

Y-81 - Most Tender

Y-81— Most Tender

180—(SI days.) We've tried most all sweet corns and this hybrid is about tops in every way. Extremely fine quality. Has distinct nutty flavor all its own. Stays in top eating condition over long period of time. Outstanding for freezing or canning. Best of all, a vigorous grower made to withstand hot midwest summers. A main crop variety. Triple size pkt. (3 oz.) 15c; ½ lb. 40c; 1 lb. 75c; 2 lbs. 1.24, ppd.

EARLY GIANT GOLDEN BANTAM HYBRID

178—(65 days.) Matures by the 4th of July. Earliest variety in our trials. Ten days earlier than the ordinary Golden Bantam. Grows short stalks, 4 to 5 ft. so can be planted close. Stalks heavy, vigorous growers, stand up well. Ears 6 to 7 in. long, rich yellow color, 2 ears to stalk. Kernels long and plump. 12 row variety. Triple size pkt. (3 oz.) 20c; ½ lb. 45c; 1 lb. 68c; 3 lbs. 1.65, postpaid.

GIANT BANTAM HYBRID

175—(75 days.) A second early variety. Was developed especially for the market garden trade. About 4 days earlier than the Golden Bantam open pollinated. Runs almost 100% 10 to 12 rows to the ear. Ears 7 inches long, very uniform, resistant to smuts and to root diseases. Finest flavor; a good canning variety. Triple size pkt. (3 oz.) 156; 1/2 lb. 40c; 1 lb. 60c; 3 lbs. 1.50, postpaid.

GOLDEN CROSS BANTAM HYBRID

which all Hybrid Sweet Corn is judged. A big Golden Bantam. Has 12 to 14 rows of kernels, quality exceptionally fine, noted for uniformity. Strong grower, resistant to smut, ears 8 in. long. About 5 days later than regular Golden Bantam. Best for freezing. Triple size pkt. (3 oz.) 15c; ½ lb. 38c; 1 lb. 65c; 3 lbs. 1.59, postpaid.

HYBRID GOLDEN EVERGREEN

182-(90 days.) The biggest and best 182—(90 days.) The biggest and best of all the Golden Hybrid Sweet Corn. Ears 8 in. long, 12 to 16 rowed, big, deep kernels. Delicious, sweet flavor and excellent quality. Stalks are 7½ to 8 ft. tall and have a strong root system. Far 3 years it has led in yields in our trial grounds. Triple size pkt. (3 oz.) 20c; ½ lb. 40c; 1 lb. 65c; 3 lbs. 1.59, postpaid.

HYBRID STOWELL'S EVERGREEN

184—(97 days.) A deep kerneled hybrid. High quality and hardy. One of the heaviest yielders. Stalks 7½ to 9 ft. tall; ears 14 to 18 rows, about 8 in. long. Outyields ordinary Stowell's Evergreen and better in quality. Unexcelled for canning. Commercial canexcelled for canning. Commercial can-ners like it, too. Triple size pkt. (3 ners like it, too. Triple size pkt. (3 oz.) 15c; ½ lb. 44c; 1 lb. 68c; 3 lbs. 1.65. postpaid.

IOANA- Drouth-Resistant

176—(87 days.) An All-America bronze medal winner, developed by Ia. State College. Resists drouth and wilt. Ideal for market gardening or canning. Marvelous for freezing. Deep yellow variety but not as dark as Golden Cross. Tall sturdy stalks with many leaves. Ears 8 in, long. 12 to 14 rows, medium kernels. Triple size pkt. (3 oz.) 15c; ½ tb. 40c; 1 lb. 60c; 3 lbs. 1.50, ppd.

Henry Field Seed & Nursery Co., "MIDWEST'S LEADING SEEDHOUSE," Shenandoah, Iowa

will have plenty all season.

4 2 5 - (73 days.) A perfect tasting, heavy bearing, vigorous to-mato. We've

vigorous tomato. We've
never seen a
rotten one or
a vine that
wasn't loaded
full. Fruit size of grapes. Borne
in big clusters. Bears when others
fail. Good eating, but especially
good for canning, preserves and
sauce. Pkt. 15c, postpaid.

Big Yellow "GROUND CHERRY" Easy to Grow

230-Fruits resemble large yellow berries and are en-

closed in loose papery husks. Grows close to the ground but does not spread much. Delicious preserved or in combination with lemons and oranges. Pkt. 10c; ½ oz. 40c, postpaid.

GARLIC

- Califor-240 nia White Gar-lic. (110 days). The best variety. Divide the bulbs into "cloves," plant tend like onion sets. Store like onions. Or, since garlic is hardy,

may be left in garden over winter. 5c per single bulb; 1/2 lb. 35c; 1 lb. 65c, ppd.

LEEK

231—(130 days.)
Member of onion
family; sweeter
than onions.
Nicely flavored
stems for soups,
s t e w s, o r
creamed. Pkt.
10c, ppd.

TOMATOES

Held's EARLY RED HEAD
Heavy Yielding—Doesn't Crack
401—(76 days.) Red Head was introduced
a good many years ago but since then we
have been working on it constantly to
make it better. Is heavy yielding, bears
over a long time. The tomatoes are round
and smooth, ripen evenly, and seldom
crack. The firm flesh makes it a fine canning sort. Pkt. 15c; 1/2 oz. 35c; oz. 60c;
1/4 lb. 1.50, postpaid.

OXHEART

Mild Flavored
409—(90 days.) Large
heart-shaped, pinkskinned variety. The flesh
is thick but very tender.
It has few seeds. Has an
appealing, mild flavor.
Pkt. 15c; 1/2 oz. 45c; oz.
80c; 1/4 lb. 2.00, ppd.

SNOWBALL

Almost No Acid
403—(78 days.) An ivorywhite tomato with flesh
almost white. Almost as
big as Ponderosa. Has few
seeds and practically no
acid. Lots of folks who
were unable to eat tomatoes before enjoy this one.
Pkt. 15c, postpaid.

PONDEROSA

Largest of All

MARGLOBE—Perfect Canner

405—(115 days.) Another dependable, wilt-resistant main crop. Vigorous grower, medium large, n e a r l y globe-shaped, smooth and solid. The quality is extra fine, and it is an outstanding tomato for canning. Deep scarlet. Ptt. 10c; ½ oz. 27c; oz. 45c; ¼ lb. 1.15, postpaid.

RUTGERS—The Old Favorite

417—(110 days.) The old favorite that deserves a place in every garden. Flesh is firm and of fine quality. Doesn't have a hard core, and is outstanding for its uniform, deep red coloring. Excellent for canning. Pkt. 11c; ½ oz. 29c; oz. 50c; ½ lij. 1.25, ppd.

F. HYBRID

Vigorous New Hybrid

Vigorous New Hybrid 424—(74 days.) A brand new, extra-vigorous hybrid of outstanding quality. Brilliant scarlet, medium sized, round, smooth fruit. Especially fine for canning. Lots of foliage to protect fruit from sun scald. Pkt. 20c; ½ oz. 75c, ppd.

EARLY EARLIANA

Good onion sets are scarce. We have no Red or White sets. Yel-low ones are much bet-ter anyway. Write for special prices on larger lots.

Very Vigorous

411—(66 days.) One of the best of the early red tomatoes. Vigorous, spreading vines, bearing bright scarlet, medium size, nearly globe-shaped fruit in clusters. Fine quality, meaty fruit. Pkt. 15c; ½ oz. 29c; oz. 54c; ¼ lb. 1.45, postpald.

FIELD'S RED KNIGHT HYBRID

427—(60 days.) The extra early Hybrid tomato we all have been looking for. Our pick of over 60. Brilliant scarlet color, firm flesh, mild flavor. Packed with hybrid vigor. Resistant to numerous diseases. Doesn't crack open, and, best of all, is a tremendous yielder of uniform, medium size fruit. Pkt. (30 seeds) 25c; extra large pkt. (150 seeds) 1.00, postpaid.

FIELD'S RED RIVAL HYBRID

428—(75 days.) A main crop Hybrid with fruit weighing 10 ounces or better. Fruit perfectly smooth with scarlet red flesh, thick walled, won-derful flavor. Vigorous grower with plenty of foliage. Was developed in the Midwest for Midwest conditions. Thrives where many others fail. Pkt. (30 seeds) 25c; extra large pkt. (150 seeds) 1.00, postpaid.

HYBRID TOMATO PLANTS

2 Heavy Yielding HYBRIDS

4G9—Henry Field's Early Hybrid—Brilliant scar-let, firm flesh, mild flavor, resistant to disease. Very heavy yielder. 20 plants for 1.00, ppd.

GOLDEN SUNRAY Best of the Yellows

404—(72 days.) A new, highly productive, golden orange tomato. Resistant to fusarium wilt. Has a mild but rich flavor. Primarily a home garden tomato but sells well at local markets and roadside stands Makes delicious juice. By far the fluents of the yellows. Pkt. 15c; ½ oz. 785c, ppd.

SUPER SIQUY Drouth-Resistant

416—(68 days.) A cross between two leading varieties, having the good qualities of both, plus hybrid vigor. Almost globe-shaped, medium size, medium early. Fruit solid deep red, thick walled, and small seeded. Fine for market or home use. Pkt. 15c; ½ oz. 50c; oz. 85c, post-paid.

HYBRID TOMATO OFFER

Pkt. Field's Red Rival Hybrid
Two heavy yielding hybrids described at left. Because of outstanding vigor and gee, ppd.

50c; ¼ lb. | .25, postpaid.

PRITCHARD

An All-America Winner
423—(112 days). A wilt-resistant variety. The fruits
are solid, heavy, smooth,
globe-shaped, deep scarlet
and mild flavored. Best
main crop tomato. Can be
planted close together. Pkt.
15c; ½ oz. 25c; oz. 39c;
¼ lb. 98c, postpaid.

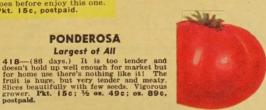

ORANGE and SCARLET SLICER Perfect for Table or Canning

You all know about Searlet Slieer Tomato—the one that took the Midwest by storm when it was introduced a few years ago. And that was followed by Orange Slieer, identical to the Scarlet Slicer except the fruit is a golden orange.

These two tomatoes will succeed most anywhere. They have heavy foliage which protects fruits from the sun and hot winds, their deep roots protect them against dry weather and they are sure yielders. But, best of all, they are big, smooth, round, juicy and meaty to the core. They are also disease-resistant.

disease-resistant.
4 | 0 - SCARLET | SLICER--(72 days.)
Pkt. | 5c; ½ oz. 25c; 1 oz. 45c, postpaid.
4 | 3 - ORANGE | SLICER--(76 days.)
Pkt. | 15c; ½ oz. 50c; 1 oz. 90c, postpaid.

I pkt. each Scarlet Slicer and Orange Slicer for 25c. 475X-Postpaid

SILVERSKIN—Best Flat Keeper 311—WHITE PORTUGAL—(100 days.) Mild, pleasant flavor. A medium-sized globe, somewhat flat-tened, A good keeper, very attrac-tive. Well liked. Pkt. 15c; oz. 69c; ¼ lb. 1.97, ppd.

UTAH SWEET SPANISH-Best Yellow

Riverside Variety

303—(110 days.) A mammoth yellow globe. Very heavy producer and early. Light straw colored skin with pure white fiesh. A good keeper. Pkt. 15e: oz. 75e; 1/4 lb. 2.20, postpald.

Yellow Ebenezer ONION SETS

The Famous Hazelnut Size

317—For fine tender green onions or early fully matured ones. These hazelnut-size small sets go farther than the large ones and will give you just as big onions at lower cost per acre. They cost us more but we sell at the same price as unscreened sets. Beautiful solid sets. Qt. 35c; 2 qts. 65c; 4 qts. 1.19; peck,

White BUNCHING

Wigorous, Heavy Yielder
307—(100 days.) Large deep
bulbs, Bright straw color. Uniform, hard, creamy white flesh.
A vigorous heavy yielder adaptable over wide area. Uniform
maturity. A dandy for market
growers. Pkt. 20c; ½ oz.
65c; oz. 1.00; ½ lb. 3.00;
1 lb. 10.00, ppd.

WHITE SWEET SPANISH Sweet, Early Table Onion

313—(110 days.) Large, mild and sweet. Pure white. Better keeper than Bermuda. Does better in north. A fine early table onion. Pkt. 15c; oz. 75c; ½ lb. 2.15, ppd.

LARGE RED GLOBE

The Round Red

305—(120 days.) Probably
most popular of all onions.
Flesh fine grained. Deep,
rich red, good keeper, fine
for either fall or winter
market. Pkt. 15c; oz. 64c;
1/4 lb. 1.82, ppd.

315—A fine variety for bunching or early green onions. Onions are of good quality—sweet and tender. Sow seed in early spring or fall for early spring onions. Pkt. 15c; oz. 65c; ¼ lb. 1.95, postpaid.

YELLOW GLOBE DANVERS

PRIZE PUMPKIN MIXTURE

770—A grand mixture of all the different kinds of pumpkins shown here and some trial ground sorts too. You can buy just this one packet and get a lot of variety. Pkt. Large Pkt. 10c; oz. 15c; 1/4 lb. 30c; 1 lb. 60c, ppd.

Pumpkin seed makes about 50 hills to the ounce. Plant and care for like squash.

WINTER LUXURY PIE

One of Sweetest

767—(100 days.) Looks a lot like the Small Sugar Pumpkin. A little larger in size. Color is orange, covered by a fine grained netting. Flesh is of high quality and very sweet. Makes the finest pies. Pkt. 12c; oz. 22c; 1/4 ib. 39c; 1 ib. 85c, postpaid.

JUMBO King of the Mammoths

769 — (120 days.) If you want an extra big one to take to the fair, here it is. Ofmore than 100 pounds. A heavy yielder—often pro-duces 4 or 5 pumpkins per vine. The flesh coarse but

extra fine for stock feed. Pkt. 12c; oz. 25c; ½ lb. 50c; 1 lb. 1.15, postpaid.

SMALL or RED SUGAR

766 — (118 days.) One of the best for pies. If you don't grow any other variety, plant a few of these. You will appreciate the quality, smoothness and sweetness. Orange-yellow inside and out. Prolific yielder. Doesn't grow very large. Pkt. Ocean't grow very large. Pkt. Oc; oz. 22c; ¼ lb. 45c; 1 lb. .10, postpaid.

CANGOLD PUMPKIN

762—(110 days.) A brand new one. Just released by Iowa State College. Outstanding feature is its thick, fine quality flesh. Medium size, oblong shape, rather tan color. Short vines, so can be planted in space 3 by 6 ft. Dandy variety for pies. Pkt. 15c; oz. 35c; 1/4 lb. 1.00, postpaid.

YANKEE FIELD or COW PUMPKIN

LARGE CHEESE or BUFF PIE

Pkt. 10c; oz.

PARSNIPS

Sow the seed early as it starts slowly. We always sow radish seed with it as radishes come up early and mark the rows so cultivation can be started. Leave parsnips in

the ground over the next winter. One ounce of seed will sow 200 feet of row.

203-ALL-AMERICAN. (95 days.) Without doubt, the finest of all. White skin, flesh fine grained, very tender, with wonderfully sweet flavor. Roots are slender and smooth, medium-long, and broad shouldered. Pkt. 10c; oz. 25c; 1/4 lb. 69c; 1 lb. 1.95, postpaid.

MUSHROOM SPAWN

241—Grow your own delicious mush-rooms. Easy and inexpensive to do. Easy to grow in cellars, caves, barns or out-buildings. Full cultural directions with ry order. One brick plants 10 to 12 sq. Brick 39c; 3 bricks 1.10, postpaid.

SALSIFY (Vegetable Oyster)

205 — MAMMOTH SANDWICH ISLAND. One of the best vege-tables for soup. Also delicious baked or creamed. Has flavor like oysters. Flesh

is white, very tender and sweet. Plant early in spring, cultivate, harvest and store like parsnips, or may be left in the ground until spring. Pkt. 15c; oz. 45c; ¼ lb. 1.20, ppd.

EGGPLANT-Tender, Delicious Eggplant should be better known. Tend

them just as you would peppers 656-BLACK BEAUTY. (83 days.)

Grows 5 to 6 "eggs" to the plant. Average almost as big as a quart cup. The color is a rich, purple-black. Flavor unusually fine. Pkt. 15c; ½ oz. 25c; oz. 48c, postpaid.

Squash like rich loose soil and plenty of room—at least 10 to 12 feet apart. Use plenty of seed. Bugs sometimes play havoc with the seedlings, but not if you use Bug Dust. (See page 55.) For large-seeded squash figure about 25 hills to the ounce of seed and the small-seeded ones about 50 hills to the ounce.

SOUASH MIXTURE

All Kinds—All Seasons
749—Includes all of
the varieties named
here, and others. You
get a few of each here, and others. You get a few of each kind without buying a packet of each. Pkt. 1 Oc; oz. Large 15c; ¼ lb. Pkt. 40c; 1 lb. 90c, postpaid.

Genuine HUBBARD

DES MOINES TABLE QUEEN

Best Table Size—Very Early

r52—(80 days.) Sometimes called Acorn. If you like squash pie, use this variety. Also fine for baking. Just right size to serve two. About 6 inches long, shell is thin, hard, dark green. Flesh yellow and tender. Pkt. 10c; oz. 20c; 1/4 lb. 50c; 1 lb. 1.50, ppd.

Leading Winter Squash

Squash
745 — (110
days.) One of
the finest for
Thanks giving
time; in fact, all
winter. Of ten
keep until late
spring. Large,
warty, dark
green. Hard
shelled. Deep
orange - yellow
flesh. Pkt. 10c; oz. 20c; 1/4 lb.
55c; 1 lb. 1.65, postpaid.

SUMMER SQUASH

747—E A R L Y W H IT E BUSH SCALLOP. (52 days.) A medium white summer squash. Fruit round with scalloped edges. Pkt. [0c; oz. 20c; ½ lb. 39c; 1 lb. 1.00, ppd.

744 — EARLY PROLIFIC STRAIGHTNECK. (50 days.) An All-America winner. Very heavy bearer. Bush-type vines. Fruits yellow, smooth, straight. Best of all summer squash. Pkt. 15c; oz. 50c; ½ lb. 1.50, ppd.

Golden DELICIOUS

738—(110 d ays.)
Averages 8 to 10 lbs,
Flesh very sweet, of
fine texture, and orange-red. Soft shell.
Good keeper. Pkt.
10c; oz. 20c; ½ lb. 60c; 1 lb.
1.65, ppd.

BANANA SQUASH

Good Eating—Vigorous Grower
736—BLUE BANANA. (115 days.)
Good all-purpose squash. Stands
squash bugs and pests better than
other kinds. Color is bluish slate
gray, the flesh bright orange and is
shaped like a huge banana. Pkt.
10c; 1 oz. 18c: ¼ lb. 50c; 1 lb.
1.30, ppd.

CASERTA

740—(55 days.) A new and better squash. An All-America Gold Medal Winner, Fruits 15 to 18 inches long, 4 to 5 inches in diameter. Light yellow with green stripes. Excellent for pies or baking. Especially fine when about 8 inches long. Pkt. 15c; oz. 35c; ¼ lb. 1.00, postpaid.

STRIPED CUSHAW

Very Fine Grained

BUTTERNUT SQUASH

Finest Flavored Squash

753—(85 days.) Fruits 10 to 12 inches long. Bottle-shaped, dark tan color, hard shell. Wonderful for pies, boiled or baked. Flesh is thick, dry, of fine texture, deep orange, fine flavored. Pkt. 15c; oz. 40c; 1/4 lb. 1.15, ppd.

DELICATA SQUASH

or Sweet Potato

741—(110 days.) Sold under many names. The color is green and yellow. When baked and served with melted butter, it beats them all.

Pkt. 12c; oz. 20c; 3/4 lb.

SPAGHETTI SQUASH

748—(95 days.) Fruits are about 10 inches in length, filled with a spaghetti-like pulp. Cook the whole fruit just as it comes from Just as it comes from the garden, for 20 or 30 minutes, cut open and season. Makes fine eating. Pkt. 15c; oz. 20c; 1/4 lb. 44c; 1 lb. 1.08, postpaid.

STOCK BEETS

Nutritious, inexpensive livestock and poultry feed. Make 15 to 20 tons of beets to the acre. Sow seed in April and May in rows 2½ to 3 feet apart, at rate of 10 or 12 lbs. per acre. Mature in 90 to 120 days. Harvest before severe frost and store in pits or cellar. Prices on all varieties below: Oz. 24c; ½ lb. 73c: 1 lb. 1.90; 5 lbs. 9.00.

616 — GIANT HALF SUGAR ROSE (Feeding Sugar). One or the heavi-est producers. Its extra sugar content makes it es-pecially desirable as a dairy feed. Fine keeper, oval-

RED MANMOTH LONG RED MANGEL. The largest and most productive of all. Often called "Gate Post" because of its size. Usually reaches 24 to 30 inches in length, with individual weight from 25 to 35 lbs. Easily harvested as the root grows half out of the ground

610-POULTRY BEETS You who have fed mangels to poultry know their value as a winter feed to take the as a winter feed to take the place of green stuff to keep the hens on production.

This is a mixture of all kinds. Makes real feed.

612-SUGAR BEET(Klein Wanzleben) — (90 days). Large, smooth, white, wedge-shaped root rich in sugar content. It grows mostly below the surface of the soil. Roots not quite so large as the mangel

Lots of time has been spent to get you only the finest kind of beets. On some of the varieties we have even sent to Europe after the seed. We like beets of uniform shape and color, with small tops, small tap root, free from the straggly side roots. One ounce of seed will grow a 100-foot row. Plant as soon as you can get in the ground in the spring and make several sowings throughout the

patch of ground as big as a table top should raise his own radishes. Plant 4 or 5 different kinds. One 4 or b different kinds. One ounce of seed will make a row 100 feet long, and when you figure how many bunches you can get from a 100-foot row, you can easily see what a money maker it is. Make several plantings.

LONG WHITE ICICLE

Crisp, Sweet, Early
448—(27 days.) Most popular and
the earliest long white radish on the earliest long white radish on the market. Flesh is perfectly white, clear to the top, and is crisp, juicy, mild, and of a de-licious sweet flavor. One of the most tasty ones we have. Tops are small. It grows quickly and doesn't get pithy. Pkt. 10c; oz. 20c; ¼ lb. 43c; 1 lb. 1.29, post-

HAILSTONE

Sweet, Round, White

New CRIMSON GIANT

Huge but Not Pithy

437—(28 days.) Noted for its large size, and because it doesn't get pithy. Gets almost twice as large as most radishes. The flesh is a snowy white, and the color is an attractive deep crimson. A vigorous quick grower that is one of the best for the home garden. Pkt. 15c; oz. 20c; 1/4 lb. 45c; 1 lb. 1.19, postpaid.

FRENCH BREAKFAST

Attractive 2-Color Radish

442—(25 days.) The radish everyone likes. Is a brilliant scarlet color, with a white bottom. Oblong in shape. Flesh is crisp, luicy, mild and sweet. iA quick grower. Popular with both home and market gardeners. If you've never tried French Breakfast, do so this year. You'll like it. Pkt. 10c; oz. 20c; ¾ lb. 59c; 1 lb. 139, postpaid.

CHERRY BELLE

An All-America Winner

441—(24 days.) A new round, red, smooth radish from Holland. Flesh white crisp, solid, sweet and mild. Its earliness, extreme uniformity and high quality make it a popular market and garden variety. Pkt. 15c; oz. 30c; ¾ lb. 65c, postpaid.

EARLY SCARLET GLOBE Earliest Red

440—(22 days.) A crispy, sweet little radish, round as a ball, bright scarlet in color. Tender, mild, sweet. On good soil ready to eat in 3 to 4 weeks. An unusually nice variety for home gardeners as well as large growers. Pkt. 15c; oz. 25c; 34 lb. 74c; 1 lb. 1.50, postpaid.

TENDERSWEET

Sweetest Eating Radish

439—(24 days.) Here's a radish improved for its taste—not its size. It's early, round and red, like a ball, but more than that—all the tender crispness a radish could have and still be deliclously and unusually sweet has been bred into this new strain. Ready in 3 to 4 weeks. Pkt. 15c; oz. 29c; ½ lb. 89c, postpaid.

TWO FALL RADISHES

WHITE MAMMOTH Big White One

456—(58 days.) A fa-vorite. 7 to 8 in. long. Solid, white flesh. Sow middle summer. Pkt. 15e; ez. 20e; ¼ lb. 37e; i b. 1.09, ppd.

Harten Carter of

LONG SCARLET—The Red Icicle

451—(26 days.) The short top kind. Standard sort for home gardeners and truckers, too. Smooth and uniform, five to six inches long, crisp white flesh. Pkt. 10c; oz. 20c; ¼ lb. 42c; 1 lb. 1.10, postpaid.

L Propertular Statute

SEED

DETROIT DARK RED

Favorite the World Over

604-(58 days.) Improved variety. There are no white streaks or rings There are no white streaks or rings in this one. It is a deep, rich red color, inside and out. Tender, fine grained and sweet. Globe-shaped. Has small tap roots. Excellent for home gardener for freezing and canning. Also a good one for market gardener. Pkt. 12c; oz. 35c; 1/4 lb. 95c, postpaid.

Henry Field Seed & Nursery Co., "MIDWEST'S LEADING SEEDHOUSE," Shenandoah, Iowa

PERFECTED CANNER . . .

Won't Fade in Cooking

Won't Fade in Cooking
605-(58 days.) This beet not only
has the richest, dark red color, but
doesn't lose it in cooking or pickling.
It is small, uniform and smooth with
practically no tap roots. You can't
find a better all-around beet for canning. Pkt. 12c; 1 oz. 35c; 1/4 lb.
1.10, postpaid.

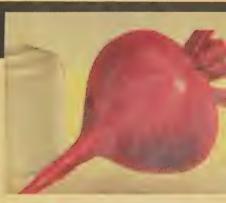

DARK RED CANNER

For Conning, Cooking, Pickles
606—(59 days.) Exceptionally fine for pickles. Small and globe-shaped. Very uniform. Quality excellent, as is tender and fine grained. Color is a rich, dark red; doesn't fade or wash out during cooking or pickling. Pkt. 12c; oz. 36c; ½ lb., 95c, postpaid.

EARLY WONDER Gardener's Favorite 607--(52 days.) Very early, tender and small. Beautiful

Beautiful in appearance because of its flat, globeshape, small collar and tap roots, and color. A favorite with market gardeners. But many home gardeners use it too, particularly for fall planting. Also good for winter use and bunching. Pkt., 10c; oz. 35c; ¼ lb. 95c, postpaid.

PERFECTED DETROIT DARK RED

An All-America Winner

602-(58 days.) A re-selected strain of Detroit Dark Red. In our trial grounds it has made the best showing of any for color, shape and uniformity. In fact, we don't know how it can be improved. Medium in size and runs as regular and uniform as you could wish. Rich, deep dark red with absolutely no white rings or streaks. No side roots. Fine quality, sweet, tender flesh. Pkt. 15c; oz. 39c; 1/4 lb. 1.00, postpaid.

A good hobby. Lots of fun. Make pitchers, dippers, birdhouses, cen-terpieces, pipe bowls, cups, vases, lamps, animals, etc. They make fine decorations, painted or un-

1106—SMALL-FRUITED MIX-TURE. No end of kinds, colors, and varieties in this mixture. Pkt. 15c. postpaid.

1105-LARGE-FRUITED MIX-TURE. A dozen or more of the finest large varieties. Pkt. 15c,

HERBS For seasoning, flavoring, medicine, fragrance

COLLARDS

226—Cabbage leaves without heads. Pkt. 10c: oz. 15c, postpaid.

TOBACCO

238—White Burley. A fine, standard, all-purpose variety. Does well most everywhere. Pkt. 15c; oz. 35c, postpaid.

. . . MAMMOTH SUNFLOWER

239—(80 days.) For chicken feed. You can also parch sunflower seed—it's delicious. Pkt. 10c; oz. 15c; ½ lb. 29c; l lb. 69c, ppd.

6035—Sunflower for Bird Seed 1 lb. 45c; 3 lbs. 1.25; 5 lbs. 1.60, ppd.

Field's Giant Muskmelon

329-(97 days.) A truly outstanding muskmelon that is a favorite of so many of our customers. One of the very largest grown. (often grows to 14 lbs.!), yet is sweet and as fine flavored as any muskmelon we have ever eaten. It is a selection from the oldfashioned Perfection strain, having deep orange flesh of good quality. Pkt. 20c; oz. 50c; 1/4 lb. 1.25, postpaid.

GREEN-FLESHED MELONS

THE EARLY ONE

THE EARLY ONE
344—S T A N D A R D
ROCKY FORD. (84
days.) The old greenfleshed "granddaddy of
them all." A selected
early strain which will
please you. Pkt. 10c;
oz. 35c; 1/4 lb. 85c;
1 lb. 2.10, postpaid.

*

THE SWEET ONE

337—HONEY DEW. (112 days.) Late variety. Extremely sweet. Has smooth white rind and green flesh. Honey like flavor. Pkt. 10c; oz. 40c; 1/4 lb. 90c; 1 lb. 2.25, postpaid. Henry Field's Selected

We're proud of our musk melon seed. We don't believe there are any other seedsmen in the country who spend as much time fussing with the growers, inspecting crops and worrying about melon seeds. Every variety is grown by a specialist in an isolated place

where it doesn't get a chance mix with anything else.

Plant seed after ground is warm. Figure about three dozen hills from one packet of seed or 100 hills from an ounce. Give plenty of room, at least 6 to 8 ft. each way.

NEW! CONGO

704—(88 days.) Won a Bronze Medal at the 1950 All-America trials. Developed by the U.S.D.A. Resists anthracnose and wilt. A long melon with deep red, sugar-sweet flesh (9.4% sugar by actual tests), Rind is tough. Ideal for market gardeners. Pkt. 15c; oz. 35c; 1/4 lb. 90c, postpaid.

GARRISON

An Improved "Rattlesnake"

707—(88 days.) An improved Rattle-snake type. Probably sweetest, most flavorsome of all. Is long with blunt ends. Flesh bright red, firm, and of fine texture. Melons weigh 35 to 40 lbs. Pkt. 15c; oz. 30c; ¼ lb. 75c; 1 lb.

KLECKLEY SWEET

The Wilf-Resistant One

706—KLECKLEY SWEET No. 6

—(90 days.) Originated by Iowa
State College. Has all the good
qualities of Kleckley, plus the resistance to wilt, and similar diseases, Flesh is bright red, tender
and extremely sweet. Doesn't grow
bottle-necked. Stands handling and
shipping well. Pkt. 10c; oz. 30c;
1/4 lb. 65c; 1 lb. 1.50, postpaid.

Ripe by July 4th

708-(70 days.) 20, 000 of our customers swear by this melon year after year. One of the earliest grown.

Average weight 8 to 10 lbs. Rind deep green, marked with lighter stripes and is exceptionally thin (not over ¼ in.). Flesh dark red, tender, fine grained, unusually sweet and rich. Pkt. 15c; oz. 35c; ¼ lb. 95c; 1 lb. 2.30, postpaid.

Midget WATERMELON

711-This is an improved ice-box style melon. Fruit is only 7 to 8 inches longjust right for individual serving and easy refrigerator storage. Flesh is delicious. Is sweet, rich red, of fine quality and very crisp. Rind is very thin. An outstanding melon every home gardener should grow. Pkt. 15c; 1 oz. 35c; 1/4 lb. 85c, postpaid.

So small you can hold it in your hand.

SEEDLESS WATERMELON

Sweet, Delicious, Seedless

727—Yes, it's true—we have an honest-to-goodness Seedless Watermelon! Has no seeds, except for a few soft, unde-veloped ones, about like those of cucumbers, that you eat without noticing. Seedsmen have finally discovered the way to produce seedless melons. One of

the parent plants is treated with a special chemical which upsets structure. The treated plant is crossed with a normal plant and the offspring is seedless.

The melon is of the "icebox" type, 8 to 10 inches in diameter, round, with deep red flesh that is sweet and delicious. Pkt. (10 seeds) 50c, postpaid.

Henry Field's SEED POTATO SETS

From Finest Basic Stock in North America

NO CUTTING OR TREATING REQUIRED

Our seed sets come from the finest basic seed stock in America. Each set has just the right amount of meat with the eye to insure best germination. The sets are treated to eliminate surface fungus, to protect them against soil-borne organisms, and to enable you to plant when ground is still cold. They are easier to plant, germinate quicker, produce more and better pota Therefore, they cost you less in the long run.

264—OSAGE. A new potato developed by Ia. State College and U.S. Dept. of Agr. Promises to be better than Cobbler. A little longer than Cobbler, much

HEFTAIN SAVOY
518—(88 days.) AllAmerica award winner with attractive
crumpled leaves. Mild
flavored and sweet.
Everyone can eat this
variety, as it doesn't
have strong cabbage
taete. Pkt. 20c; ½
oz. 35c; oz. 65c;
¼ lb. i.75, ppd.

The Four Best Varieties

Plant some of the early ones in the spring, just as soon as you can work the ground. The main crop turnips are best sown the latter part of July. One ounce of seed will drill 150-foot row. Use 2 to 3 lbs. seed to the acre.

807—PURPLE TOP GLOBE

—(55 days.) The leading turnip. Yields heavy crops of large, round, purple top turnips. Very tender, crisp and sweet. Flesh pure white. Stores well for winter use. Unusually good. Pkt. 10c; oz. 18c; 1/4 lb. 45c; 1 lb. 95c, postpaid.

803 — EXTRA EARLY MI-LAN—(40 days.) One of the earliest turnips. Fine for home or market. The roots

are flat, white with purple top. Flesh pure white, very fine grained, sweet and ten-der. Pkt. 10c; oz. 20c; // lb. 45c; 1 lb. 1.30, postpaid.

810-WHITE GLOBE- (75 810—WHITE GLOBE—(7days.) A large variety good for table use or for stock feed. It produces a tremendous turnip. The roots grow 4 to 6 inches in diameter and are entirely white. Pkt. 10c; oz. 15c; ¼ lb. 38c; 1 lb. 98c, postpaid.

806—PURPLE TOP STRAP LEAF—(45 days.) Very simi-lar to Purple Top Globe ex-cept is flatter in shape. One of the finest garden sorts for either spring or fall planting. Pkt. 10c; oz. 15c; 1/4 lb. 35c; 1 lb. 95c, post-páid.

RUTABAGAS

808—RUTABAGA AMERICAN PURPLE TOP — (90 days.) Has large, smooth, cabbage-like leaves. The root is large, globe-shaped, with a small yellow crown and a purple top. The flesh is tender and crisp. Grown extensively in the northern sections. Pkt. 10c; oz. 20c; ¼ lb. 45c; 1 lb. 1.35, ppd.

Good Keepers Firm Flesh

For Gernin

2 1 7 — M O S S

CURLED. (70 days.)
Use for garnishing
and seasoning. Fine
for soups and salads.
Very curly, dark
green leaves. Can be
grown Indoors in pots
during winter. Pkt.
10c; oz. 29c; ¼ lb. 79c, ppd. 10c; oz. 29c; ½ lb. 79c, ppd.

221 — TURNIP - ROOTED
(HAMBURG). (90 days.)
Grows like carrots. Has the same flavor as regular parsley, but the roots, which resemble small parsnips in shape and color, are the edible part of the plant. Use for soups and flavoring. Can be grown indoors in pots during winter. Pkt. 10c; oz. 27c; ½ lb. 75c, postpaid.

Purple Top Globe

14

URNIPS

SWISS CHARD "Spinach-Beet"

220—(60 days.) The finest greens in the world. Really a beet but always used as greens. Bears tender leaves all season, even after light frost. Fine, too, for poultry. Pkt. 12c; oz. 24c; ¼ lb. 70c, postpaid.

How to Cook Chard

Use tender leaves. Wash thoroughly, drain. Put in kettle, but don't add water. Lay strips of bacon on top and add small sliced onion, salt and pepper. Cover. Cook slowly until tender.

CAULIFLOWER

Cauliflower is similar to cabbage. Requires about the same growing conditions and same culture. Plant early and handle as you would cabbage. Makes mighty good eating.

558—EARLY SNOWBALL. (54 days.) Heads are deep, smooth, compact and snowy white. Very early. Pkt. 15c; 1/4 oz. 95c; oz. 2.95, postpaid.

Midget VEGETABLES

Small varieties for a complete garden in the smallest back yard, but good to grow even if you have plenty of room. Every one tops in quality.

Special Rhubarb-**Asparagus Collection**

A2527X-These two plants always seem to go together and you usually plant them in outof-the-way places around back somewhere. Here we make it easy for you to get a good start of both. 25 MARY WASHINGTON ASPARAGUS 2-yr. No. 1, and 3 Famous Chipman's Canada Red Rhubarb, all for 2.98, postpaid.

Famous Chipman's

CANADAREDRHUBARB

Best of the New

A1955-When once tried, you'll agree this is best of all rhubarbs. The stalks are large and completely red from bottom to top, and even the flesh is red. Cooking does not take away its rich color but makes it more appetizing for pies and sauce, a rich cherry red. Sweetest of all rhubarb, so takes less sugar. Extremely productive. You can pull the big stalks all spring and summer and almost till fall. Ordinarily does not seed. Plant early and you can get some rhubarb this year. Large No. 1 roots 98c each; 3 for 2.69, postpaid.

RHUBARB BARGAIN A2520X

No. 1

Heavy-Bearing 3-Year-Old Pear

"Dear Mrs. Field: I am sending a picture of our daughter, Gladys, 12 years old, standing beside a 3-year-old Bartlett pear tree. Last year it yielded 30 nice large pears. We have always been well pleased with all your trees and seeds."—Mrs. Focke Diener, Rt. 2, Franklin, Nebr.

Sensitive Plant

Here's an unusual plant we thought some of you would like to have. It's called the Sensitive Plant and it's one of the most mysterious of all plants. Touch the leaves and they drop limp. In a few moments they are erect again. It has fernlike foliage, fuzzy pink flowers, and grows about a foot high.

What makes it tick? We don't know. Perhaps you can figure out the answer. It's an annual and easy to grow. Plant it out in the garden or pot it up as a house plant. But wherever you plant it, you may be sure it will mystify you and your friends.

No. 1227—Sensitive Plant. Pkt. 15c, postpaid.

Free Wedding Roses

To persons sending in a picture of To persons sending in a picture of their recent wedding, Golden Wedding anniversary (50th), or Diamond Wedding anniversary (75th), we will send a free rose bush. Reason we do this is that we want our son we do this is that we want our friends to have them as a sort of a personal gift from us. Just send a photograph and tell us all about it. If you don't have a picture, send an announcement, though we'd prefer a picture. Can't tell you what kind of rose we will send, but you can be sure it will be a good one. And we'll send it at the proper planting time.

Bride and Groom

"Dear Field's: We are sending our wedding picture and would like the rose you offer. We were married July 4, 1953. My parents have used

pleased with
them." — Mrs.
James Chance,
Kimnundy, Ill.
We are very
happy to be able
to send you a
nice wedding
rose. We hope
you will enjoy its
beauty for many
years.—Ed.

Come See Us in Shenandoah

We have had hundreds of thousands of friends come to visit us here at Henry Field's in the last 60 years. Maybe it's millions. Anyhow, they were all welcome, and we think they went home just a little bit more "garden-minded" than when they came. So come see years. "garden-minded" than when they came. So come see us—we like to

P.S. We close on Sundays.

Double Flowered Prairie Almond

We got this fine shrub from the Morden Experiment Station in Can-Morden Experiment Station in Canada. We think it may take the place of Rose Tree of China (Prunus Triloba), as its double flowers last longer, are borne in greater quantities and are followed by multitudes of slightly wooly, red almond nuts that remain into early winter.

nuts that remain into early winter. As you would suspect, the shrub is as hardy as a rock.

The Prairie Almond is of finer texture, more branchy and has narrower, more interesting foliage than the Rose Tree of China. The flowers are of a somewhat lighter shade of pink than those of Rose Tree of China and have a spot of bright red in the center of each bloom that gives them a distinctive charm.

If you can use a very attractive.

If you can use a very attractive, medium-growing shrub, try Prairie Almond. You will have something different and distinctive, and well worth growing.

No. A1470 — Prairie Almond. Good strong plants. \$1.50 each, postpaid.

Picking Zinnias

"Dear Mrs. Field: Here is a picture of my little 3-year-old sister picking some Zinnias that I ordered from you. They were beautiful, even though they had no rain for two or three months."—Miss Doris Boyd, Star Rt. 1, St. Genevieve, Mo.

Early spring or fall are the best times for transplanting.

No C.O.D.'s, Please

Unfortunately, we just can't ship C.O.D. There are so many delays in shipping this way that it isn't practical. Nursery stock should be planted just as soon as possible after leaving here, and if it has to wait around to be delivered it may not do too well. So, this is for your own protection. Then, too, C.O.D.'s always cause a lot of red tape, which in turn causes higher prices. We know you folks want to buy things at as low a price as possible, so by you will enjoy its at as low a price as possible, so by beauty for many years.—Ed. our prices down.

Henry Field Seed & Nursery Co., "MIDWEST'S LEADING SEEDHOUSE," Shenandoah, Iowa at as low a price as possible, so by not having C.O.D.'s, we can keep our prices down.

Tomato X

Win \$25 for Naming This Brand New Tomato

Here is a brand new tomato. In fact, it is so new it doesn't even

it doesn't even have a name yet. We are sure it will become a valuable one for

the midwest, especially where the summers are hot and dry. It is a "determinate" variety, which means that its growth is limited. (In other words, it won't run all over the garden.) Bears early and always has a heavy crop of fine quality tomatoes.

Take our word for it, this tomato

is so different from the other well-known kinds that even the rankest amateur gardener can see the dif-

Its seed is still very scarce, so get your order in soon if you want some.

No. 407—Tomato X. Pkt. (50 seeds) 25c; 3 pkts. 50c, postpaid.

P.S. We want a name for this new variety. After you have grown it, send us your suggestion for a name. We will pay \$25.00 to the person who suggests the name we like best. In case of tie, duplicate prizes will be awarded. Contest closes October 1, 1954.

Plant Nursery Stock AT ONCE

Don't let nursery stock lay around and dry out after you've received it. It's not like garden seed. For best results, it should get into the ground as soon as possible. Our stock shipped in perfect condition shipped in perfect condition for planting but, of course, we can't guarantee it will stay that way indefinitely. If the weather is bad when it arrives or you can't plant for some other reason, heel the stock in the ground. It will stay alive that way. Never expose roots to the sun or air for a long period

Extra Payment in Nursery

In shipping orders to customers In shipping orders to customers we sometimes send postage-free items along with others that go express-collect. When this happens, the customer has to pay express charges on the whole shipment. Naturally, this isn't fair, but to make it right and rather than put up two separate packages, we always put in a little extra nursery stock. This more than makes up for the additional postage charges. Seems like a good deal to us because you really get a bargain out of it.

35-lb. Banana Squash

"Henry Field Seed & Nursery Co.: Here is a picture of a little friend, Buddy, holding a 35-lb. Banana squash grown in our garden from Field's seeds,"-Mrs. Chas. Becker, Bowen Road,

Bigger Elephant Ears

Mrs. W. H. Holzworth, Rt. 1, Box 109, Spring, Texas, sent in this picture. She says, "I grew some Elephant Ears that are even bigger than those grown by Mr. Kidwell that are pictured in your Fall Catalog. Here is a picture of one I grew that has a leaf 40 in. wide and 48 in. long. My grandson and I are in the picture."

Write Us a Letter

Sometime when you have a spare Sometime when you have a spare minute, sit down and write us a letter. Let us know how our seeds and nursery stock are doing for you, or how you like some of our new items. Or, if you have some questions on gardening or planting, don't hesitate to ask us about them. Our advice is free for the asking. Anyway, keep on sending in your letters—we like to hear from you.

For best results, plant your vegetable garden early.

Winners of Our "Big Pumpkin" Contest

Pictured above are Mr. and Mrs. Roy Johnson, Bronson, Iowa. They are standing beside Mrs. Johnson's "King of the Mammoth" pumpkin that won our "Big Pumpkin" contest held last fall.

Early last spring we announced over local radio station KFNF that we were going to have a "Big Pumpkin" contest, and that if a person kin" contest, and that it a person wanted to enter, to write in and we would send him a free packet of pumpkin seed to plant. First prize was \$1.00 per pound for the biggest pumpkin; second prize was \$10.00. The contest closed October 3, 1953, during our annual Fall Festival.

There were many entries, but

There were many entries, but none equalled the pumpkins grown none equalled the pumpkins grown by the Johnsons. Mrs. Johnson's prize-winning pumpkin weighed in at 79 pounds and she received a check from us for \$79.00. Mr. Johnson's pumpkin, which weighed 53 pounds, was the second-largest entry, so he received the second prize of \$10.00.

Mrs. Johnson said the secret of her success was good seed, an old

her success was good seed, an old feed lot for good soil, and plenty of water to offset the extremely dry

32 Blooms on Regal Lily!

"Dear Friends: Enclosed is a picture of us standing by a bed of Regal Lilies. The bulbs were purchased from you in 1950. In 1952 one stalk grew 7 ft. tall and had 28 blooms. In 1953 it was 6 ft. 7 in. blooms. In 1953 it was 6 ft. 7 in. tall and had 32 mature blooms all at one time. It truly was a beautiful sight. Thanks so much for the lovely bulbs we have received from you."—Mr. and Mrs. Leo Wood, Marble Rock, Iowa.

An Expression of Thanks

"Dear Mrs. Field: An expression of thanks for the fine way we received our recent order. With an organization like yours being so cooperative, and helpful with planting ideas, we shall continue to order our seeds, etc., from you in years to come."—Blanche Hartens, 3949 West 140th St., Cleveland 11, Ohio.

Rapid-Growing Dolgo Crab

"Dear Mrs. Field.: Three years ago when we bought a farm, the first thing we did was to plant a new orchard. This Dolgo Crab, which we ordered from Field's, was planted near the house to help serve as a shade tree. It has made a rapid growth of several feet each year. Last spring it was white with Last spring it was white with blooms, and in the fall had almost as many bright red apples. Our 8-year-old Lucille and her kitten are shown with the tree."—Mrs. E. H. Zeller, Rt. 1, Huntertown, Ind.

FREE FOR 1c FOR KIDS ONLY

Henry Field's Seed and Nursery Stock Guarantee

Nursery Stock Guarantee

We guarantee the nursery stock we send out to give you complete satisfaction. If you are not pleased with it in every way when you receive it, return it promptly, at our expense, and it will be replaced or your money refunded, whichever you prefer. After you have planted it and it falls to grow, we think we should. fails to grow, we think we should both take part of the blame. We will take one-half and you and the weather take the other, and we'll replace at half-price any-thing unsatisfactory through any fault of the stock if you notify us not later than August 1, 1954.

Garden Seed Guarantee

We guarantee the vitality and purity of all seeds to full extent of the purchase price. We will replace them free of charge if they don't please you in every way, or will refund the money you paid for them. However, since even with the highest quality seeds and bulbs gardening ity seeds and bulbs, gardening depends so much on soil, climate and weather, we cannot and will not be liable for more than the purchase price of the seed.

Non-Warranty

The Henry Field Seed & Nursery Company warrants to the extent of the purchase price that seeds sold are as described on the container, within recognized tolerances; that the bulbs and plants sold are as described on the label. The company gives no other or further warranty, express or implied. press or implied.

Bells of Ireland

An old-fash-ioned annual flower from great grandmother's grand mother's garden that is taking the country by storm. Florists, as well as home gardeners, are going for it in a big way. Its delicately veined green

flowers, with small white centers, are about 1 inch across. They literally cover the 18 to 24-inch stems. Easy to grow. Thrives in hot weather. If you want a lovely, old-fashioned flower in your garden this summer, order a packet of Bells of Ireland. There's nothing else like it on the market

No. 1038—Bells of Ireland. Pkt. 20c; 3 for 50c, postpaid.

How We Ship Your Orders

If some of you folks who have sent in large orders don't get everysent in large orders don't get every-thing at the same time, it probably is because we have split up your order according to when different items should be planted. Orders are filled when stock is in best condition filled when stock is in best condition and during proper planting time. Garden seeds and non-perishable goods are sent immediately. But perennials, house plants, evergreens, bulbs, etc., are sent in separate packages, even when sent the same day as the rest of your order. So you needn't worry if you don't get everything at once. Just read the papers that come inside the nackage. They will give you full depackage. They will give you full de-

Please Order by Number

We always try to give our customers the best service possible betomers the best service possible because we know that is what all of you want. One of the things that will help both you and us is to order by catalog number. Just put down the catalog number on the order blank and, if you wish, put in the name too. If there are several colors listed under a variety, be sure to tell the color or colors you want.

Recommends All Our Supplies

"Dear Field's: We've appreciated all your dealings in every way, and we recommend your supplies to those who have similar needs,"—Mrs. Geo. W. Hanners, 703 S. Harper, Poteau, Okla.

Ornamental Corn

In our trial grounds we grow corn from all over the world—Africa, Italy, Spain, South America, etc. Some of it produces long ears, some produces short ears, some is thin, some squatty and fat. But all are very colorful. Because this corn is very coloriul. Because this corn is so unusual and pretty, we've made up a special color collection of over 40 different varieties. You'll get reds, blues, purples, yellows, golds, browns, blacks and even some ears of mixed colors.

Makes worderful description for the colorius of the c

of mixed colors.

Makes wonderful decorations for
the home and table, especially in the
fall of the year. Kids from 6 to 60
will like this colorful, ornamental

No. 170—Ornamental Corn. Pkt. (3 oz.) 15c; ½ lb. 35c, postpaid.

Glad Bulblets

BG360 - Same size as we plant for growing our own bulbs here. If you are willing to wait a year for a part of your flowers (20% will bloom the first year), plant these bulblets. Bulblets are simply small bulbs not yet grown to the largest blooming size. 1000 for \$2.50; 500 for \$1.50; 300 for 90c; 100 for 35c, postpaid.

Nice Melons

"Dear Mrs. Field: We are sending you a picture of some of the nice melons we raised last year from your seed. The banana muskmelyour seed. The banana muskmelons were the best ever. We use your seeds and like them."—Mr. & Mrs. C. R. Parker, Iconium, Mo.

Flame Violet Perfect After Traveling Half Way Across Continent

"Dear Sir: I am writing to tell you how fine the Flame Violet is coming. It was packed so that it was perfect—not a leaf bruised and is starting just fine."—Edith C. Lindsay, Clayville, N. Y.

Fragrant Gladiolus

Tragrant Gladiolus
The true name of this lovely, very fragrant flower is Acidanthera. (It is also sometimes called the Abyssinian Sword Lily.)
Its flowers of glistening white with purple-maroon blotch are borne on 2 to 4-foot spikes. Makes a fine cut flower, as the blooms are beautiful, fragrant and long lasting. Grows from a bulb and is as easy to grow as a true Gladiolus.
No. BG421.—Fragrant Gladiolus. Blooming-size bulbs. 3 for 30c; 6 for 55c; 12 for \$1.00, postpaid.

Golden Wedding

"Henry Field Seed & Nursery Co.: I am sending you an order for a few flowers and bulbs. Also enclosed is a picture taken on our Golden Weda picture taken on our Golden wed-ding anniversary, which was Feb. 18, 1953. If you still give roses, we would appreciate getting one."— Mrs. Chas. Christensen, Royal, Iowa. Congratulations. It is a pleasure to send you a rose for your anniver-sary.—Ed.

sary.—Ed.

Fuzzless Gold Peach

This is another creation of Dr. Fred HofMann of Omaha, Ne-braska. It incor-porates all the good points of our well-known Fuzzless Berta Peach with some

added features that will make Fuzzless Gold an even better fuzzless peach for the home owner.

Fuzzless Gold (patent pending), as the name implies, is a completely smooth - skinned, golden - colored peach with a bright red blush. Its outer fuzzless skin is much like that of a plum, in that when the peach is eaten you do not even notice the skin at all. Its fruit is the same size as a good Elberta or Hale Haven, but its stone is tiny. Therefore, it has more flesh than the average

This peach ripens about weeks earlier than Fuzzless Berta. It has set "tree-bending" crops of beautiful fruit in Omaha, Nebr., and has proved bud-hardy there in sea-sons when Elberta and Hale Haven have winter killed. It has also shown

have winter killed, It has also shown itself to be resistant to arsenical sprays. Thus, it may be sprayed to prevent curculio with much more freedom than the ordinary peach. We believe you will find this beautiful peach the finest fruit of its kind that you have ever tasted. Its thick flesh is firm, of good quality and deliciously flavored. In addition to its other fine qualities, it is a to its other fine qualities, it is a good keeper and a good shipper.

No. A3407—Fuzzless Gold Peach.

Be sure to read about the five brand new Flame Violets on the front cover of this catalog.

\$1.00 for Your Snapshots

Yes, we still want and need your snapshots, just as always. We have to have them or we just can't put out a Seed Sense or a catalog. We here at the seedhouse enjoy looking here at the seedhouse enjoy looking at them, too, as they give us an idea of how well our seeds and nursery stock are doing. Of course, we can't use all we receive, but we'll pay \$1.00 for the ones we do use. So get busy today and send in your snapshots of your flowers, vegetables, gardens, children, chicks, etc. The more you send, the better we like it.

Winner of 1953 Junior Seedsman Bicycle

The winner of the 1953 Junior The winner of the 1953 Junior Seedsman grand prize bicycle was Lance Welling, 3962 Keokuk, St. Louis 16, Mo. He is pictured above with the bike he won. Lance set a new all-time record, selling 300 collections of Junior Seedsman seeds, and is to be commended for doing a sellor of the commended for the commended for doing a sellor of the commended for the commended for doing a sellor of the commended for doing a sellor of the commended for th splendid job.

Sensational Offer of New Red Bearded Pink Iris Seedlings

The red bearded Pink Iris seedlings in this offer are sister seedlings of Mr. Chester Tompkins' beautiful "Apricot Supreme" Iris, which was awarded a certificate of high commendation by the Amer-

high commendation by the American Iris Society.

These sister seedlings are all fine, large flowers. Some are light pink, some are dark pink, some come in apricot shades, others in orchid-pink shades. All have the bright red beards common to this new strain. Among these seedlings are crosses involving all the fine new pinks from Hall, Loomis, Sass, etc., that are worth many times more than the price we are asking for the plants.

We really should not sell these Iris so cheaply, as, in our opinion,

We really should not sell these Iris so cheaply, as, in our opinion, they are actually more beautiful than any pink variety in our fields, regardless of price. Many of the plants are good enough to name, but Mr. Tompkins does not want too many varieties of a similar nature. He prefers that we offer these to you He prefers that we offer these to you at a low price that will move them. We absolutely guarantee that you will get your money's 'worth . . . and more! See page 35 of this catalog for a picture of one of these lovely Iris in full color.

No. B3069X—Red Bearded Pink Iris Seedlings from "Apricot Supreme." Collection of 3 for only \$1.98 postpaid.

\$1.98, postpaid.

Indoor or Outdoor **Thermometer**

Need a good, accurate thermometer? Well, we have one and it's really a dandy. It may be used indoors or outdoors. One of its nicest features is that due to its patented magnifying plastic lens,

magnifying plasticlens, it may be read through a window from many feet away. It combines the reading ease of dial thermometers with the durability and accuracy of the tube type.

Its crystal clear styrene plastic lens is 7½" x 1½". Has a 6" red fluid tube that gives readings from 70 degrees below to 120 degrees above zero. Comes complete with a heavy aluminum bracket for window mounting. Or, bracket may be left off and the thermometer hung on a wall or post.

on a wall or post.

No. 4032 — Indoor or Outdoor
Thermometer. Only \$1.00, postpaid.

New, Better Way of Packaging Strawberry **Plants**

This is a picture of the new way we are packaging plants for ship-ping. We are taking advan-tage of the marvelous new plas-tic "polythene" a new plastic film which allows gases to pass back and forth but retains

(20) (H)

與命授 8 24年年

moisture. We merel: put a bundle of

25 strawberry plants in a polythene 25 strawberry plants in a polythene sack, then tie the sack around the top of the bundle. No other packing material is used. By using this material and method, the roots retain their moisture and the plants can be shipped for thousands of miles without drying or heating. The plants will reach you in just as good a condition as they were in when we sent them.

We are working on this method

We are working on this method of packaging for other items, and hope soon to be able to send out all nursery stock orders in this same plastic film.

Henry Field Seed & Nursery Co., "MIDWEST'S LEADING SEEDHOUSE," Shenandoah, Iowa

Glen Vauthrin, Melbourne, Ia., Wins H.F. Rose Trophy

Above are pictures of Mr. Glen Vauthrin, Melbourne, Iowa, and the Henry Field Floribunda Rose Trophy. Mr. Vauthrin won the tro-phy at the Iowa Rose Society's Rose Show, held in Des Moines, June 14,

During the past few years we here Henry Field's have been of the at Henry Field's have been of the opinion that more encouragement should be given to the growing of the lovely Floribunda roses—which we think are the "coming" roses. (In the past, most rose shows have usually given awards only to the usually given awards only to the Hybrid Tea roses.)

Hybrid Tea roses.)
So last year, to stimulate interest in Floribundas, we decided to provide a trophy to be awarded annually by the judges of the Iowa Rose Society's Rose Show to the person having, in the opinion of the judges, the best Floribunda rose in the show.

the show.

Mr. Vauthrin's entry took first place in the 1953 show and he became the first recipient of the tro-

If a person wins the trophy three If a person wins the trophy three times in succession, he becomes its permanent owner, and a new trophy will be presented to the winner the following year. The beautiful trophy is gold-plated, 20 inches in height, and will have the names of the winners engraved on it.

The contest is open to members of the Iowa Rose Society. Anyone wishing to enter next year's show should write directly to the Iowa Rose Society, State House, Des Moines, Iowa.

Moines, Iowa,

Ataturk—the Black Glad

If you like deep, heavy colors in Gladiolus, ors in Gladiolus, this is a variety you should have. It's about as black as a flower can be. We imported it from Holland Holland.

The spikes are medium-long in size, with six to eight flowers open at a time.
The flowers are three to four inches in diameter. Its color is a glisten-

The flowers are three to four inches in diameter. Its color is a glistening, velvety black with faint brownish shadings. Rest assured your neighbors will stop and want to know all about it.

No. BG202—Ataturk Gladiolus.
Big, blooming-size bulbs. 35c each;

3 for \$1.00, postpaid.

All our nursery stock is state inspected.

Onions Average 1 Lb. Each

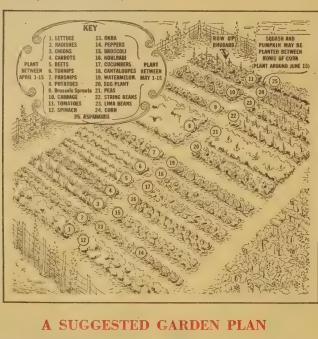

The above picture was sent in to us by Mr. Henry C. Schultz, Rt. 1, Worth, Ill. Mr. Schultz said these were just a few of the fine onions he grew last summer. The biggest one weighed 2½ pounds, with most of them averaging 1 pound or more.

HENRY FIELD'S

Garden Planting Tips

BE SURE TO SAVE

These two pages may help you when you order your seed, and plant your garden, in the spring. They also may help answer some questions during the growing season. But if you have more questions, now or later, please write us. We always like to hear from you.

A SUGGESTED GARDEN PLAN

LOCATION OF GARDEN. The kitchen garden should be located close to the house. This gives protection against animals and thieves (makes it a lot handier too if you have a few odd moments to spend in it). The main or big garden should be so located and planned that it can be cultivated with regular farm tools. It saves a lot of weeding.

SOILS AND SHADE. Don't make your garden in the shade of big trees or in soils full of tree roots if you can avoid it. Most garden crops like sunshine and all of them appreciate and respond to good soil. Stony land and poorly drained soil are not the best.

FITTING THE SOIL. Plow or spade deeply in the fall, especially where there is sod to be turned under. Do a good job. Leave the land rough to hold snow and moisture. Harrow or rake thoroughly before planting. Good preparation will save a lot of cultivation.

SIZE OF GARDEN. There is only one rule we would give and that is to "Plant Plenty." What you do not need for the day to day table needs, can or freeze.

General Tips

Before plowing, burn the rubbish and dead vegetable vines, as they may

Apply a good coating of manure if you can get it. Tree leaves are also fine. Some gardeners say cover the seed four times its greatest diameter.

Seed can be planted deeper on loose mellow soil than it can on y or gumbo.

The same seed should be planted deeper late in the season when e soil is warm and more likely to dry out.

After planting very small seed, especially among the flowers, wer with a mulch to hold the moisture near the surface until e seed sprouts.

Plant some for the worm, some for the crow, some to pull out and some to grow.

Plant abundantly. Enough for yourself and some to spare.

Save This Chart—It Will Prove Helpful

Bush Beans

Inoculate with "Nitragin" and then plant when the ground is warm in rows 24 to 36 inches apart, covering the seed 2 inches deep.

Thin later to 4 to 5 inches in the row. One pound will plant about 100 feet of row.

Rows three feet or more apart if tended with a garden tractor.

Plants may stand as close as two inches apart to ras far as six inches apart.

Do not cultivate when plants are wet with dew or rain.

Do not cultivate when plants are wet with dew or rain.

Above directions suitable for small Limas. Navy beans should be planted late, say June 20th, so they will be too late for the bean wevel. Late plantings will also cause practically the entire crop to mature at one time.

Use 20 to 30 pounds of seed to the acre. Space rows a convenient distance apart to cultivate.

For small crop pull and of the control of the control of the control of the cultivate.

For small crop pull and pile to dry, then thresh with a flail.

Large Bush Limas

All Limas require rich soil. Do not plant
until ground is thoroughly warm. Wait until
after corn planting time.

If you have the time plant the seed on
edge eye down. Cover two inches deep.
One pound of seed to 100 feet of row.
Rows not closer than 18 inches or 2 feet
apart. Thin to ten or twelve inches apart
in row. They do better if inoculated with
"Nitragin" before planting.
Can a few for winter use while they are
green.

Pole Beans

Pole Beans
Inoculate with "Nitragin" and then plant when soil is warm in nills 3 to 4 feet each way, covering seed 2 inches deep, "A pound of seed to 75 library leads to 5 library leads to 5 library leads to 5 library leads to 10 library

Table Beets
See Chart. Beets have best flavor when about half grown,
Make several plantings for the season's supply. Last planting about July first.
Use the plants thinned out for greens or transplant some of them. Store after frost, in a pit, cellar or cave where they will keep cool and moist enough to prevent drying out.
Use the tender half grown beets for canning.

Mangel Beets-See Chart

The best crops are from early planting. After frost pull and pile in field until cold

weather.

Cover temporarily so sun will not dry them out and so they will not freeze.

Store in cave or pit where there is enough moisture to prevent shriveling. Hold temperature as near freezing as possible and provide ventilation.

Carrots—See Chart

Seed sometimes slow to sprout so be patient. Cover the seed shallow and plant thick.

Store in a pit, cave or cellar where they will keep cool and moist enough to prevent shriveling up.

Some pack in dirt or sand and moisten occasionally.

Some pack in drt or sand and moisten occasionally.

Celery—See Chart

Start early either in the house or hot bed or in the field later on.
Celery seed sprouts slowly.
Gover shallow and keep surface soil moist in the field between the control of t

Early Cabbage and Cauliflower

deep.
Cauliflower will not head during hot dry
summer weather so must be started early.
Real early or real late plantings will not
be troubled with worms very much.

Late Cabbage—See Chart

Late Cabbage—See Chart
Plant in cold frame figuring 2500 plants
to an ounce of seed, or drop in hills 3 x 3
feet or drill where plants are to stand at the
rate of 1 pound to the acre.
To mature late crop, figure 120 to 150
days from seed. Most folks plant their late
cabbage too early.
It saves a lot of hard labor and you are
surer of getting a stand if seed is planted
in field where crop is to be grown.

chinese or Celery Cabbage

Sow outdoors the very earliest possible in the spring, or for a fall crop, sow after midsummer. In many places in the middle west, the fall crop does better than the early one. Make your rows 18 to 24 inches apart, and thin the plants when they are 4 to 6 inches high, so they are 8 to 12 inches apart in the row. These plants quickly run to seed in warm weather without making any heads, so be sure to get them out early. Use raw for salad, or boil. Store in moist, cool quarters.

Cucumbers—See Chart

Plant when ground is warm in hills 3 x 6 feet covering seed 1 inch deep. Drop about a dozen seeds to the hill and thin later when bugs are gone to 2 plants in hill. Figure 100 hills to the ounce or 35 to the packet of seed. Bell the plants resist the attacks of insects and disease by planting on rich soil. Use planty of Bug Dust.

Egg Plant—See Chart

Figure 1500 plants from an ounce of seed and 150 from a packet. Seed slow to sprout. Do not plant too early. Egg plant should be the last spring crop planted in the garden.

Lettuce—See Chart

Thin to 12 inches for the head varieties and 6 inches for others.

It can be planted in the fall just before freezing weather and it will come up very early in the spring or started in the hot bed and transplanted to the field later.

Loose leaf lettuce is easiest grown. All lettuce does better on rich soil especially head lettuce.

Lettuce is a gool weather plant.

Lettuce is a cool weather plant and is crisp and tender early in the season.

Mushroom Growing

For best results, temperatures should range from 50 to 60 degrees Fahrenheit. A cave or cellar 5 to 6 feet deep with the root and the room of the room

Muskmelons-See Chart

Muskmelons—See Chart

Plant when ground is warm in hills 3 x 6
feet, covering seed one inch deep and thin
later when the bugs are gone to one plant
every three feets 6 x 6 feet and thin later to
two plants to the hill. Figure 85 hills to
ounce or 30 hills to the packet of seed.

Look on the underside of the
leaves, about time they begin to
vine, for lice. Dust or spray
with Bug Dust.

Muskmelons are ready to pull
when a crack appears around
the stem.

The melons are best if gathered early in the morning while
cool.

Onions-See Chart

Onions do most of their growing before hot weather, so get them in early.
When onions are as large as a straw, thin and weed.
When tops fall down

when contons are as large as a straw, thin and weed.

When tops fall down, pull and throw in windrows and allow to cure two or three days.

Store temporarily in shallow piles or slatted crates under cover.

If not harvested until a wet spell of weather it causes second growth and they will not keep well.

Use sets to grow bunch onions from, as many will not make a large bulb but will go to seed.

ONION PLANTE.

go to seed.

ONION PLANTS—The plants should be transplanted as early as possible. A light freeze will not hurt them.

Space the rows any convenient distance.

BERMUDA ONIONS—Follow the same general directions as given for onion plants. Pull and use right away, as they won't keep like the native varieties. However, they will keep until about the first of the year.

Parsnips—See Chart

Plant early in rows 15 inches apart, covering the seed from one-half to three-fourths of an inch deep.

Thin later to 4 or 5 inches in the row. The ounce will drill 200 feet, one packet, 50

Thin later to 4 or 5 inches in the rowone ounce will drill 200 feet, one packet, 50
feet.

Parsnip seed sprouts better earlier in the
season when the soil is cool and moist.

Sprouts, slow.

To mark the row so that you can cultivate before the plants are up, scatter a few
radish seeds along the parsnip seed.

The radish will come up first, and when
they are large enough, pull and use
Store in a shallow pit where they will
freeze, for freezing improves the flavor.

Or you can leave theory the ground,
where they grew, until spring.

Peanuts

Plant when the ground is warm in rows not closer than 2 feet apart. Drop two kernels every 12 inches in the row.
Shell before planting. It is best not to break the brown skin covering the nut.
Cultivate same as for beans. Do not cover the bloom. Keep soil loose and mellow. They will bury themselves. Harvest after frost and thoroughly dry before storing.

Harvesting Peanuts

Dig your peanuts after frost kills the tops. as spading fork is about as good a tool as

Dig your peanuts after frost kills the tops. The spading fork is about as good a tool as anything.

Just dig the whole clump up, shake the soil out of the roots, pile them up around a pole in the garden, or in the cornerly, or some other well ventilated place and allow them to dry and cure. After two or three weeks you can pull the nuts off the roots. These should be cleaned up and dried and cured still more. Two or three weeks more is usually enough and then they are ready for roasting.

Small quantities may be roasted in a baking pan in the oven. Try some now and then, and you will soon recognize when they have been roasted just right to suit you.

Peas—See Chart

One pound of seed should drill 100 feet

One pound of seed should drill 100 feet of row.

To get that delicious flavor, use peas within two or three hours of the time they are picked.

You should plant both smooth seeded for a seed of the seed of the

Peppers

Plant early in the house or hot-bed and transplant to field when ground is

warm.

Give each plant not less than 1 inch space in the hot-bed, rows 4 inches

They like rich soil and warm growing weather.

Irish Potatoes

Seed stock should be cut, so that each piece will have two or three eyes. Seed pieces about 1" to 1½" square are best. The pieces are planted 4 inches deep and 12 to 14 inches apart in rows 3 to 3½ feet apart. Spring planting is made as soon as danger of heavy frost is over and late plantings should be made any time from the last of June to August 15th. Good cultivation is important. After digging the potatoes do not allow them to remain in the open sun. Store in a dry, well ventilated, cool place.

Sweet Potatoes

Sweet Potatoes

Sweet potatoes can be started in hot beds about six weeks before time to set out. Good, sound sweet potatoes should be placed in a bed as close as possible without touching and covered with about two inches of clean sand. Plants are then set on low ridges about 14 to 16 inches apart in rows 3 feet apart. Set out in the garden after all danger of frost is past. Harvest the crop right after the first frost. Allow potatoes to dry out in the sun for four or five hours. Be careful not to bruise. Store in a dry, warm, well ventilated storage place.

Radish—See Chart

Plant often so that you can always have them crisp and tender.

Use them fresh from the garden before they become tough and woody.

Plant the long varieties for late spring and summer use.

Plant the winter varieties in late July when you plant late turnips and thin to at least six inches in the row.

Salsify— See Chart

Spinach

Plant early in rows 14 inches apart, covering the seed from three-fourth to one inch deep.

Thin later to about 3 or 4 inches in the row. One ounce will drill 100 feet; one packet, 25 feet.

Plant as early as possible, for it is most appreciated early in the season.

Spinach can be planted in late summer and carried over winter by mulching same as for strawberries.

Squash—See Chart

For large seeded squash figure 25 hills to the ounce of seed and for small seed 50 hills to the ounce. Summer Squashes are delicious if used before they are a third or half grown. Combat squash bugs by dusting with Bug Dust.

Spaghetti Squash

Spaghetti squash is ready to use when the shell gets so hard you can't dent it with your thumb nail. Some like to bake the squashes whole, just as they come from the garden, and 45 minutes in a good hot oven is usually about right to do the job well. After baking, break the squash open, remove the seeds, the fleshy part comes out very easily, butter it liberally and season to taste. You have a real treat in store.

We have been told that the spaghetti squash may also be cooked—in other words, just drop the squash in a kettle of water and give a good thorough boiling.

ing.
Let'us hear how you like our spaghetti squash.

Sweet Corn—See Chart

Make an early planting and in a week or ten days another between the rows of that first planting.

For succession, plant an early, an intermediate and a late variety at the same time. Or make several plantings of your favorite variety, or plant our special blend which ripens in succession.

Be sure not to plant sweet corn close, or you will have only fodder and no ears to eat.

To prevent ear worms, dust the silks with Henry Field's Bus Dust.

To prevent ear worms, dust the silks with Henry Field's Bug Dust. Give first dusting when silks are an inch long (before worms appear).

Free Booklet on Freezing Fruits and Vegetables

Write the U. S. Department of Agriculture, Office of Information, Washington 25, D. C., for their new Farmer's Eulletin IS48, "Home Freezing of Fruits and Vegetables." It's free for the asking and a good one too, Just write directly to the U. S. Dept. of Agriculture.

Watermelons—See Chart

Drop 6 seeds to the hill and thin later when bugs are gone to 2 plants to hill. Figure 50 hills to the ounce of seed.

If you want extra big melons, keep all but two or three on the vine picked off as fast as they appear.

If you plant in hills, make them not closer than 8 x 10 feet and as far apart as 12 x 12 feet, or even farther, sometimes.

At this distance some growers allow only one plant to the hill.

A dull green color indicates a ripe melon and a bright green color an unripe melon.

About Canning

About Canning

Space is too limited to give you all the information you would want about canning, but you can easily get full and very excellent directions by writing to the Eureau of Home Economics, Dept. of Agriculture, Washington, D. C. Other detailed instructions may be obtained by writing to the Kerr Glass Mfg. Corp., 2913 Main St., Sand Springs, Okla. They put out excellent books on canning which cost you only 15c.

By all means, everyone should can plenty of vegetables, and fruit this year. Be sure you have plenty to eat by GROWING YOUR OWN and CANNING YOUR OWN.

About Inoculation

4 qt.

We get hundreds of letters each year asking whether inoculating garden seed with "Nitragin" pays. The answer is, YES, DECIDEDLY, YES. It is only of value on garden peas, beans and Sweet Peas, but on these it makes a world of difference in the vigor of the plant and the amount of yield. We sell many thousands of packets each year. A 15c pkt. is enough for the average gardener as 1 pkt. treats 5 lb. of seed. Easy to apply. Full directions on the package.

Another big aid to improving crops is the new Hormone-Vitamin concentrate "GROW-AID," which stimulates quick root growth and makes for quicker and heavier crops on all garden seeds, flower seeds and nursery stock. It is relatively new, but works wonders wherever used. Try it this year and make your garden EXTRA high-yielding.

Tomato—See Chart

Sow seed eight to ten weeks before setting in the field.

Any of the early bunch vegetables can be grown between the tomato rows.

Drive three stakes around a tomato plant and fasten a barrel hoop to them and allow the plant to grow up through. This will act as a support.

PRUNING: Tomato vines are trained to a single stem, or two stems. You can pinch out the terminal bud when the plants reach the height of about 5 ft. The vines should be gone over each week and any new shoots starting out from the main stem should be pinched off. Do not pinch off the blossom stem. If you are in doubt, allow this bud to remain until the next week.

Crop Features to Utilize

Crops Occupying the Ground All of the

Crop Features to Utilize

Crops Occupying the Ground All of the Growing Season: Beans (Pole, Snap), Beans (Pole, Lima), Chard (Swiss), Cucumbers, Eggplant, Muskmelon, Okra, Onions, Parsley, Parsnip, Peppers, Sweet Potatoes, Irish Late Potatoes, Pumpkins, Salisfy, Squash. (Winter), Spinach (New Zealand), Tomatoes, Watermelons.

Crops Occupying Ground Part of Season and May Be Followed by Others: Beans (Bush), Beets, Cabbage, Cabbage (Chinese), Carrots, Corn, Kale, Kohlrabi, Lettuce, Mustard, Onions (Green), Peas, Potatoes (Early), Spinach, Turnip (Spring), Rutabaga (Spring).

Crops Which May Follow Others: Beans (Bush), Beets, Cabbage, Carrots, Corn, Celery, Lettuce, Mustard, Late Potatoes, Rutabaga (Fall), Spinach, Turnips (Fall),

Crops Which May Be Utilized in Interplanting: (Early, quick-maturing, narrow-spaced) Beans (Bush), Beets (Early), Radish, Spinach. (Later, slower-growing, wider-spaced) Broccoli, Brussels Sprout, Corn, Cucumber, Muskmelons, Cabbage, Pumpkins, Spinach (New Zealand), Tomatoes, Squash, Watermelons.

Crops Which May Be Planted Together in the Same Row: (Quick-germinating and maturing) Lettuce (Leaf), Mustard Radish, Spinach. (Slower-germinating and maturing) Beets, Chard, Carrots, Leek, Spinach (New Zealand), Parsley, Parsnips, Salisfy, Onions (Seed).

Crop Succession

Plant radish seed very thin and follow Plant radish seed very thin and follow at once with parsnip, carrot, parsley, asparagus, onion or leek right in the same row. Pull the radish and use when it is large enough. Plant Beets, Kohlrabi, Lettuce, Mus-tard, Spinach, Onion Sets, Radishes, early Beans or Peas, between rows of late Cabbage, Melons, Squash or Toma-toes.

Plant Radishes very early, followed by early Cabbage plants set every two feet in the row. After the cabbage is off, sow late turnips or Chinese Cabbage.

Plant two rows of Potatoes between each two Watermelon rows and dig potatoes after the Melons are gone.

Follow early Peas and Beans with late Cabbage.
Celery may follow early Peas, Beans, Lettuce, Radish or Spinach.
Plant late turnips in vacant spaces about the garden.

Bug Dust

Since gardening began, insects have waged war on gardens. Today's gardener has a powerful weapon against bugs in the form of Bug Dust.
You really won't believe how well our BUG DUST works until you see it work yourself. Some folks call it a "Miracle Dust."

BUG DUST works until you see it work yourself. Some folks call it a "Miracle Dust."

BUG DUST works three ways. It not only is a STOMACH POISON, but a CONTACT POISON and FUNGICIDE—ALL IN ONE DUST.

No need to buy three dusts—use our "BUG DUST."

Henry Field's BUG DUST is safe. Does not harm even the most delicate plants when used as directed. Absolutely leaves no poisonous residue.

Dust plants early before heavy infestation appears. Dust both top and bottom of leaves. Redust once a week until controlled and after any heavy rain. For cutworms, mix Bug Dust with soil at base of plants. Bug Dust can be used as a spray by diluting 6 teaspoonful in gallon of water. Dust animals and poultry to rid them of fleas and lice.

Starting Plants in the House

Starting Plants in the House

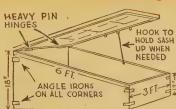

A hot bed is the best place to start plants if you are willing to go to the trouble to make a good one. However, a box of good dirt placed in a south window of the house where it will get as much sunshine as possible and in a room where the temperature does not vary much is good.

If the soil you use does not already contain a large percent of humus, use about 50 percent well rotted manure. This amount is only suggestive, as there is a wide difference in different samples of dirt. What we mean by "Well rotted manure" is manure that could almost be classed as dirt. Don't use fresh manure. Cover all small seeds about one-half inch deep. Make the rows 3 to 4 inches apart. Keep the surface soil moist until the plants are up or you may have trouble in getting a stand.

Hot Bed

If you wish to make a hot bed, send for free instruction sheet.

Building a Cold Frame

If you don't want to go to the trouble of making a hot bed or haven't enough good manure on hand to build one, you can do very well with a cold frame. A cold frame is built same as you build

the frame for a hot bed. It should be about eighteen inches high at the back side and twelve inches at the front. Place it in a sheltered sunshiny situation and back around so that the wind will not get in. Cover with glass or Glass

Plant seed in a cold frame a week or so later than you would in a hot bed. You can grow all hardy vegetables, such as cabbage, cauliflower, beets, lettuce, radish, onlons, and kohlrabi.

Beets, lettuce and onions transplant as easily as cabbage. And you can advance radishes a couple of weeks by planting them in this cold frame. Of course, the soil should be rich and mellow.

Winter Storage of Vegetables

Surplus garden vegetables can be stored in an unheated garage, storage house or shed for a month or so depending on how low the temperatures fall.

Store only those vegetables which are in good condition. Dig beets, potatoes, turnips, carrots and rutabagas as late as possible before the ground begins to freeze and cut the tops off. Do not clean the dirt from them, but place in boxes and pack in sand, loam and sawdust. The temperature should be between 35 and 40 degrees.

and 40 degrees.

The vegetables can also be stored in a basement, in which the temperatures can be kept down and ventilation provided, on racks, shelves, slat bins or boxes, raised off the floor. A concrete floor should be sprinkled every few days and a dirt floor kept somewhat damp.

Pumpkins, squash and sweet potatoes should be stored at temperatures between 55 and 65.

When storage is required for a longer

When storage is required for a longer When storage is required for a longer period, an outdoor storage pit may be made by digging a pit the desired size and deep enough to stand in. The vegetables may be stored in boxes, bins or shelves. Lay heavy boards over the pit even with the surface and cover with a mound of earth. A ditch should be dug around the mound to lead surface water away. A door should be fitted to the en-trance, preferably two doors with an air space between them to keep out the

When the quantity to be stored does not require a very large pit, vegetables may be laid in a box, which is lined and covered with straw, set in a small pit covered with earth. Or a barrel may be used, or a conical mound may be made, to cover vegetables piled up like a pyra

Do not close outdoor root cellars tightly until the temperature inside has dropped close to freezing, and do not cover earth pits until the soil has cooled off thoroughly.

Rugged, rubber covered basketball with pebble grain finish. Gives durable service on any playing surface. Waterprof. Complete with inflating needle. Retails for 5.95. Yours for selling 12 collections plus 75c cash.

All Henry Field Chicks U.S. APPROVED

APPROVED

This label, at left, which Henry Field chicks have earned, means something! It

means something! It means we have met ALL the requirements of the National Poultry Improvement Plan sponsored by the U.S. Dept. of Agriculture for this status. It means on flock selection to the property of of Agriculture for this status. It means our flock selection, testing, and hatchery management are under the NPIP supervision and HAVE to be EXACTLY what we say. All birds in our flocks must pass their high culling standards and all must be less banded with official must pass their high culling standards and all must be leg banded with official bands. The standards are strict. We're proud Field's chicks meet them all.

All Henry Field Chicks U. S. PULLORUM PASSED

Pullorum Passed hatchery, which entitles us to use label pictured above. This means all birds in our breeding flocks have been culled and blood tested by only licensed men. You can count on healthy chicks when you order from Henry Field's.

-IT'S COMMON SENSE

Every year over HALF A MILLION PEOPLE from all over the world send to Henry Field's for the seeds they need.

They send to Field's for seed, some from thousands of miles away, because they know they can TRUST it. After preparing ground, planting, and cultivating, they want to KNOW their crop will be TRUE-TO-NAME, and of HIGH QUALITY. For over 60 years, they have found they can RELY on Henry Field's.

Baby chicks are NO DIFFERENT. They are the "seed" of high profit flocks. Like good seed, they must be bought from a reliable source you can TRUST—a source with the facilities to give you the best in breeding, the best in health. That's why smart flock owners by the thousands refuse to take local "bargain" and "surplus" chicks and insist on getting chicks they can TRUST direct from Henry Field's.

You Get These PROFIT-MAKING EXTRAS By Buying

HENRY FIELD

- Outstanding Blood Lines of the Country Bred into Field's Chicks Annually.

Field's Chicks Are Guaranteed Chicks

We guarantee our prices to be as low or lower than others, quality considered. We guarantee 100% live arrival on the number of chicks ordered. Count the live ones on arrival Count the live ones on arrival and if you do not receive the full number of chicks, report to us within 24 hours and have your delivery agent make a notation to be sent along with your report. These chicks will be replaced FREE. We reserve right to ship Straight-Run on Cockerel orders if necessary—an "extra" Henry Field value.

PULLET GUARANTEE

We guarantee 95% true to sex on pullet chicks. Any sex complaints must be made within 60 days from the date the chicks are received. If there are too many cockerels among your pullets, we will make a prompt adjustment. In no case are we liable for more than the original purchase price of the baby chicks

Says Chieks 100% in Every Way

"The baby chicks I got from you last year were 100% in every way. All were alive on arrival. I didn't lose a one and had 2½ lb. fryers at 7½ weeks. The pullets started laying at five months old."—Mrs. Earl Litz,

"I Am Sure Proud of Them"

"I am writing to tell you about my "I am writing to tell you about my chickens. I have one of the nicest flocks I ever had. I only lost three of them. They are going to be four months old tomorrow, and they weigh from 3½ to 4 lbs. We sure are having some wonderful fryers, and I am sure proud of them. Think I have around 90 pullets."—Mrs. Albert Vanholt, Clayton, Ill.

Chicks Have Done Well

"Our chickens we received from you on March 3 have done well. We are proud of them. They began laying at 4½ months. Wishing you good luck in your work."—Mrs. W. M. Coplin, Longview, Texas.

13 and 14 Eggs a Day frem 14 Hens

"Received my Baby Chicks in good "Received my Baby Chicks in good condition; no dead ones and I am well pleased with them. They all eat and drink hearty. This makes the third year I have ordered from you. Last year I got white Leghorns. I have 14 hens. I get from 13 to 14 eggs a day. Good, don't you think so? I am getting up in years, not able to do much, but always like a few chickens to fool with. Thank you again."—Mrs. Jennette Bethards, 613 Main St., Plattsmouth, Nebr.

Good Service for 30 Years

"The Hampshire pullets, 196 of them, are laying about 115 eggs a day. We think this is good for April 1st pullets. The flowers I bought last fall all lived and this order is to finish my bed, so I've something blooming all the time. Thank you so much for the good service I've had for 30 years."—Mrs. Ray Robinson, Paris, Mo., Route 3.

Field's FAMOUS BREEDS NEW HAMPSHIRE "Leghorn of the Heavy Breeds" Henry Field's New Hampshires can almost be called the Leghorn of the heavy breed for they are very heavy egg producers and, combined with their heavy weight, they are hard to beat. They are noted for fast maturing, rapid feathering and have the vigor and hardiness of the White Leghorn and they have replaced the Leghorns on many farms, due to the size and rapid growth. Remember, large brown eggs bring top-market prices. WHITE LEGHORNS "The LARGE Type" High Egg Production . . . Need Less Feed, Less Room VERY PROFITABLE

For many years the White Leghorns have been recognized as the heaviest producers of white eggs. They

Breed"

Famous for Meat Quality FAST MATURING Henry Field's Giant Type White Plymouth Rocks have a beauti-

High Egg Production .

require less feed and less room per bird than almost any other breed. Field's Leghorns are noted for be-

any other breed. Field's Leghorns are noted for being the large type (not beefy), full of vigor and are great rustlers. They come from the finest breeding flocks in this part of the country and have been rigidly culled to insure you the kind of Leghorns that will make you the most money.

ful snow-white plumage and are very fast maturing and rapid feathering. They will dress out at almost any age, yellow-colored and free from pin feathers, which makes them exceptionally fine broil-

ers. The White Rocks are one of the most popular all-purpose breeds because of their meat qualities,

and egg-laying ability

ORDER EA

NEW HAMPSHIRE

You help us and you help yourself if you get your order in early. It helps us plan our hatching, and we want to pass this savings on to you:

If we receive your chick order by February 15, you can deduct 50c per 100 Chicks . . . regardless of delivery date!

If you will take February delivery you may deduct \$1.00 per 100 Chicks!

WHERE WE SHIP TO:-

If you live anywhere east of the Rocky Mountains, we will get Henry Field Baby Chicks (except Topcross Hybrids) to you in first class condition. Our hatchery is as close to you as your nearest mailbox.

WHITE WYANDOTTES Early to Market

Henry Field's deep breasted White Wyandottes are the first to go to market. They make extend the first to go to market. They make extend the first to go to market. They make extend the first to go to a be got to the first to go to go

Good Winter Layers

Henry Field's Giant Buff Or pinstons are exceptionally good winter layers due to their massive bodies and heavy plumage. These winter eggs come when the market is usually the high est. Our Buff Orpingtons awould be a supported by the support of t

BLACK AUSTRALORPS Famous for Size

We crossed the rooster of this breed with Field's fa-mous large type White Leg-horn hens to produce our Austra-White crosses.

Austra-White crosses.

The Black Australorps is famous for its massive size, early body maturity and great egg laying ability. They are good rustlers and the black plumage means good insurance against loss from foxes and hawks.

If you try them once you are convinced for good.

Barred PLYMOUTH ROCKS Dual-Purpose Chicken

Henry Field's Barred Plymouth Rocks have proven their money making ability their money making ability on many farms. They are large in size, fast maturing, rapid feathering and make exceptionally fine broilers or heavy roasters and are also good producers of large brown eggs. They are one of the oldest of the All-Purpose breeds and have proved very

PRODUCTION REDS

Famous PARMENTER Strain

The records made by these high-production Reds have been so outstanding that we have added Production Reds to our hatches to try to take care of our customers' demands. This is the famous Parmenter strain-mak-

ing records everywhere for high production, and early maturing (start laying at 41/2 to 5 mo.). Almost no broodiness in Production Red Hens. Eggs large and deep brown. Cockerels fine for broilers-yellow skin, plump bodies, very hardy and quick maturing.

AUSTRA-WHITE

The Austra-White cross is the most pular cross for people wanting the tops meat and seg production. By breed-so was a substratory males to Leghorn hers by the substratory of the substratory matures by the substratory of vigor but also matures lickly. The laying flock can be kept on as feed than some other varieties, and

FIELD'S THREE FAMOUS CROSSES

HAMP-LEGHORN CROSS

By mating the New Hampshire cock-erel (the best layer of heavy breeds) and the White Leghorn Hen (the best layer of the light breeds), this outstanding HAMP-LEG cross naturally gives out-standing egg production. IN ADDI-TION, they are top choice for broilers being yellow skin and maturing fast with less feed. One of the best.

LEG ROCK CROSS

FIELD'S NEW HEAVY-PRODUCING

These Profit Factors Are BUILT-IN Field's Topcross Hybrids*

- 1. First eggs about 41/2 months.
- Full production about 6 months.
- 3. Lay top production for 12 to 14 months.
- 4. Lay straight through summer and winter.
- 5. Cockerels 2½ to 3 lbs. in 10 weeks.
- 6. Big 24 to 26 oz. per doz. eggs. Uniform.
- From 7% to 30% higher egg production. (Remember 1 Extra egg per month pays for bird.)

Result is Field's Topcross Hy brid* with the good points of all 7% to 30% and up more eggs and more weight per pound of feed.

7% to 30% More Eggs-More Profit

Official tests in S. Dak. and Nebr. show Topcross Hybrids* percent of "Hen Day Production" from 7% to 30%, GREATER than random bred or pure bred hens! This greater egg production means MORE PROFIT FOR YOU. Only 1 Extra egg per mo. pays for bird. Inbred over many years are crossed with our famous laying strain of outbred New Hampshires to produce this amazing Topcross

As production is limited, we can ship Field's Topeross Hybrids* only to Iowa, Mo., Nebr., and Kansas in 1954.

Field's Topeross Hybrids are produced by crossing inbred line cross White Leghorn males and Out-Bred New Hampshire females.

ABOUT THE SHIPPING DATE

After we've booked your chick order, we always send an acknowledgment card which serves as your receipt. This card also gives you complete information about your order, including an approximate shipping date. This date does not mean that you will necessarily receive your chicks at that exact time. It does mean that your chicks will be shipped to you sometime that week. Please remember that orders reaching us first are the first to be shipped.

PRICES GUARANTEED AGAINST DECLINE

These prices are guaranteed. If prices go up, you get your chicks ordered before the price raise at this low price. If prices go down, you get the new lowest price. You can't lose by ordering now and you get your chicks when you want them.

PLEASE GIVE 2ND CHOICE

Unless you prefer just one breed of chickens and can't use any other variety, please give second or third choice so if we can ship second choice nearer the date you want chickens, we will do so and thus give you more prompt shipment. We will always ship 1st choice if possible to do.so.

ONLY \$1.00 DEPOSIT

for each 100 chicks wanted, will hold your order for any delivery date you wish. Balance is due 10 days before shipment or we ship C.O.D. for balance.

C.O.D. PLAN

Send \$1.00 for each 100 chicks or any amount less than 100. Pay balance on delivery plus transportation charges. If you want chicks shipped crder.

FEB. 17

JUST LOOK AT OUR LOW PRICES.

You Can Save 51 to 54 per 100 on Field Chicks

In each order of chicks you get from Field's (ordered before March 15), we send you a special gift for the women folks. Not that the whole family won't enjoy it, but it's for the ladies of the house primarily. of the house primarily.

It is a special collection of our favorite gladiolus—some blue, some red, some orange, and some of those lovely "smokies." A full dozen and all big blooming size bulbs.

all big blooming size bulbs.

All we ask in return is that you order your chicks before March 15. Even if it's for later shipment, in April or May, we'll still send you the free gift—just so you send in your order before March 15. That helps us plan our hatches.

Buy the Best! Good Chicks Cost You No More to Raise!

NURSERY PLANTING TIPS

Fruit Trees

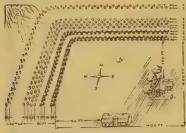

Should be set as indicated in the "5 Easy steps in Planting." Also see Planting Chart on Page 18. Set Apples 30 to 40 feet apart and Peach, Apricot, Cherries, Plum and Peach, L5 to 20 feet apart. Some folks prefer to lant Apples 40 feet apart and set smaller rees such as Peach, Plum and Cherry in as tiller trees. Small fruits, asparagus, and hubarb may be planted in the orchard to rive you immediate revenue.

Shade Trees

Shade Trees

Plant the same as fruit trees. Be sure the is tramped in firmly about the roots, and t there are no air pockets left. Give pienty space between trees. Large growers—in the property of the prope

Windbreaks

mething green and cooling right at hand r both man and animal r both man and animal. Here's a quick, easy way to plant windeak trees. First take a walking plow, row out a deep furrow along the row of the set to be planted. (Plow fast enough so to throw dirt well out of furrow.) Second, it each individual tree against the straight ge of the furrow, then throw the loose rt in over the roots. Pack firmly with the et. CUT ALL SEEDLINGS OR TREES ACK TO LESS THAN HALF THEIR EIGHT AS SOON AS PLANTED (except vergreens, which require no pruning). Use a cultivator plenty the first two summers. Plant either fall or spring with good re-lise.

House Plants

Planting and cultural directions are in-cluded in shipment.

Vines

Plant at least 2 or 2½ ft. out from the house so you will have good drainage. Varieties that bloom during the spring months should not be pruned in the fail, except for the removal of dead wood. Varieties which produce blooms on new wood in summer and fall, should not be pruned until they have become well established. Then the vines may be cut back to the height of about 3 ft. to encourage vigorous growth.

Climbing vines should have good soil and plenty of water. Cut back when planted and tie or stake securely. Later train to solid trellis as motion is injurious to the plants. Vines for North and East Side: Clematis, Ivy, and Wisteria.

Vines for South and West Side: Silver Lace, Scarlet Honeysuckle, Pink Flame, Ivy, Bittersweet, Trumpet.

CLEMATIS—Clematis thrives best in right arden loam. Sand or peat moss may be added to heavy soil to loosen it up. The soil should be well drained. It is best to mix some lime in with the soil when planting. Place the crown of the vine about 2 inches below the surface. Don't cultivate as they like to be left alone. In the fall, any dead wood can be removed which is the only pruning needed.

Shrubs

ft.; tall grower 3 to 6 ft.

Shrubs require little
gruning: In no case prune
square across the top as this spoils their
natural habit of growth. Cut branches off
at ground. This will force young growth.
Frune early blooming shrubs like Spirea V.
H. and Lilacs right after they bloom. Prune
midseason and late blooming shrubs in late
fall or early spring.

If planting in beds, remove all sod and
spade up space between plants. In planting
around foundation, stay at least 2 ft. and
with large growing shrubs, as much as 3 ft.
to 4 ft. away.

Miscellaneous Tips

5 Easy Steps in Planting

(1) NURSERY STOCK
IS ALIVE
Remember nursery stock is alive and must be handled with care. DO NOT EXPOSE ROOTS
TO SUN OR AIR. Keep damp, cool, well covered and away from freezing te mperatures until planted. If you can't plant at once, open package, moisten well and keep covered with damp packing. Or treat as per No. 3.

(2) PLANT AT ONCE
When stock arrives plant
AT ONCE if you can.
Soak roots (but not tops)
in water before planting,
especially if the stock has
dried out some en route.
Do NOT expose roots to
air or sun. You can leave
roots of all plants in water
for 24 hours except strawberries and perennials.

(4) HOW TO DIG HOLE

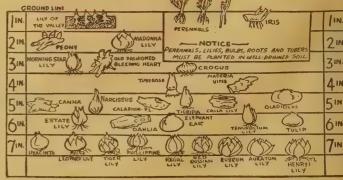

Dig hole large to hold roots without crowding or bending. Set stock 1" deeper than it stood in nursery row. Trim off broken end tips of roots with SHARP knife. Loosen soli in hole and set roots in natural spreading position.

SHRUB PLANTING CHART

PLANTING CHART-BULBS & PERENNIALS

remove the remainder.

Watering—Hoe or cultivate frequently, stirring the ground after rain or watering. In dry weather water thoroughly once a week. The best plan is to make a basin around the plant and fill it full of water several times until the ground is soaked 12 inches or more deep. After the water has soaked away, then fill up the basin with dry dirt. around the plant and fill it full of water several times until the ground is soaked 22 taken the soaked away, then fill up the basin with dry dirt.

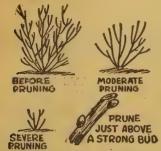

It is much better to let the water run out of the hose without a nozzle than it is to stand and sprinkle with a nozzle.

Summer. Do not expect most fall planted masses to make to make to make to make the make to make the same as spring planting except pruning should be done early the next spring, and a mound of dirt at least a foot high should be pulled up on top of stand and sprinkle with a nozzle.

About Fall Planting

Besides the fall bulbs, such as tulips, leinths, narcissus and the like which mus fall planted, almost all hardy nursery st can be planted in the fall as well as the spring. In fact, many plants do deferred that a pring set.

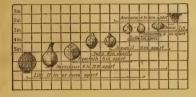

is is to keep the frost from heaving the ship set plants out of the ground during by winter thaws. If convenient, cover this und of dirt with a mulch of oat or rys aw or some other litter to keep the mound dirt from being washed away in the post le warm winter rains.

Prune shrubs severely after planting. Fol-low Shrub Planting Chart for later pruning.

Planting Fall Bulbs

Fall and early winter is the only time you can plant tulips, crocus, daffodils, narcissus, and the like. They spend the fall and winter making roots and then come up early in the

Set at the depth and distance apart shown the diagram. You can either dig out a mplete bed or simply a small hole for th bulb. Some people put a little sand in the hole which is nice as it allows drainage. each bulb. Some proper pay
each hole which is nice as it allows drainage,
each hole which is nice as it allows drainage,
Don't allow air spaces about the bulb and
be sure to PACK THE EARTH DOWN FIRMLY. If you wish, you may put a little fertilizer BELOW each bulb for the roots to
feed on. Do not let the bulb touch it.
It's a good idea to mulch with lawn rekings or straw or rotted manure. After blooming next spring, allow the tops to die down
naturally and then either dig and store, or
leave for another season of bloom.

Plants for Shady Locations

SHRUBS—Japa Snowberry, Honeysuckle -Japanese Barberry, Snowball, ry, Hydrangeas, Spirea V. H.,

PERENNIALS—Lily of the Valley, Violets, Bleeding Heart, all wild-flowers, Bluebells, and all the ferns.

ANNUALS — Nasturtiums, Snapdragons, Lupine, Sweet Williams, Pansies.

Tips on Planting

(1) Just before planting, stick the roots of the shrubs in a mixture of water and soil about as thick as grease.

(2) When pruning, always choose a place just above a strong bud, NEVER BELOW.

(3) Plant your shrubs in a curved line, and not in straight rows. Keep away from the foundation of the house or building, and use smaller shrubs in front of the taller ones.

Pruning Tips to Remember

SHADE TREES—If, smaller around than your wrist, you can trim them any time. If larger, trim only in the winter when the sap is not flowing. Trim in early spring to prevent bad crotches, crossed limbs.

FRUIT TREES—Prune early in spring, cutting out bad crotches and limbs that interfere with each other. Don't cut off short spurs from main limb as this bears first fruit.

GRAPES—Prune in February before growth starts in the spring. Cut off all old wood which has borne fruit.

HYBRID TEA ROSES—Prune long shoots off before winter covering. Prune balance of wood to 8 inches from the ground just before growth starts in the spring.

SHRUBS—Prune early bloomers like Bridal Wreath, Lilacs, etc., right after they bloom. Later bloomers like Hy-drangeas can be pruned in the spring.

HEDGES—Prune several times each season whenever it is necessary to keep the hedge in the shape desired. An evergreen hedge should be pruned in late May or June. If you have a strangly hedge, cut it back to within few inches of ground, fertilize and it will grow nicely. Always prune top narrower than bottom.

Asparagus

Set asparagus 15 in: apart in rows 3 ft. apart either spring or fall. A bed dug 18 in. deep with well rotted manure for the bottom six inches, and rich top soil for the next six inches is best. Set plants, spreading the roots well and with eye up. Cover with 3 laches of soil and tramp well. Or simply Graduage of the control of the control

Blackberries

Blueberries

Get a start of blueberries; can't beat them. They're easy to grow except they need acid soil. So with every blueberry order shipped, we send enough aluminum sulphate to acidify the soil around the plants and insure proper conditions. Dig your hole extra big, so the conditions of the plants and insure proper conditions. Dig your hole extra big, and plant as usual. Maintain acidity by ading 1 tablespoonful of Al. Sulphate each spring, summer and fall to soil. That's all that's different than with other nursery stock. Plant 6 feet apart. They like lots of moisture and good drainage. Cultivate frequently only 2 inches deep as roots are shallow. Our peat moss helps hold moisture and keep soil acid.

Additional quantities of Aluminum Sulphate can be secured at Henry Field's.

Boysenberry and Youngberry

After the soil has been thoroughly pre-pared, set the plants 3 ft. apart in rows 4 ft. apart: Don't crowd the roots. Pack the earth around solidly. After planting, mulch with a heavy application of well rotted barn-yard manure. Plants can be left to trail on the ground the first season. In the fail, after the growth has stopped, prune back about one-half of all new growth, and just before the ground freezes, cover with several inches of straw.

Cannas

Plant late in spring in rich bed. Cover with 2 inches of fine soil pressed firmly. Or dig a deep bed and place manure and fine top soil 6 in. deep below the bulbs. Water in dry weather. Cannas like sun. Plant 18 in. apart. After tops are killed by frost, dig and store in cave or cellar where dry and cool. You can cover with dry sand or sawdust.

dust.
Do not divide the roots until towards planting time. Cut them in pieces with two or three eyes or buds to each piece.

Currants and Gooseberries

Plant in any rich moist soil, or even where there is part shade. This doesn't seem to bother these plants. Cultivate to hold mois-ture and put them about 4 feet apart. Keep to edge of garden so they are not in way of plowing.

Plant in well-drained sunny location, after soil is warm. Dig holes 6 in. deep 2 feet apart, and plant tuber on side with eye up and cover with 3 in, dirt pressed firmly, Fill hole gradular is above ground, remove all but one sprout and pinch that back when 12 to 15 in. high to force lower growth. Dig in fall after first frost. Cut tops to roots and store upside down in cool dry cellar or cave. Divide in spring and be sure to get one eye with each division.

Evergreens

Evergreens are not particular about the soil, but they like lots of water when first planted. Water daily if necessary until they are well established. Give them fertilizer now and then, and give them a mulch over winter. It is not necessary to wrap or in any other way protect them, at this season. Dot prune except Junipers and Arborvitae which can be pruned to any shape desired.

Gladiolus

Plant 5 to 6 in. deep and 4 to 8 in. apart, in sunny location. Plant at intervals of two weeks for longer period of bloom. When tops die, die bulbs, cut off tops and dirt and store in cool, dry place. Gladiolus can be planted early in the spring, and as late as the first of July.

wires about 24" and 36" acover ground respectively.

PRUNING GRAPES: Prune
only in the winter when vines
are dormant and weather not too
cold. Keep in mind that canes
that have borne fruit one year
will not bear again. So prune
off all old canes (year old
shoots) coming out from main

Mature grapes before and after pruning.

Hedging

Dig trench 10 in.
wide. Set plants along strait at shown in Illustration J and a trifle lower than they were in nursery row. Trim with in five inches of ground immediately after planting to give bushy growth. When new growth starts, nip off the end of each growth to stimulate branching. Set privet randing. Set privet rieties 6 to 12 in. apart; Barberry and other bushy shrubs 1 foot apart; tall shrubs for high hedges 2 to 4 feet apart.

HEDGE PRUNING—Hedge pruning should be done several times each season—before growth starts in the spring, in May and in July. An evergreen hedge should be clipped in the started that the start is the spring, in May and in July. An evergreen hedge should be clipped in the started that the started in the started that the started in the st

Illustration "J" Setting a Hedge

Hyurangeas

They thrive best in a rich, moist soil, and flower freely either in a sunny or shady location. Severe pruning should be practiced, and the weak growth thinned to have good blooms. Blue Hydrangeas need some winter protection.

Plant shallow with rhizomes just barely covered with dirt. Spread roots like fingers. Be sure to place Iris where they will get at least a half day's sun and good drainage. Do not let them be crowded by other plants. It is necessary to dig, separate and replant your Iris clumps every three to five years. Transplant in August or September. If planted early enough will bloom next spring.

Plant several inches deeper than they were planted in the nursery row. They like an early planting and a fairly sweet soil. Trim by cutting out old blooms. Don't prune tops severely and prune only right after blooming. Try the new French Hybrids for all colors in Lilacs.

Plant all Lilies on well drained soil. Do not use manure. Plant either fall or spring (except Madonna which is fall planted). If you plant in the fall, mulch lightly to prevent freezing and thawing. Good idea to put 2 in. of sand below bulbs. Plant bulbs at depths. specified for each variety in the catalogs.

The planting depth should be three times the diameter of the bulbs. Move lilies after they have been in one place for a few years as the bulbs become overcrowded. Plant where there is plenty of sunshine.

Narcissus

Narcissus, which are also called Daffodis and Jonquils, must be planted in the fall. Give them a fully sunny location. They like plenty of water, Give them a light mulch over the winter. Place the bulbs upright in soil.

After blooming, allow the tops to die down naturally and then either dig and store or leave for another season of bloom.

Pennies

Plant in rich soil, thoroughly spaded. It is extremely important that the pink eyes should be planted between 1½ to 2 inches below the ground level. Never plant them depper than this nor any shallower. This is the most important point in planting peonies. Plant either spring or fall. Peonies are heavy feeders and should be fertilized well. Spade in manure and bone meal or Sheepoli-zer way deep, below the roots. Water often. They are so easy to grow and so beautiful, plant lots of them.

You may dig and divide your clumps of peonies in the fall, though they probably will not need it for several years. Be sure to get several eyes on each plees. Cut off any bad or rotted places. Peonies must be planted in full sun.

Perennials

Perennials

Plant as soon as plants arrive, in good rich soil. Set so top of clump is just under surface of soil about ½ in. If growth has started set crown (where roots join tops) at the surface. (See Illustration). Plant bushy growing plants farther apart than lower growing sorts. Mulch fall planted perennials with straw and leaves (never leaves alone as they will choke the plants) to prevent alternate freezing and thawing. See chart, bottom of page 26.

Raspberries

Same as blackberries. Cover roots about 3 to 5 in. deep depending on size plants you order. Plant 3 ft. apart in rows 6 ft. apart.

Plant 3 feet apart in good garden soil so crown is 1 to 2 in. below surface of soil. Plant either spring or fall. Give plenty of moisture, clean cultivation, and feed generously. No stalks should be pulled until the second year, and then only little. After that they may be pulled as long as you can use Asparagus. You may dig, divide and move in the fall or spring.

inches long R inches long R in Ove any in pressed firmly around the roots leaving nair pockets. Dust your roses regularly ever two weeks after the leaves first appear wit Field's Bug Dust. You will have neither bug nor disease. Read about Rose Dust and Rose tone on page 55.

Strawberries

Strawberries

Pulverize ground thoroughly. Set plant with crown just at the surface of the earth. Do NOT GET CROWN COVERED. (See all the station below.) Be sure roots an spread without crowding. Press soil firmly and remove dry or bruised leaves. Plant early as you can work the soil in spring. For field work set 24 in. apart in rows 3 ft. apart and in garden work about 24 in. apart each way. Mulch with 3 or 4 in. straw in fall. This mulch can be left on the following season to retain moisture and keep down weeds. Strawberry plants will not cross fertilize, so you can plant the varieties you choose. If bed is too crowded, thin out old plants. Some people let runners fill the rows and dig the old rows every two years.

Grub worms sometimes bother strawberries planted in sod or new soil so it is best to prepare the bed in the fall if you are plant-ing them in new soil. Everbearing varieties

Too Deep Too Shallow Just Right

will produce the first season—the others not until the following year.

HENRY HOUSE PLANTS Better varieties only, shipped fresh and directly to you from our own greenhouses

SEE THOSE ON PAGES 30 AND 31 ALSO

Nothing takes the place of house plants during the winter when all outdoor flowers and foliage are gone. Even in summer, they are enjoyable Indoors, but then, if you wish, and the control of the contro

are anjoyable indoors, but then, if you wish, most of them can be put outdoors in beds, borders, pots, porch and window boxes.

We grow our own house plants and ship them directly to you, from our own greenhouses. That's why we know they are the better varieties only, and that's why, in spite of comparatively low prices, they are healthy, husky, young plants. We send them to you out of 21/4" pots, ready for you to grow them into mature specimens even more beautiful than the pictures shown here. We suggest that as soon as you receive your plants, you report them immediately into 3" or 4" pots.

We ship house plants postpaid as soon as weather permits. They are shipped separately—not included with garden seed or nursery stock shipments.

ALL HOUSE PLANTS ARE SHIPPED POSTPAID

POTTING SOIL

4062—Contains Iowa loam soil with added humus, nitrogen, phosphorous and potash, plus Vitamins B1 and B2, plus Rootone for stimulating root growth. 1 gallon is enough for 10 to 12 4-inch flower pots. ½ gallon, 1.19; I gallon, 1.74. Both postpaid.

PLANT FOOD FOR AFRICAN VIOLETS

Green Thumb Plant Food, when used as directed, can help you raise healthier, more free blooming, African Violets. See details and prices on page 54.

FANTASTIC BEGONIAS

These are all rare plants; look at the pictures of them and you will agree with us. These varieties grow like Rex Begonias but botanically they are Rhizomatous Begonias. Actually they are easier to grow than Rex Begonias and, in winter, thrive better than Rex Begonias in those homes where the heating system makes the air abnormally dry. They have a rest period in December, January, and February, when they don't look too becoming, and then they must be kept pretty dry; but all the rest of the time, their gorgeous colorings and fantastic leaf shapes are a joy to behold. Give them plenty of light and warmth but little or no direct sunlight.

2N219—TURKEY FOOT BEGONIA (Sunderbrucki). The leaves are cut into long finger-like serrations, and, as this plant develops, you will find its rich colorings exquisite. Leaves get 8 to 12" across, and are arranged like seven pointed stars. 1.25 each; 3 for 3.49.

pointed stars. 1.25 each; 3 for 3.49.
2N226—BO-NIGRA. We take great
pleasure in introducing for the first time
"Bo-Nigra," a brand new hybrid by the
MacLanahans of the west coast. It is
almost impossible to describe the coloring and fantastic leaf shapes of this new
hybrid, but here are some general facts:
It remains small and neat with a
bushy, many-leaved growth. The coloring is generally rich, dark, black-green,
with frequent irregular markings of

AFRICAN VIOLETS

Put them where they get light, but not direct sun. Keep at ordinary temperature. To water, put pot in pan of water until soil is soaked, then drain off surplus. They grow well in north windows too, provided they do not get too cold.

cold.

2N172—CALIFORNIA DARK PLUM.
Recognized as the finest red of all African Violets. This is one of the "tops" of all violets. A good grower and prolific bloomer. 1.75 each; 3 for 4.80.

2N179—PORTLAND ROSE. Large, clear, rose-pink blooms in abundance on a vigorous plant. This is the most atractive pink of any that we have handled as the blooms have life and fire in them. 1.50 each; 3 for 4.19.

2N171—DOUBLE DELIGHT RAINBOW. Large, double, medium blue. Leaves large green, slightly scalloped. Continuous bloomer. 1.75 each; 3 for 4.80.

ZNI74—FANTASY VARIEGATED. Tops among all novelty African Violets. Lavender pink background splashed, rayed and dotted with contrasting deep purple. Has the fascinating habit of changing colors almost with each bloom.

1.25 each; 3 for 3.49.

2N194—STAR SAPPHIRE (Pat. Applied for). Abundance of large blooms of deepest purple formed in the shape of perfect stars. Brilliantly set off by triple pollen centers of golden color. 1.50 each; 3 for 4.19.

2N200—RED LADY. One of the very newest and best of the "reds"—a clear, wine red. 1.98 each; 3 for 4.49.

2N205—LADY GENEVA. Deep blue edged a sparkling, frosty white. Good grower. White edge gets more pronunced as plant becomes older. 1.50 each; 3 for 4.19.

bright green and chartreuse green. Undersides of leaves are red with green markings. We'll guarantee you will not have a visitor who will not admire and envy you this plant. 1.50 each.

envy you this plant. 1.50 each.
2N227—JOE HAYDEN. A wonderful
begonia with wavy, pointed leaves of
thick, leathery texture shaped into a
blunt star. Colors best with very little
light; then leaves are almost black and
highly iridescent. Reverse of leaf is red.
98c each; 3 for 2.85.

2N228—ILLUSTRATA. Makes a low, full mound of rounded, light green leaves, rough and pebbly, with mottled dark veinings. Undersides of the leaves have reddish streaks which reflect a red glow through the leaf. Leaves about 3" long. Blooms at intervals throughout the year with pale pink flowers. 98c each; 3 for 2.85.

each; 3 for 2.85.

2N229-SILVER STAR. A beautiful star-leafed hybrid of glossy olive-green entirely silvered on the upper side. Leaves get to be about 6" long with margins toothed and waved. Red underneath. Goes beautifully with any room color scheme. 98c each; 3 for 2.85.

2N230—GREEN STAR. Star-shaped leaves of a rich green, and about 6 to 8" long. Fine companion for Silver Star. 98c each; 3 for 2.85.

2N23!—STITCH LEAF. A most interesting and attractive variety. A new introduction from Mexico entirely different forces.

2N166—DOUBLE KING NEPTUNE. A new deep purple with probably the largest of all African Violet flowers and certainly the largest of any double. The blooms are borne in profusion and, on a well-grown plant, get to be the size of a silver dollar. 2.25 each; 3 for 5.98.

SIVER dollar. 2.25 each; 3 for 5.98.

2NI69—DOUBLE WHITE LACE. Another new lovely. Daintily fringed double of pure white, set off by vivid green, wavy leaves. Very good bloomer. 1.98 each; 3 for 4.49.

2NI70—STAR GIRL. A brand new beauty with striking flowers—each petal daintily outlined with soft blue. Lovely scalloped "girl" foliage. 1.50 each; 3 for 4.19.

tor 4.19.

2N186—KING OF THE DOUBLES. The "bloomingest" plant of them all. Clear "Blue Boy" blue and fully double. Profuse bloomer. 1.25 each; 3 for 3.49.

2NI64—SNOW PRINCE. New, and the best pure white single. A good grower and good bloomer, with large waxen white flowers held well above the oblong, apple-green foliage. 1.25 each; 3 for 3.49.

for 3.49.

2N168—RUFFLED QUEEN. The blooms of this violet are so distinct and beautiful that they draw attention even in a collection of a hundred or more different varieties. The strong, heavy flower stalks always carry several huge buds. The flowers are a rich, deep purple, and the edge of every petal is so heavily ruffled and frilled that it has the appearance of being edged with dainty lace. This variety is a much better bloomer than the old Lacy Girl. 1.98 each; 3 for 4.49.

2N/38—GENEVA RAINBOW. Lovely companion to Lady Geneva. Frosty burgundy red each petal narrowly edged with snowy white 1.50 each; 3 for 4.19.

2N163—LOW CLUSTER BLUE. This is a variety we wouldn't be without, yet it is lit-

tle known and seldom listed. It has a most attractive manner of flowering in that the blooms are all clustered in the center of the plant, surrounded by a double ring of leaves. Looks for all the world like a beautiful old fashioned bouquet of violets, as you can see by our actual photograph. Rich blue blooms 1.25 each; 3 for 3.49.

1.25 each; 3 for 3.49.
2N167—DOUBLE ROSE AZURE. The folks who work in our greenhouses, who are with African Violets all day long, think this variety is the most beautiful of all. It has large double, white blooms softly blushed pink, and tinted more deeply here and there with wine. The foliage is rich green and rather quilted. 2.25 each; 3 for 5.98.

SCARLET FLAME VIOLET*

SCARLET FLAME VIOLET*

2NI—(Episcia Coccinea). A close cousin of the African Violets, and by long odds the brightest member of the family. The flowers are a brilliant scarlet, contrasting vividly with what are probably the most gorgeous leaves of any known house plant. They are broad, very thick and plush-like, and of a deep bronze-green color with veinings of bright emerald green.

So beautiful is the foliage of Flame Violet that, even without its flaming red flowers, it is a house plant you would cherish and admire. And the flowers are really true red—a flaming, scarlet red.

Flame Violet is easy to grow. Just give it he same care you give African Violets. Don't let the soil get too dry, keep it warm (not below 65 degrees) and give it plenty of light but no direct sunshine. WARNING: do not place where it is cold ag the plants will "freeze" at 45° Fahrenheit.

1.98 each; 3 for 5.40.

"'Flame Violet" is a trademark name owned by Flame Violet, Inc., Shenandoah, Is.

See 5 Other Flame Violets on Front Cover!

derneath, with long panicles of bright red flowers. 79c each; 3 for 2.16. 2N247—WATERMELON BEGONIA

cause the leaves grow in a cluster close to the soil. 89c each; 3 for 2.49.

2N246—LETTUCELEAF. Ruffled leaves of several shades of green tinted red. Dainty pink flowers on long red stems clothed with white hairs. 1.00 each.

iridescent, small, rounded leaves of peagreen are distinctly stitched with black brown around their entire perimeter. Flowers pink. 1.25 each; 3 for 3.49.

Fantastic Begonias Collection 2N837X—1 each of Silver Star, Green Star, and Illustrata—all 3 for only 2.89.

Collection of Rare Begonias

2N836X-1 each of Turkey Foot, Bo-Nigra and Joe Hayden-all 3 for only Nigra and 3.49, ppd.

NEW and UNUSUAL BEGONIAS

Bloom beautifully indoors, are grand for window boxes, and make very showy plants in the shaded garden.

2N242—CALLA BEGONIA. green variegated leaves, many almost white, and shaped like calla lilies. Flow-ers are red. This is a very rare and un-usually charming plant. 1.25 each.

usually charming plant. 1.29 each.
2N218—ORANGE RUBRA. The flowers
are a bright orange, large, and brilliant.
We have never seen an orange-flowered
begonia before, but here is one, and it
truly is gorgeous. 98c each.
2N211—LARGE LEAF ANGEL WING.
Large, deep bronze leaves, rich red un-

DOUBLE "ROSE BUD"

BEGONIAS

These are not ordinary begonias. The plants grow round and solid, with many clusters of small, double flowers that look just like little rose buds. Easy for grow, and very beautiful. Wonderful indoors plants and also ideal outdoors in summer in semi-shaded pots, and in window and porch boxes, because they bloom profusely and almost constantly. 2N225—"CARMINE QUEEN" ROSE BUD. A brand new named variety with very large "rose buds" that open into full-blown, double, deep pink flowers. Leaves are an attractive coppery red. Flowers most of the time. 98c each; 3 for 2.85.

Flowers most of the time. 500 for 2.85. 2N220—DOUBLE "ROSE BUD" RED. 75c each. 2N221—DOUBLE "ROSE BUD" PINK.

2N222-DOUBLE "ROSE BUD" WHITE. 75c each.

(Pedilanthus). Waxy green leaves with a wide border of milky white. Showy red or

REX BEGONIAS (Painted Leaf Begonias)

Pointed Leaf Begonias)

In our opinion, these are the most beautiful and brilliantly colored of all foliage plants. The range of colors and tones is simply a m a z in g—reds, browns, greens, plints, lavenders, purples, and combinations of these colors, often shot with gleaming silver. And here is a tip to you ladies—the colors are just the shades that are being used these days in home decorations. You can match, harmonize with, or accentuate, the color schemes of your rooms with Rex Begonias.

PAINTPOTCOLLECTION 2N831X—1 each of Carmelita, Crimson Beauty, Curly Silver Lake, Cardoza Gardens, and Helen Lewis—all 5 for only 3.98.

Rex Begonias like plenty of light without direct sunlight, and moist air. (Set the pot on (not

HOUSE FERNS

2N270—LACE FERN (Asparagus Plumosus). A fern with foliage so fine it looks like green lace. A favorite too for use in bouquets. 39c each; 3 for 1.10.

each; 3 for 1.10.

2N265—GREEN RIPPLES.
Plant hunters discovered this very beautiful fern growing in Oregon. It is much like the popular Fluffy Ruffles fern excepting that it is smaller. Our illustration is from an actual photograph and clearly shows the beautiful rippled effect. Makes an exceptionally fine pot plant which will grow well for several years without need for repotting. 85c each; 3 for 2.39.

2N264—FLUFFY RUF-FLES. Decorative and very beautiful. 49c each; 3 for 1.39.

during summer, you can plant it outside in window or porch boxes. 49c each; 3 for 1.39.

GARDENIA "Mystery"

2N295—Gardenia is the flower of romance. Our southern
friends grow them outdoors
regularly and easily. But
everyone likes to try growing them indoors. Some succeed, some don't; it depends
on conditions. But you are
convinced it is worth the effort when you see the huge,
white double, very fragrant
blooms. Grow them at room
temperature. Plant outside
in summer, right in the sun.
Water well. 85c each; 3 for
2.29.

Lovely IVIES

Hardy CARNATIONS

They'll Bloom in Your Garden Like They Do in the Greenhouse

Like They Do in the Greenhouse

If you like carnations, you don't
have to limit yourself to an occasional few from the greenhouse. You
can grow these hardy carnations outdoors in your own garden. They are
very similar to the greenhouse varieties, and have just as much fragrance. They will bloom all summer
in your garden with very little (are
and, since the stems often are 20
inches long, they make you wonderful cut flowers as well.

3 Scott Elliott Mixed, 1 Chrysantha, 1 Silver Queen, 1 Crimson Star. All 6 for 1.55, ppd.

MISSOURI PRIMROSE

B2131—This is a low-semi-trailing plant that grows only about 6 or 8 inches high but has gorgeous lemon-yellow blooms as large as teacups, and it blooms daily all sumand it blooms daily all summer. Does well anywhere. Actually prefers it hot and dry. Henry was delighted with this plant and always grew a lot of them at his place in the Ozarks. In fact, our stock comes from there our stock comes from there. 39c each; 3 for 98c, postpaid.

CANTERBURY BELLS

GIANT BELLS-So lovely they should be in every garden! 2 to 3 ft. high with large cups and saucers all up and down the tall stalk.

B2023 — BLUE; B2024 -PINK; B2025—WHITE. 39c each; 3 for 98c, ppd.

B3263X—Canterbury Bells Coll. 2 Blue, 2 Pink, 2 White. All for 1.69, ppd.

Hardy ASTERS

B1003—BLUE PLUME.
The deepest blue Hardy
Aster we know of. A
mass of large double
blooms in Sept. and
early Oct. Fine for cutting. Very showy. 49c
each; 3 for 1.29, ppd.

each; 3 for 1.29, ppd.

Bi036—ViOLETTA.
Deep, violet purple.
Grows into a rounded
bush about 2 ft. high
and wide. During September completely covered with semi-double
flowers. 49c each; 3
for 1.29, postpaid.

BIOOS — HARRING-TON'S PINK. The first truly pink Aster—deep, clear pink. 4 ft. tall

with bold heads of bloom. This is an Amer-ican Aster. Lives for years and increases in beauty each year. 49c each; 3 for 1.29, post-paid.

B1024—PROSPERITY.
A fine new Aster whose
large deep rosy pink
flowers form great wavy
masses on the plants
about 3 ft. high in Sept.
and October. 55c each;
3 for 1.49, postpaid.

B1002—BEECHWOOD CHALLENGER. One of the best of all hardy Red Asters. Grows up to 3 ft. Brilliant and beauti-ful. An English variety. 49e each; 3 for 1.29, postpaid.

B1015 — MT. EVER-EST. Finest and best white. Tall, well shaped, pointed pyramids 3 to 4 ft. high with flowers right down to the ground. Flowers are large and glistening like a bank of new snow in the sun. 39c each; 3 for 98c. pnd. a bank of ne the sun. 39 for 98c, ppd.

2 Magnificent New Ones "Peace" and "Plenty."
These two new Asters are English varieties with great quantities of immense blooms — each flower is semi-double and about two inches across. They are the largest-flowered Asters we have ever grown here at Henry Field's,

and they are very hardy. Both bloom in early September and last well into October. Grow 3 to 4 feet high and make wonderful cut flowers.

Bi022 — PEACE. The color of this one is bright lavender. 59c each; 3 for 1.49, ppd.

Bi023—PLENTY. This one has blue flowers with petals spoon-shaped giving it a distinctive beauty. 59c each; 3 for 1.49, ppd.

B3000X — A collection of Peace and Plenty—2 of each, 4 plants in all, for only 1.89, postpaid.

CUSHION ASTERS

These showy plants, illustrated at far left, are a lot like Cushion Mums in growth and habit. Need full sun for proper flowering and will give you a mass of late summer and early fall blooms in the flower bed or along your walks and drives.

3 NEW ONES
BIO13—LITTLE RED BOY,
Makes a compact plant about 18
inches tall and 2 feet across.
Covers itself completely with a
mass of small, starlike flowers of
brilliant red. Blooms from early
September until early October.
65c each; 3 for 1.68, postpaid.
Pacific Horizon and Pacific
Amaranth were created by Pro
fessor LeRoy Breithaupt of Corvallis, Oregon. He crossed garden Asters with the Dwarf Oregon Species. They make a low-

growing, compact plant covered with a mass of flowers from early August until late October —perfect for edging or fore-ground plantings. They are hardy as a rock, and very easy to grow, and are not bothered by insects.

B1020—PACIFIC AMARANTH. A vivid amaranth-purple color and grows about 18 inches tall. 49c each; 3 for 1.29, postpaid. BiO2:—PACIFIC HORIZON. Has flowers of a beautiful deli-cate blue and grows from 12 to 15 inches tall. 49c each; 3 for 1.29, postpaid.

Brand New Cushion Aster Collection

1 Pacific Amaranth
1 Pacific Horizon
1 Little Red Boy

B3003X-All three for only 1.49, postpaid.

Big Red and Pink Bargain

B3071X—1 each of all 12 (does not include Pink Seedlings) for only 7.75, ppd.

LILY OF THE VALLEY

B2114—This long has been one of the most popular of all perennials, as well as it should be. It does very well in the shade-on the north side of the house or under a large tree where it is too shady for grass and many other flowers. But it does well also in open, warmer locations. It is a compara-tively small plant (about 9 or 10") with rosette of large leaves that remain glossy green all summer and form a background for the lily-like flowers. The dainty beauty and delightful fraof these flowers grance make them very popular for corsages. 2 for 65c; 3 for 89c; 5 for 1.29, postpaid.

GIANT FERN COLLECTION B3251X MAIDEN HAIR FERN Maiden Hair Ostrich Plume Sword Fern GIANT FERNS All 3 for onl 89c, postpaid.

Especially good in those cool, shady "Problem" Spots

Ferns do well on the north side of the house or under trees-very use ful for those cool, shady spots where grass and flowers won't do well. They make excellent background plantings and add a luxuriant, tropicalappearing atmosphere. Fern Prices: 39c each; 3 for 98c, postpaid

B2070-MAIDEN HAIR. Lacy leafed. Illustrated B2071 - OSTRICH PLUME. Heavy and luxuriant.

FOX GLOVES

B2078 — This is the true perennial type Ambigua. Lovely soft vellow blooms flecked with chocolate. Looks like a hothouse-grown plant. Blooms all sum-39c each; 3 for 98c,

Carnation.) A grand new little carnation that makes a solid pincushion of bluegreen, needle-like leaves and tiny, bright, pink-colored, double little carnation blossoms. Fragrant, too. 49c each; 2 for 89c; 3 for 1.19, postpaid.

RASPBERRIES BLACK PARK—a Brand New Black Raspberry

A2053—We take great pleasure in offering you this new and improved black raspberry. It was originated at Des Moines, Iowa, and is well adapted to midwest conditions. You can be sure that since it will stand our extreme changes of climate that it will do well anywhere. Rigid tests have proved it is superior to all other blackcaps. The enormous berries are meaty, juicy, of rich quality, and do not crumble. Almost smooth, they present a wonderful appearance. And they are, the nearest to being disease-free of any raspberry we know of. Our plants were raised right here in Iowa. 3 for 98c; 6 for 1.89; 12 for 3.69; 25 for 6.98; 100 for 19.75, ppd.

A2050-This new black raspberry has larger fruit than older strains, better quality, disease-free plants, bigger

yields, and top-quality berries. Prices: 6 for 1.39: 12 for 2.39: 25 for 4.35; 50 for 8.25; 100 for 14.98, postpaid.

together to get a good set of berries. Plant 6 feet apart. We are offering the newest and finest

sorts in 3-year-old 12 to

18 in. plants.

Most people say Blueberries can't be grown over a large section of country because they must have acid

You Can Now Grow

Genuine Riveberries in

Your Yard

(sour) soil. found it's no trick at all to grow good Blueberries if you just make the soil acid, if neces-sary, with a little Aluminum Sulphate. We'll send enough Aluminum Sulphate with each Blueberry Collection to last for two years.

two years.

Blueberries like plenty of organic matter in the soil, too (except barnyard manure). Peat moss, such as we list on page 54, is just the thing, or well-rotted oak leaves or pine needles. Be sure to mix these materials up in the soil, not just dump them in a pile at the bottom of each hole before planting.

COLLECTION

All Henry Field's Raspberries are guaranteed free from disease, particularly Mosaic disease. That is important. Raspberries are a treat eaten fresh at home, and they stand up well for local deliveries. They are fine for preserves, jams, and freezing. And you will be amazed at the quantity of berries you can get from a dozen plants. They produce more fruit per square foot of ground than anything we know of excepting Strawberries, and rank right with them as a cash crop.

A2615X—Here are two of the leading red raspberries at a real bargain price. We will send you 6 Indian Summer and 6 Latham, 12 No. 1 berries—ALL for 2.69, postpaid.

INDIAN SUMMER

"New" Everbearing

A2075-Six points of superiority: (1) Exceedingly high quality. (2) Earlier season. (3) Heavier fruiting. (4) Hardier (thrives even in Canada). (5) More disease-resistant. (6) Two big crops a year. Prices: 6 for 1.49; 12 for 2.79; 25 for 4.98; 50 for 9.25; 100 for 16.98,

GIANT LATHAM

A2078-Giant in size, and extra hardy. A Minnesota development. Berries are large, dark red and firm, pick easily and ship well. Bears large crop and is a real moneymaker. Returns on commercial plantings often run as high as \$400 to \$800 per acre in a single year.

For you home gardeners-just think-for the price of one crate of berries you can buy enough plants to give you fresh berries galoreand not just for one year, but for half a generation or more. Prices: 6 for 1.45: 12 for 2.49: 25 for 4.65: 50 for 8.49; 100 for 15.98, postpaid.

The New EARLY RED

A2070—This introduction of the Michigan Agricultural Experimental Station has gone through a long testing period at the South Haven Station and a ten-year test with commercial growers before its general introduction. So we know it is good—mighty good! Its main virtue is its early ripening habit, 2 weeks ahead of Indian Summer, and ripening over a long period.

Its very fine flavor, inherited from one of its parents (Cuthbert), together with its long ripening season, make it a fine home garden, as well as commercial, berry. Freezes well and does not crumble when canned. Fruit large and plants vigorous, hardy and productive. 3 for 98c; 6 for 1.79; 12 for 3.39; 25 for 6.50, ppd.

Henry Field's GIANT BOYSENBERRIES

New! Thornless BOYSENBERRY

A2031-Here's the popular Boysenberry, but a variety WITH-OUT THORNS. Bears as well as the regular Boysenberry. Same high flavor and immense size berries but a whole lot easier to pick. Prices: 6 for 1.45; 12 for 2.49; 25 100 for 15.89, postpaid. Boysenberry

The Sensational BOYSENBERRY

A2030—Often called the 'Wonderberry" because of its huge size and on his fluge size and goodness. Largest berry we have ever seen. They often are 2½ inches long and rich dark purple in color. Flavor a little from the Loganberry, the Raspberry, and Blackberry A real moneymaker. Prices: 3 for 79c; 6 for 1.25; 12 for 2.29; 25 for 4.19; 100 for 15.98, post-

Large, Sweet, Mild DEWBERRY

A2035-We're offering only Lucretia because it is the best variety and the hardiest. Large, sweet and coreless. Milder than a blackberry. Be sure and mulch with straw in late fall and see what a wonderful crop you'll have. Prices: 3 for 75c; 6 for 1.10; 12 for 1.92; 25 for 3.75; 50 for 6.34; 100 for 11.44, postpaid.

We wish we could sell nothing but 2-year transplanted berry plants. They are so much more satisfactory in every way. They are larger, stronger, heavier rooted, and the danger of losing them in planting is greatly reduced. They'll even bear a few berries the first year. We urge you to try them. They are well worth the money, particularly for ordinary back vard planting because they require very little care to get them established.

Supply not too large so, if and when we run out, we'll ship twice the number in a smaller size.

SUPERFECTION—A Very Fine Everbearer

B4125—Superfection bears two crops a year of big, red berries, richly flavored and juicy. It is hardy everywhere and, unlike most everbearers, is a good plant maker. Dr. Dennisen of Iowa State College tested several everbearers, keeping runners removed and the ground mulched with sawdust or cracked corncobs. Superfection outbore them all, yielding up to 120 quarters per 100 row feet—the equivalent of 13,000 quarts per acre. (Write Dr. Dennisen for further information.) 25 for 2.15; 50 for 3.75; 100 for 6.25; 200 for 10.98; 500 for 25.98, ppd. 1,000 for 45.50, exp. not ppd.

Tried-and-True Everbearing Collection

The New Gem-Berries from Spring to Fall

Bears Heavily First Summer

B4113-The new Gem gives you fruit early in the spring, in the summer, and in the fall. It is a wonderful plant maker, being healthy and vigorous. The berries are quite round with very few seeds. And it will bear heavy the first summer. 25 for 1.39; 50 for 2.35; 100 for 4.25; 200 for 7.65; 500 for 17.98, all postpaid. 1,000 for 33.98, express not prepaid.

Henry always said that if he could grow only one fruit, it would be strawberries. They taste so good, and will grow anywhere for anyone. And bear heavily, Ordinarily they bear about one quart of berries per plant each season. And you can get 50 plants in a space no bigger than a blanket!

As a cash crop, they are one of the best. You never have trouble selling them. People usually will come to your patch and pick their own and pay you.

You should plant some Everbearers and have fresh strawberries all season, and the first year. We list only the varieties we consider the best. Any one of them will give you satisfaction

Henry Field's

... New ROBINSON

More Popular Every Year

B4123—One of the top new berries that is gaining popularity wherever grown. It has everything. It is very large, has a delicious flavor, and the berries are a bright red color. It ripens right after Dunlap. 25 for 98c; 50 for 1.49; 100 for 2.75; 200 for 4.98; 500 for 11.75, postpaid 1,000 for 21.00, express not prepaid.

BLACKBERRIES

. . EBONY KING

The New Improved Blackberry

A2003—We guarantee that Ebony King will bear a heavy crop of large, luscious berries year after year.

year after year.

They are an upright-growing blackberry, the bushes being very strong, and they bear a heavy crop without breaking down.

Have withstood temperatures of 22 below zero without damage to the buds. Berries are large, firm, and have true sweet blackberry flavor. Can well. Bear heavily one year after planting. 3 for 98c; 6 for 1.79; 12 for 3.39; 25 for 6.50, ppd.

ALFRED . . .

The Early,

Long-Bearing

A2000-The early ripening, long-bearing blackberry. Produces an enormous crop of firstquality fruit. Berries are large, jet black, de liciously flavored, and nearly coreless and seedless. Will grow in poor soil and take care of themselves year after year. Very hardy. 6 for 98c; 12 for 1.79; 25 for 3.19; 50 for 6.00; 100 for 10.49, postpaid.

.... ELDORADO

The World's Leading Blackberry

A2004-Most resistant to rust. Berries are large and firm and borne in abundance. Ripens over a long period. Fruit is juicy, sweet and very fine flavored and the vines are very hardy—one of the best of all blackberries. 6 for 98c; 12 for 1.79; 25 for 3.19; 50 for 6.00; 100 for 10.49, postpaid.

Commercial Freezers Buy This One

B4104—You'll like this for your own use, and it also is especially good to raise for selling to commercial freezers because of its high color and because it holds its shape so well. Will stand more dry, hot weather than any other variety. Really dependable. A heavy bearer, and early fruit. Especially good for Missouri and south. 25 for 89c; 50 for 1.39; 100 for 2.49; 200 for 4.79; 500 for 10.89 all postnaid. 500 for 10.89, all postpaid. 1,000 for 19.75, express not prepaid.

Henry Field's Famous WHITE STRAWBERRY

B4114—More than a novelty—a good strawberry. Medium-sized berries, very sweet. Profusion of berries grow on top of plant, so stay clean, ripen well, pick easy. Hulls stay on plant! Strong grower, Good plant maker. Very hardy. How about a shortcake with white berries and pink-colored whipped cream? 10 for 1.29; 25 for 2.69, postpaid. Only 25 to a customer.

The sensational new Everbearer.

All 60 for only

579 postpaid No. B4208X

Giant MASTODON

B4119—Bears lightly 90 days from planting, and soon is bearing heavily. Keeps on bearing until frost. The berries are giant in size, often 2 inches in diameter, but still very sweet and juicy. This is one of the first true everbearers introduced and it still holds its own against all comers. Many nurseries have dropped this fine variety for the newer ones, but not us. Our customers like it and we like it, because it performs. 25 for 2.10; 50 for 100 for 5.98; 200 for 10.79; 500 for 24.98, postpaid. 1,000 for 44.98, express not prepaid.

B4122—(Patent No. 993.) A cross of Wayzata

everbearing and Fairfax June-bearer, by Marion Hagerstrom of Enfield, Minn. A chance seedling, one in a million, that hit square, retaining all the good qualities of both parents. Very high quality and honeysweet because it carries lots of natural sugar. Extra large and deep red thru and thru. Unsurpassed for freezing; does not mush when thawed. Very high yield. Crown and root system very large. The above picture is from an actual photograph. (Did you know that every picture in this catalog is from an actual photograph?) 10 for 2.98; 25 for 5.00; 50 for 8.49; 100 for 14.98; 200 for 26.00; 500 for 55.50; 1,000 for 97.50. All postpaid.

Henry Field's DUAL-PURPOSE BUSH

The Bush Cherry
That's Better Than Tree Cherries
for the Average Back Yard
These are new, improved Nanking
Hybrid Bush Cherries, originated under the direction of Dr. Alderman at
the Minnesota Experiment Station.
They are much better than the old
Nanking varieties because:

1. Not affected by leaf spot or other
diseases.

Not affected by fear spot of diseases.
 Not affected by insects.
 Cherries hidden by foliage; very few eaten by birds.
 Cherries of delicious flavor, and nearly as large as pie cherries. Fine for eating right off the bush and make wonderful pies, jam. Lally.

and make wonderin pics, jelly.

5. Just a few bushes bear more than the average family can use.

6. Make a beautiful, clean, ornamental shrub. Have abuncance of white flowers in spring.

7. Ideal for planting in a row as a tall screen (grow ten feet high).

8. Can be planted as a hedge and kept as low as five feet by a couple of trimmings a year.

9. Can be trimmed as severely as desired.

desired. Even when trimmed, they bear plenty of cherries because the fruits are borne inside on the branches. The cherries are easier to pick. No tree climbing, no ladder scal-

No tree climbing, no ladder scal-ing. iere is some variation in flavor so ist several varieties. All are self-

to 4-foot shrubs, 1.75 each; 3 for .95, postpaid.

Nanking Hybrid Cherry Bargain **A2750X**—1 each of all four varieties for only **6.39**, postpaid. This is one of the best buys in this catalog.

Heavy Foliage Hides Fruit from Birds

To take this picture, we spread the outer foliage apart to disclose the cherries growing inside close to the branches—almost entirely hidden from birds.

Nanking Hybrid Bush Cherries make an ideal hedge or screen too, as shown in picture above.

Bush cherries make the best dual purpose shrubs we know of; they are highly ornamental and also bear lots of delicious fruit.

The pretty blooms, the dense growing, clean, green foliage, and the bright red fruit are beautifully ornamental. They make a good shrub for lawn or house foundation planting. And we know of nothing better for a screening hedge. Some bush cherries (the hybrids) never get over 4 to 5' tall. Others, like Nanking, will grow to 10', but can be kept lower by shearing, as was done with the hedge in the picture above.

The cherries are just as good to The cherries are just as good to eat as tree cherries, and are a lot easier to pick. They make wonderful pies, jams, jellies, wine. They add a new flavor to your table. In addition, as they are borne along the trunk and branches shielded by the foliage the birds rarely bother them. You should get acquainted with bush cherries.

FIELD'S GIANT RED-FLESHED BUSH CHERRY

Purplish-Red Skin and Flesh

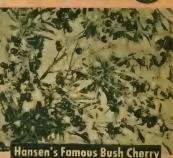

A3359—A Bush Cherry as loaded as the regular Bush Cherry, but giant (plum size) fruit. Dark purplish red skin and flesh. Is actualty classified as a plum. Best looking fruit we've seen. Good eaten just like plums or cooked or canned same way. Grows 4 to 6 feet. Plant 6 feet apart. Will produce more fruit in small space than anything we know. Makee a lovely shrub. Plant it in the border, enjoy its delightful bloom, and have fruit, too.

1.29 each; 3 for 3.59, ppd.

5-7 ft., Exp. No 5 to 7-ft one this year.

A3333—This is a fine, new hardy sweet cherry originated in the orchards of Hiram Burkholder, Clyde, Ohio, who for many years has carefully tested new fruit trees in search of better varieties. In Ohio, this variety has shown no injury at temperatures of 15 to 20 degrees below zero, nor has late spring frost during the bloom period affected the crop materially. It is a vigorous grower and very productive. The very black fruit has a delightful, aromatic flavor. The flesh leaves the pit readily and the cherries do not crack nor brown rot before picking. We recommend it to you.

CHERRIES

A3334—This is a fine new variety of pie cherry originated by the University of

Minnesota, and tested for some years by them, as "Minn. No. 66."

Being a Minnesota cherry, it is really hardy, both in tree and fruit buds, even in exceptionally rigorous winters. Meteor is very much like Montmorency in style; its fruit are a light, bright red, large in size, and mildly acid in flavor. It is excellent for sauce and pies and, if

you enjoy pie cherries as a dessert, you will enjoy Meteor very much.

MBRID BUSH CHERRIES

A Beautiful Bush that Bears **Delicious Cherries**

Much larger and tastier fruit than the Much larger and tastier fruit than the old Hansen Bush Cherries and better growers. Budded on American plums, and should be hardy anywhere. Should a wild plum stalk with large, dull leaves come shooting up through the shiny leaf Bush Cherry, be sure and trim it out. You folks who are out of the regular cherry country can grow these new hybrid bush cherries and enjoy the fruit just as much as you would regular cherries. would regular cherries.

A3345 BROOKS. Dark red fruit, almost as large as regular cherries. Bear heavily the second year from planting. Bush is compact and shapely. 1.49 each; 3 for 4.19,

as 43444-BLACK BEAUTY. This is the newest selection of the bush cherry. The fruits are a very dark, glossy, black maroon-red. Almost as large as tree cherries. Fruit is dark red from the skin right to the pit. Fine eating and fine for canning pies. 1.49 each; 3 for 4.19, postpaid.

A3346 SIOUX. Extremely large cherries —%" or better across. Purplish black, shiny with greenish flesh. Juicy and sweet. In the vicinity of Minnesota this cherry fruits about the second week in August—earlier is south of there. 1.49 each; 3 for 4.19, posta paid.

A3347 GOLDEN BOY. The cherries are large and a bright, golden yellow. Mild and tasty on clean growing bush. You certainly will enjoy them. 1.75 each; 3 for 4.95, postpaid.

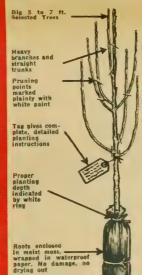

A3343 AMBER GIRL. A most unusual motion one. The large cherries are limpid amber and are delicious eaten fresh or cooked. A sister to Golden Boy. 1.75 each; 3 for 4.95, postpaid.

Henry DELUXE GRADE of FRUIT TREES FASTER GROWING. BETTER SHAPED, QUICKER BEARING

When you buy a fruit tree, you make a long-time investment. The chances are that you will buy fruit trees only 3 to 4 times in your whole lifetime. So it makes sense to get the best when you do buy, and it really is cheaper in the long run. (They don't cost very much to begin with.)

Here is what you get when you order Henry Field's DeLuxe Grade

of fruit trees:

1 You not only get big 5- to 7-foot size trees, but the very finest of this big size—trees well branched, with heavy root systems and straight trunks. (On cherry trees, the size is 4- to

FRUIT TREES

Roots of the trees are specially wrapped in moist sphagnum moss held around the roots by a heavy grade of water-proof paper that keeps the moisture in, the air out. This keeps the trees in a live, growing condition.

Proper, easy-to-follow pruning points are painted in white on the branches of the trees so you will know just where to trim it when you plant. This makes it easy for you to do an expert pruning job, which results not only in a better looking tree but one that will live longer and produce more fruit.

A white ring is painted around the trunk to indicate the proper planting depth.

5 Attached to the tree is a permanent, metal, non-choking label so you always know the names of the different trees you plant.

6 Complete, simple directions on the best way to handle the trees from the time they reach you until they are planted are given on a big bag tied to every tree.

an ordinary grade of fruit tree, a good tree and a good buy for the money. But compare it to the DeLuxe Grade to its left. The DeLuxe Grade is an especially selected tree of a heavier caliper, better shape, with more branches. The roots are heavier, and enclosed in moist moss. Such a tree will grow faster, bear sooner, and is easier to plant properly.

NEW WHITE PORTLAND

A1825 — We know that you will like this one. One of the first to ripen (a few days before Fredonia) and before Fredonia; and larger and sweeter than any other white grape. Delicious, rich, spicy flavor. Fine for eating off the vine. Plant is vigorous, hardy, productive and healthy.
79c each; 2 for 1.48;
6 for 3.89, postpaid.

NIAGARA

The Popular White Grape

A1818—This is the most popular "white" grape; holds the rank among grapes of this color that Concord maintains

Concord maintains among black varieties. Highest quality. Excellent eating grape. Clusters very compact with many grapes in each one. 50c each; 2 for 84c; 26 for 2.28; 12 for 3.84; 25 for 6.25, nostnaid

postpaid.

FREDONIA 2 Weeks Ahead of Concord

of Concord

A1808 — The grape
we have all been
searching for. Experts say it will be
one of the leading
varieties in a few
years due to its high
quality and early
rinening date Bir quality and early ripening date. Big, compact clusters of black grapes. 2 weeks ahead of Concord. anead of Concord. 50c each; 2 for 84c; 6 for 2.28; 12 for 3.84; 25 for 6.25, nestraid

RED CACO

A1803—A bigger, red grape with a better, sweeter flavor. Always loaded even ter. in the hottest sum mer. Makes finest red jell. Don't fail to plant Caco. Clusters about caco. Clusters about for inches long. Do not pick for eating until dead ripe. 50c each; 2 for 84c; 6 for 2.28; 12 for 3.84; 25 for 6.25, ppd.

MOORE'S EARLY

A1814 — Very early, rich black variety always loaded and always enjoyed, first mammoth clusters taste so good picked right from the healthy, vigorous vines. Does well over the middle west. Fruit very large. 50c each; 2 for 84c; 6 for 2.28; 12 for 3.84; 25 for 6.25, postpaid.

CONCORD

A1804 — You should have Concord if you can't plant any other variety. Fruit sweet and juicy. Rich blackish - purple. Vines always loaded. Never fails. Extra hardy. 45c each: 2 for 70c; 6 for 1.68; 12 for 2.64; 25 for 4.75; 100 for 16.50.

A1816-A miracle fruit. A big, golden California type grape that's hardy in the middle west. Big golden yellow, juicy grapes in immense long clusters. So sweet you have to taste them to believe it. 2-yr. plants. 98c each: 2 for 1.72: 6 for 4.68, postpaid.

Golden MUSCAT

BETA

A1801 — The hardiest grape we know. Grows in Minnesota without protection. Fine for arbors. Grows fast and arbors. Grows fast and bears heavy. Fruit not so large. Clusters very sound with a nice flavor—having the tang of a wild grape. Perfect for jams and jellies. 50c each; 2 for 84c; 6 for 2.28; 12 for 3.84; 25 for 6.25, nostnaid. postpaid.

TECUMSEH

TECUMSEH
Extra Hardy
Long Lived
Earliest of All
A3633—One of Dr. Hansen's best, and probably as
fine an eating plum as there
is. Ordinarily ripens in August. Trees are of modergust. Trees are of moderor the orchardist. Earliest
bearing of all, and hardy
clear up into Canada. The
fruit is a bright red with
builsh bloom. The fesh is

ATANLEY PRUNE
ASSI-HI you have shied
away from the prune
plums because of lack of
hardiness and poor growing, try this one. Begins
to bear in three years and
bears regularly. Large,
stone prunes of fine flavor
and firm flesh and the
trees around here are always loaded. Ripens in
ways loaded. Ripens in
mays retains its shape
and skin and processes a
deep wine-purple throughout.

V OPATA

A3623—Bears of-ten the year after planting. Reddish purple skin, yellow inside. Limbs are almost entirely hid-den by clusters of fruit—so heavy you must watch you don't break the limbs. Grows on any soil. Ripens July 10th.

UNDERWOOD

JUNDERWOOD
Giant Freestone
A3634 — (American
Type.) Was Henry's
favorite at his Ozark
farm. Bears regularly
and fruit is immense.
Ripens in July. Red
freestone, good to
look at and delicious
to eat. Hardy north
or south, even into
the Dakotas and Canada.

WANETA

Hansen's Most Famous A3636—The most famous of all Han-sen's Hardy Hybrid plums. Fruit big, bright red outside and crisp, juicy, sweet yellow inside. Heavy bearing, surebearing, superhardy. You can't go wrong on this one.

Henry Field's PLUMS

No fruit is quicker, heavier bearing, or surer bearing. Plant 18 ft. apart, 130 trees to the acre. It is well to plant two or more surer bearing. Plant 18 ft. apart, 130 trees to the acre. It is well to plant two or more varieties so they can cross pollinize. Ideal for chicken yard shade; do well there. Spray with Henry Field's Combination Fruit Spray—see page 57.

Henry Field Seed & Nursery Co., "MIDWEST'S LEADING SEEDHOUSE," Shenandoah, Iowa

HENRY FIELD'S AMAZING NEW EVERBEARING PEAR

(Patent Pending)

A3503—"Colette" pear is the most amazing fruit it has ever been our pleasure to see. The fact that it is everbearing is reas on enough alone to place it in a class by itself. But, in addition to that, it is, in our opinion, by far the most deliciously flavored pear on the market today. We predict that Colette will, when it becomes known, be the most popular of all home garden pears.

Colette is the first and only everbearing pear—it blooms at the normal blossoming time and then keeps on blooming and bearing new pears on the new growth for most of the sunmer. As a result, it ripens fruit over a long period in the fall. It is an ideal home, or backyard tree. The rich flavor of Colette makes it wonderful pear for canning.

The unusual flavor of Colette is hard to describe. It is firm, yet smooth-textured, juicy and sweet. It has no "grit," and does not rot at the core when fully ripe, as some pears do. We guarantee that you never have tasted a more delictors when the control of t

The size of the fruit is medium to large. Fruit from first crop begins to ripen in early fall, and continues on until freezing weather.

And if you like to surprise your friends and neighbors, this everbearing pear cer-tainly will do it!

tainly will do it!

so orders will be shipped
on first-come, first-served
basis.

A3518—LINCOLN. Most dependable pear for midwest. Large fruit of good quality, like a Bartlett, but trees are more blight resistant and can withstand terrific heat and cold. Heavy yearly bearer. Becoming more popular each year, both for home gardens and commercial orchards. Ripens in September.

A3502—BARTLETT. Grows well in every section of the country. Produces full crop every year and is a good grower. Handsome fruit are golden yellow with rich pink blush, wonderful flavor. Keeps and ships well. Best canning pear on the market. Ripens in Sept.

A3507—COVERT. One of the largest of all cultivated pears. Resembles Bartlett but is two months later. Canning and eating qualities excellent. Fruit clear yellow and borne in large quantities.

A3505—BEURRE DUMONT. We have added this variety because of its delicious quality as an eating pear—likewise canning. Its delectably sweet flavor, with a most delicious perfume, has few equals. Has been grown in Europe for more than a century. Fruit, as large as a Bartiett, borne late. Top early winter pear. Tree moderate in growth, productive.

A3532—SECKEL. Fruit authorities say this is one of America's best quality, finest flavored pears. The most vigorous (not largest), productive, and resistant to blight of any high quality pear. Small, sweet fruit and lots of it. One of the best for home planting and very profitable commercially. Ripens in October.

Pears grow upright, take little space, and are always loaded. Plant both summer and winter pears. 16 feet apart, about 170 trees to acre. Wrap fruit of winter pears in paper and save for midwinter eating.

CARDINAL CRAB APPLE

A3083—(Red Fleshed Crab). A beautiful ornamental with deep pink flowers and wide spreading branches. Bears delicious, large crab apples that are red to the core. Makes wine-red jelly of delicious flavor. Early bearing.

DOLGO CRAB APPLE

A3019—Probably the finest for canning whole, or pickling, and for jelly and sauce. Also one of the most beautiful. A well-shaped tree having snowy-white blossoms and gleaming red fruit. Bears young and regularly. A Prof. Hansen introduction. Extremely hardy, too.

RED SILVER

A3082—A gorgeous tree that actually outshines

the famous Japanese Cherries in beauty. Has cut-leaved bronzy-green foliage beautifully suffused with silver. The flowers are a showy crimson. The fruit is a rich maroon-red—high-ly ornamental—and unsurpassed for jellies and preserves. A tree so beautiful that passersby stop and stare at it.

ALMEY CRAB APPLE

A3001—A new and very beautiful crab apple tree from Canada. Has unusually bright, rose-red flowers, each with a white star at its center. 3 to 4-ft. size, 1.98 each, ppd. 4 to 6-ft. size, 2.65 each, express not prepaid.

HOPA CRAB APPLE

A3040—Most popular of all flowering crab ap-ples. Completely cov-ered in the spring with

FLOWERING CRAB APPLES

bright pink, fragrant blossoms. From late summer far into freez-ing time, the branches are covered with tiny apples that make tasty jelly.

SUNDOG CRAB APPLE

A3090—This is the columnar-growing crab, a new origination from the Dominion Experiment Station at Morden, Manitoba, Canada, Grows like, and can take the place of, Lombardy Poplar. Large mauve pink flowers. Just the ornamental tree for the suburban yard, or any place where an upright growing tree is preferred. 4 to 6-ft. size, 2.85 each, express not prepaid.

Healthy . . . Heavy-Bearing . . . True to Name

All Henry Field apple trees are heavy caliper, strong, straight trees with heavy roots. We grow our own apple trees and know they are good, free from disease, and true to name.

Statement of Inspection for Trueness-to-Name

To Whom It May Concern:
This is to acknowledge that all of the salable apple trees now growing in the nursery of the Henry Field Seed and Nursery Co. at Shenandoah, lowa are, to the best of my knowledge, true to name as they now stand in the nursery rows. (Signed) A. E. Cott

lowa Trueness-to-Name Iden-tification Service, Sponsored by The Iowa State Horticul-tural Society.

Nothing is more discouraging than to discover, after 4 or 5 years, that an apple tree is not the variety you thought it was. Why take chances? Plant Henry Field's apple trees and be

About Pollination

In most towns and city suburbs, there are enough apple trees to as-sure proper pollination. But out in the country, better plant two or more different varieties.

About Spraying

Now spraying is easy, thanks to Henry Field's Combination Fruit Spray See page 57 for details of this easy to-use spray.

HENRY FIELD'S LOW APPLE PRICES

Fall Apple—ANOKA

Bears First Year

A3000—Often bears first year after
planting—if not, the second for sure.

Stands cold like an Eskimo. Thin-skinned; fine for home use. Tree never gets very big. Fine for yard planting. Twin collection: A2657X—1 ca. of Anoka and Stayman Winesap, 1.29 (2 to 3 ft.), postpaid.

Winter Apple STAYMAN WINESAP

A3089—The largest Winesap, and the best. One of the best flavored and best keeping apples. With a little care keeps all winter and clear into April. Best from Iowa south, as fruit should have long season for best maturing.

The Yellow Early Summer App YELLOW TRANSPARENT

A3105—Excellent for both cooking and eating. Clear yellow, crisp and splendid flavor. Comes into bearing very early and is extremely hardy. One of the earliest ripening of all apples. Usually ready to pick by mid-July.

Late Fall and Winter MeINTOSH RED

A3064—We think this is the finest apple in the list. Bears for years and years. Beautiful large with darkers and of highest quality. Keeps well lint of the winter. Make mighty good cider and apple pie. Drouth and cold weather do not affect it.

Winter Apple-JONATHAN

A3047—Has a world-wide reputa-tion for being among the very best of all apples for appearance and quality. Ours is the deep red variety, good for cooking or eating. Keeps well so you can have good apples all winter.

Fall Apple—RED DUCHESS

ASO I Cooking Juicy Red Fruit
A302 I —America's choice early fall
apple. Fine cooking qualities. Makes
delicious pies or sauce. Almost solid
red in color, round in shape. A rood
hardy variety that seems to do well
everywhere.

Winter Apple YELLOW DELICIOUS

A3017—The great big, golden, bestof-all yellow apples. Wonderful flavor,
Bears young; thrifty, Beautifully
shaped and appearing, Fine for commercial orchardists and just as good
for the home garden. Good keeper,
Late fall and winter.

Winter Apple Henry Field's NEW DELAWINE

Henry Field's HARDY APPLES

best Stayman's Winesap. Wonderful texture. Healthy, hardy grower. Large spreading tree. texture. Healthy, hardy grower. Large spreading tree. 2-3 ft., i.00; 3 for 2.79; 5 for 4.49, ppd. 3-4 ft., i.25; 3 for 3.49; 5 for 5.19, ppd.

RED DELICIOUS

A3016—The improved, early-coloring, big Red Delicious with crisp, fragrant flesh and fine flavor. Increases in size and color as tree grows older, Always brings a premium on the market. A must for both back yard garden and orchard.

Winter Apple—Grimes Golden
With the Spicy Flovor
A3032—The tasty, yellow winter
apple. Beautiful, even, rich golden
color. Crisp and tender. Large size.
The finest yellow winter apple for
keeping: flavor seems to improve the
longer stored. Grows to perfection in
Missouri, Indiana and Illinois.

SNOW APPLE (Fameuse)

The Red and White-Fleshed Early Winter Apple
A3088—Few apples more refreshing or beautiful than Snow. Flesh snowywhite, stained with crimson. One of the finest eating apples. Is of Canadian origin and hardy as a rock.

→ Winter Apple—FIRESIDE

A3027—This is a coming apple—the super Delicious from University of Minn. Delicious will not grow well in the north but Fireside will. It is: (1) of better quality; (2) Hardy; (3) Tree large, vigorous and strongly branched; (4) Fruit large; (5) Keeps all winter; (6) Annual bearer.

The Popular WEALTHY

A3100—Always bears heavily. Ripens in September but is good 2 weeks before ripe. Indispensable in cold regions and valuable everywhere. Good for back yards and home orchards, as tree never gets very large. Stores well.

WHITNEY CRAB

A3101—Extra large fruit, for a crab apple, of excellent quality. This is the best of all crab apples for eating. Fine for preserves, pickling, jelly and apple butter. Good enough to eat right from the tree, too. Same prices as other apples.

A True Dwarf Apple for only 1.49

Delcon was originated by the Missouri State Experiment Station at Mountain Grove, Mo. Its parentage is Ben Davis, Jonathan and Delicious. It is a true dwarf with drooping branches. It was offered for sale for the first time in the United States in our March 1948 Seed Sense.

Some dwarf apple trees are made by multigrafting, a complicated process which is more expensive and when you end up you don't have much of a tree, and it has to sell for five or six dollars. But Delcon is a singlegraft, a true dwarf, a small tree (for easy picking) with full-sized apples, and we sell it for only 1.49, postpaid. Perfect for the back yard.

The fruit is fine grained, inicy, and has some of the flavor of both Delicious and Jonathan. It produces heavy at an early age, seldom needs thinning,

ripens about ten days before Delicious, and keeps well in storage. You ought to plant it.

Picture of young Deicon apple tree

No. A3015-2-3 foot size, 1.49 each; 3-4 foot size, 1.89 each, both ppd. 4-6 foot size, 2.19, exp. not ppd.

A Very Practical Tree for the Small Yard

A3114—These 5 choice varieties on one tree:

Red Delicious Yellow Delicious Stayman Winesap Anoka Yellow Transparent

You get apples all season long from this one tree.

Here's how a 5N1 tree happens—we take a good standard tree like an Anoka and graft the other varieties onto its limbs.

When you receive your 5N1, note the branches that are grafted and then don't let the other limbs crowd them out.

them out.

Fine heavy trees. 2.95 each; 2 for 5.69, express not prepaid.

Henry Field's HARDY CHRYSANTHEMUMS

We have long considered Chrysunthemums one of the best perennials, being easy to grow, hardy, free-blooming, colorful, and beautiful. Generally speaking they bloom from early September until severe frost comes, providing a wealth of blooms both in the garden and for boudons both in the garden and for boundaries of the same provided by the same provided the

(1) B1461—TAPESTRY (Bristol). A new combination of gorgeous shading. Opens gleaming rich pink, slow-ly softening to ashes-of-roses with golden flush. Flowers fully double and 3" across. Blooms early in Sept. 69c each; 3 for 1.89, ppd.

(2) B1429—LEE POWELL (Kraus). Another brand new Mum. Huge 4½" flowers like great masses of fluffy Chinese - yellow down. Stems long

down. Stems long and fine for cut-ting. Good grow-er. Mum of the year 1951. 69c each; 3 for 1.89, postpaid.

This is a cushion mum but with huge flowers of the most brilliant rouge-red we have ever seen. We guarantee you'll like this one. 59c each; 3 for 1.59, ppd.

(4) B1405—BETTY. A splendid, upright, bright rose-pink with large, firm flowers. One of the very finest of the pinks. 59c each; 3 for 1.59, ppd.

(5) B1443—PINK OPAL (Kraus) A gorgeous 1951 introduction of pale Persian-rose overlaid with cream tints. Large, fully double flowers measuring as much as 4" across, This is a beautiful mum. 69c each; 3 for 1.89, ppd.

(6) B1470—W HITE CLOUD.
Large 3" blooms of pure white with
a center of palest lemon-yellow.
Petals broad and attractive. Plants
grow 2" tall. We have tested many
white mums and,
without question,
this is the best
one we have
ever seen. 59c
each; 3 for
1.59, ppd.

(7) B1427— HUNTSMAN (Bristol). One of the most bril-liant mums we grow. Flowers

Leading NEW VARIETIES Collection

1 Pink Opal, outstanding pink
1 White Cloud, a great white
1 Huntsman, briliantly colored
1 Lee Yowell, finffy yellow
83146X—1 each of these four very
beautiful mums for only 2.19, postpaid.

about 2½ to 3". Solid double. Fine long stems for cutting. 69c each; 3 for 1.89, ppd.

(8) B1433—LUCKY 13. Brilliant dandelion-yellow. The plant is low-growing (18"), like a cushion Mum, and is loaded with 2" ball-shaped flowers. 79c each; 3 for 2.10, ppd. (9) B1402—CECIL BEED. A fine, new, bright-lavender-pink with the tips of the petals touched with gold. Fully double flowers 2½ across produced in abundance on long stems. A really fine Mum. 59c each; 3 for 1.59, ppd.

(10) B1452—SCARLET CRIMSON.
Fine large double crimson, bordering on scarlet. One of the best of its color we have ever seen. Fully double flowers are 3" across and borne in great numbers on a medium high, bushy plant. 59c each; 3 for 1.59 pod.

opd.

(11) B1421—DU-BON-A. A new variety. Rich wine-purple 4" flowers are very showy. Bushy plant 2' high. Lots of large blooms on long stems. 69c each; 3 for 1.89, ppd.

69c each; 3 for 1.89, ppu.

(12) 81432 — FLAXEN BEAUIY

(Bristol). 4" blooms that look like huge flaxen-colored Cactus Dahlas. beautifully blenued with soft coral, gold, and broad. 19c each; 3 for (20") and broad. 59c each; 3 for

1.59, ppd.

BI419 — FUCHSIA FAIRY (illustrated at far left). Mass of 1" flat, fully double, fuchsia-colored flowers. This little mum, because of its attractive color and profusion of bloom, is one of the best we have. 59c each; 3 for 1.59, ppd.

B1400—BONFIRE (illustrated at far left). Brilliant, solid double pompon flowers 1½ to 2" across borne in masses on tall stems. Rather late blooming. 59c each; 3 for 1.59, ppd.

Large, Hardy "Football Mums" B3125X-These varieties have flowers that measure 4 inches or more across. 2 Lee Powell, 2 Flaxen Beauty, 2 Du-Bon-A— all 6 for only 2.98, postpaid.

to plant and sure to grow. Secondly, Henry Field's have a sensationally new and better way of growing pot-grown mums. They are not grown in dirt because dirt dries out in shipment, falls away from the roots so that they dry out and get broken. We grow and ship Henry Field mums in a special, light-weight, fibrous material that soaks up the moisture and liquid fertilizer we add to it while it is growing and again immediately before shipping. This material holds this moisture and fertilizer in shipment. It clings closely around the roots, protecting them from damage and air—keeps the plant alive and growing even while it is on its way

Here's Why Henry Field Mums

Are Better Two Ways

First, they are individually pot-grown. They are not just last year's field-grown plants stored over winter. Often such

plants are not in good condition when spring comes. Our plants are pot-grown

young Chrysanthemums all ready for you

This material doesn't fall away from the roots and you don't remove it. Plant it right in the ground—it has enough fertilizer in it to carry the plant through half the summer on poor soil, and the entire season on good soil.

Any mum plant you get from Henry Field's is a healthy, husky, pot-grown plant that has never suffered damage or shock in shipping or transplanting.

to you!

And you get Henry Field's "two-ways better" mums at no extra cost!

Mum potted in dirt as is commonly done. Smaller, less vigorous when shipped, is arrives in your hands dried out, often broken. Chances are it won't grow into a good plant for you.

New Pacific Northwest Hybrids of Dazzling Beauty

AURELIAN HYBRIDS

B5000—Wide, flaring reflex trumpet lilies in

beautiful combinations of colors, including gor-

geous sunburst effects.

more across (make beautiful corsages!) and, as

Flowers are all 6"

YELLOW TRUMPET AURELIAN HYBRID

B5037-These lilies B5037—These illies are from the same seedling strain as the spike of blooms that won the Griffith Cup and the Sweepstakes Award at the 1950 National Lily Show, and the "Award of Merit" at the 1951 show. Grow much like Regal lily but with stronger stems, and larger trumpets of beautiful shades of clear yellow and apricot. 2.00 each; 3 for 5.98, ppd.

PINK TRUMPET AURELIAN HYBRID

B5020-We have only about 100 of these this year. What shall we do if we're all out when you send in your fall? Substitute lilies of like value? Or refund your money? Let us know when you order. 2.75 each, ppd.

orange centers—and a wide variety of combinations of these colors. Vigorous growing, reaching 4 to 5' in height, with 20 to 25 flowers to a stem. 2.25 each.

REGAL LILY

B5027 - America's favorite hardy lily. Large pure white flowers tinged lightly with lilac outside and yellow inside. 10 or more blooms per stem. Plant 7 to 8 in. deep. 35c each; 3 for 79c; 5 for 1.19, ppd.

they form magnificent clumps of beautiful clumps of beautiful flowers. Plant 6" deep 1.69 each; 3 for 4.98,

SUPERBA HYBRIDS SUPERSA HYBRIDS
B5032—These are outstanding selections resulting from Mr. Yerex's
development of Aurelian
Hybrids. The colorings
are white with golden
centers, white with apricot centers, apricot with
orange centers—and a
wide variety of comhypations of these col-

CORAL LILY

B5005 - (Tenuifolium.) The most bril-liant. Narrow-leaved, slender-growing lily from Siberia. Many deep scarlet, waxen recurved flowers on each plant. Grows in poorest soil. Plant 4 to 6 in. deep. 29c each; 3 for 75c; 5 for 1.19, postpaid.

The lilies Superba, Pink Trumpet, Yellow Trumpet, Aurelian Hybrids, and Eventide, are from a group resulting from more than fifteen years of skillful, patient crossing by Mr. Carleton Yerex in the Pacific Northwest.

Mr. Carleton Yerex in the Pacific Northwest.

We have visited Mr. Yerex's place many times, and the littles he has there are astounding. We first planted tnese littles here in Shenandoah in the fall of 1949, i hey are perfectly hardy and as easily grown as any other plant. Some grow stems higher than our head, and they are topped by great clumps of magnificent, beautiful blooms. They are without a question the most beautiful illies in the world today. One of the seeding Yellow Trumpet Aurelians won the Griffith Cup and Sweepstakes Award at the 1950 National Lily Show, and a seedling from this same strain won the "Award Merit" at the 1951 national show. Yet they are so easy to grow that anyone can grow them well.

FIELD'S BEAUTIFUL LILY COLLECTION

B3461X—We don't know where you could get more flower value for your money than right here. I Rainbow Hybrid, I Gold Banded Lily, I Pink Show Lily, and I New Centifolium Hybrid Lily—all 4 for only 2.39, postpaid.

NEW Rainbow Hybrid LILIES

These are big, brilliantly-colored, new hybrids from the west coast. Not only are they gorgeous but, since they have a lot of umbellatum, or Flame Lily, parentage, they are one of the most fool-proof, absolutely hardy lilies we know of. Grow anywhere. Run from palest straw yellow to deepest gold with lots of maroons and deep reds—and sometimes with all these colors in one blossom. Long, tall stems. The best part is we don't have to sell them for \$4 or \$5 apiece. These are our low prices: \$5025—59ceach; 3 for 1.49; 6 for 2.25, ppd.

Henry Field's

EVENTIDE

Brand New Yerex Lily
B5008 — We were not able to picture this brand new variety as Mr. Yerex, its originator, did not release it to us until too late to illustrate in this catalog. It is a breath-taking lily with flowers about five inches across, Color is rich cream overlaid is rich cream overlaid with saffron and blending to a deep sunburst at the center. When established, carries large heads of many semi-recurved flowers. 4.98 each.

PINK SHOW LILY

B5030 — (Speciosum Rubrum). Flowers 4" across are carmine red on a white background with crims on spots. Blooms profusely; very hardy. Plant 7 to 8 in ches deep. 65c each; 3 for 1.79, ppd.

Hardy LILIES

FLAME LILY

B5011—(Red Russian).
One of the easiest of all garden lilies to grow.
Has large clusters of blooms. Plant 6 to 8 inches deep. 35c each; 3 for 80c; 5 for 1.29, postpaid.

DOUBLE TIGER LILY

booste ficer lity
brilliant, orange-red
flowers with purplishblack dots. This is the
double variety, not the
single. Very hardy and
easy to grow. Plant 8
to 9 inches deep. 35c
each; 3 for 79c; 5 for
1.19, ppd.

GOLD BANDED LILY

B5012 — (Lilium Auratum). One of the most beautiful of all lilies; has been bred and admired for centuries. Plant 9 inches deep; do not use lime. 75c each; 3 for 1.89, ppd.

ESTATE LILY The Outdoor Easter Lily

B5010 - Now you can "Easter Lilies" grow your own back yard. A true type, long trumpet lily with flowers as deli-cate and wonderful and fragrant as \$3.00 to \$5.00 greenhouse-grown ones Plant this spring and have blooms this summer and year in and year out thereafter Grows 21/2 to 3 feet tall when established. 49 c each; 3 for 1.35; 5 for 2.10, postpaid.

BARGAIN LILY COLLECTION

B3457X—One each of Flame Lily, Pink Show Lily, Coral Lily, Regal Lily, and Estate Lily—all 5 for only 1.98, ppd.

NEW! HYBRID CENTIFOLIUM LILY

These are magnificent pure white hybrids from the West Coast, perfected after over 15 years of hybridizing. They are the result of crossing of a half dozen or more lilies, and they far outshine the Regal Lily in every respect. After several years of growth, they reach a height of 6 to 8 feet with great clusters of 50 or more blossoms crowning the top.

top.
The flowers are shaped like broad flaring trumpets, as you can see in the picture, and are pure white inside. The reverse of

the petals are often pink, emer ald green, or brown, making some striking contrasts in color.

striking contrasts in color.

These lilies are exceedingly hardy, growing and blooming beautifully indoors. Because of their deep root system, they stand severe drouth well. Plant 6 inches

ep: They are called Lilium Centifo-im (Hundred Leaved) because their abundant, rich green

Henry Field's

"20 GRAND"

Glad

Collection

"The Queen of Flowers"

Gladiolus are very aptly called the "Queen of Flowers." They are the most universally grown of all flowers, doing well practically anywhere, in all sorts of climates. No other flower offers such a wide variety of beautiful colors, including the scarce blues and laven-ders. They give you a great deal for your money.

Glads Are Easy to Grow All gladiolus ask is ordinary "potato" care, fairly rich, well-drained garden soil, and full sunshine. Set bulbs 4 inches deep—a little deeper in loose, sandy soil. Every 10 days make additional plantings up to July 1 and you will have blooms coming on all summer and fall. summer and fall.

summer and fall.
Here at Field's we grow hundreds of varieties of glads. The varieties listed here are the pick of all of them. All Henry Field glads are state inspected. All are virgorous.

DAHLIAS **Illustrated at left**

DAHLIAS ARE EASY TO GROW

Plant dahlia tubers after the soil warms up (corn planting time). Set them about 5 inches deep, space 3 feet apart. When the third set of leaves appears, pinch feet apart. When the third set of leaves appears, pinch off the top. This encourages branching and will make a well-balanced, bushy plant. Dahlias like full sun, rich, well-drained soil, and just ordinary "potato care."

RAINBOW DAHLIA COLLECTION

BG559X-Seems like bread and jam never come out even, and we never grow just the right number never grow just the right number of a variety. Always come out long on some. These "surplus" kinds go into this collection. You get mixed colors and kinds. All are large, first-quality roots and guaranteed to please. You really get a lot for your money! Collection of 4 for 98c; 2 collections 1.75, ppd.

really hardy Red Weigels—
lives through 20 below zero
where the older variety Eva
Rathke will kill out entirely.
Bright rosy-red bell-like flowers cover the plant from June
till frost. The new plants
you set out this spring will
bloom this summer. 1,10
each; 3 for 2.98, ppd.

Two Beautiful DEUTZIAS

PRIDE OF ROCHESTER—Tall

A1423—Grows 6 to 8 feet tall and has pure white, bell-shaped flowers all up and down the upright stems in June. Extra hardy with attractive, pointed, light green leaves. Extra Se-lect plants, 49c each; 3 for 1.29; 5 for 1.98, ppd.

GRACILIS-**Short**A1422—2 to 3 ft. Low

growing type of this hardy shrub. You can hardly see the pretty foliage in June for the lovely white blooms. Plant with Spirea Anthony Waterer for low groups. Extra Select plants, 69c each; 3 for 1.79, ppd.

Carnation-Flowered Dwarf POMEGRANATE

romegranate

A1475—One of the prettiest, cleanest shrubs we have ever seen. Grows only 3 to 4 ft. high. Has fresh, bronzy, green leaves and big, double flowers like brilliant scarlet carnations. Bears small, showy pomegranates in fall and winter. In colder sections, may lose its leaves briefly in mid-winter. Will stand frost down to 15 degrees above zero. Loves full sun and good soil but does well under dry desert conditions. 89c each; 3 for 2.59, ppd.

William Toovey Crape Myrtle.....

A1420—This new variety is the very finest of all Crape Myrtle. It always remains neat and compact in growth. The large flower clusters are solid masses of beautiful deep watermelon red blossoms.

Even the young, small plants are covered with bloom. This new variety still is very scarce so you won't find it in many catalogs. We're glad to have it for you. 89c each; 3 for 2.49, postpaid.

TIPS ON LAWN CARE

For the New Lawn

For the New Lawn

Fortunately, grass seed is not harmed by cold weather, even freezes. That means you can get the new lawn planted early, long before you can plant most flowers. And you should do so because the weeds are loafers and come up late. That gives the early planted lawn a chance to get going while the weeds are still sleeping. So don't hesitate to start even before all the frost has left the ground. A late thin snow even helps. Many prefer to sow on a late enow, excepting on steep terraces where the melting snow may carry the seed away.

So sow early if you can. Get the jump on the weeds, get the lawn well established before the hot, dry weather comes. 'Grass seed will not germinate during hot weather.

To do the job right, first work the soil. Spade it.

during hot weather.

To do the job right, first work the soil. Spade it, or if the area is large, have it plowed, disced or harrowed. If you are going to use fertilizer, do it now. Then rake it in as you smooth the surface.

Unless otherwise directed, sow at least 1 lb. of seed per 200 square feet. Broadcast the seed by hand, or use a hand seeder. Divide the seed into two parts—sow one-half in one direction; the other half at right angles to the first. This gives more uniform coverage. Then thoroughly rake the seed into the top soil and roll to firm up the seed bed. Don't roll when the soil is too wet. Wait until the soil is free of frost, but not sticky.

Caring for Lawn

Don't mow a new lawn until the grass is 2 or 3 inches high. After that, mow only after the grass has grown at least an inch after last mowing. Don't ever mow too close. Don't mow too often in hot, dry weather. And let the grass go into the winter 2 or 3 inches high.

2 or 3 inches high.

About watering, when you do water, do a soaking job and do it less often. If you just sprinkle a lawn, wetting only the top of the soil, the roots come up to get the moisture. That makes them susceptible to further drying out. Water deep, and the roots go down, as they should. Deep rooted grass stands more drouth and more foot traffic. Don't be afraid to water in the day time, even in full sun. Some people also think chlorine or other chemicals in water will harm a lawn. If the water is fit for human consumption, it won't hurt the lawn.

About weeds, the best insurance against them is a healthy stand of grass to crowd them out. Sowing early and moving high also are good insurance. But if your lawn needs some help in combating weeds, try the weed killers listed on page 54 of this

Repairing Old Lawn

Repairing Old Lawn

To thicken the grass of an old lawn, sow 1 lb. of seed for every 400 square feet. For bare spots, work the soil and sow just like for a new lawn.

There are several reasons for "bald spots" in lawns, but the most common cause is lack of moisture and fertility. The grass is starving. The cure usually is a good fertilizer, particularly one high in nitrogen. Bald spots under trees usually are caused because the grass can't compete with the tree roots for the food and water, not by the shade. Very few trees have shade so dense grass won't grow under them if the soil has proper fertility.

About Terraces and Shady Spots

If you have a terrace that is so steep that it is difficult to mow, or one where the grass washes out, consider these:

out, consider these:

Hall's Honeysuckle. Listed on page 75 of this catalog. Will grow in full sun.

Baltic lvy. Listed on page 75 of this catalog. This is the one to use on the shaded terrace, where it thrives. In fact, it requires shade for good

Andorra Juniper Evergreen. Listed of this catalog. It is a low, spreadin that covers well and stops soil erosion, in sun or partial shade. Listed on page 68 ding evergreen on. Grows well

A good lawn like this does just as much to improve the ap-arance of your place as trees or shrubs or a new coat of lint. It is much easier to establish a good new lawn, or

keep an old one in proper condition, if you use the proper lawn seed. Choose from this page the lawn grass seed that best fits your need—all of it is good clean seed of tested germination.

All Henry Field LAWN GRASS SEED IS HORMONE TREATED

Henry Field's Hormone Treated Lawn Seed will give you a Henry Field's Hormone Treated Lawn Seed will give you a healthier, more drouth-resistant, greener, more permanent lawn than untreated seed will. The hormone treatment causes more seeds to grow and makes them more resistant to "damping off" and other soil-borne diseases. It promotes deeper root growth, which makes a heavier lawn more able to stand drouth. And you get these advantages at no extra cent to you cost to you.

A home is only as beautiful as its lawn. The most expensive house doesn't look right with a poor lawn, and the most humble home is attractive with a good lawn. And compared with today's high building costs, the cost of. a good lawn is very low. Just start with the right lawn grass

Sensational New MERION BLUE GRASS

Finest of all Lawn Grasses

Merion Blue Grass-is the finest of all lawn grasses—bar none. The lawn it produces is beautiful, thick, velvety smooth and dark green in color. And, unlike most lawn grasses, Merion holds its lush green color even in hot, dry summer months!

Here, in short are the main advantages of this outstanding lawn

grass:
(1) Has an excellent dark green color and appearance.
(2) Is highly resistant to heat and drouth—stays lush green even in the hottest, driest weather.
(3) Helps crowd out Crabgrass and other weeds.
(4) Has high resistance to leaf spot and

(4) Has high resistance to leaf spot and other diseases.
(5) Requires less mowing.
(6) You use less seed when planting because the plants spread fast.
We know that Merion is every bit as good as we say it is. We planted a new lawn of it behind our Seedhouse, and in just one year's time, the lawn was as thick as a carpet, healthy and beautiful. The lawn looked to be at least four or five years old!

If you want some of this finest of all lawn grasses, place your order soon. As you can expect, there is a terrific demand for this grass. We sold out early last year and the crop is even shorter this year. Merion goes more than twice as far as other lawn grasses, so when determining your needs, figure 1 pound of Merion to 750 sq. feet of lawn surface.

10 lbs. 42.50, postpaid. Supply limited.

MERION BLUEGRASS MIXTURE

Our Best Lawn Mixture

The best lawn mixture we've ever offered. 100% perennial grasses. Contains: 30% Merion Bluegrass-finest of all Bluegrass, 50% Creeping Fescue-to thicken turf, 10% Highland Bent Grass -most disease and drouth tolerant of all Bents, and 10% Red Top-for thin soils and to act as nurse crop. The seed in this mixture goes more than twice as far as most lawn mixtures, so figure 1 lb. per 750 sq. ft. 1 lb. 2.65; 3 lbs. 7.80; 5 lbs. 11.85; 10 lbs. 23.50, postpaid. Supply limited.

Sun Cured KENTUCKY BLUE GRASS

Just what you need for patching up the old lawn or for starting out a new one. This is new crop Kentucky Blue Grass—not a mix-round to-goodness, pure Kentucky Blue Grass—which will make a bright green lawn or pasture for you all season long. FERTILIZERS—PLANT FOODS—MULCHING and Other Plant Growth Helps

Plants Get Hungry, Too-Feed GREEN THUMB Liquid PLANT FOODS

Easy to Use—Just Like Watering

Since we listed Green Thumb in our catalog six years ago, we have received hundreds of letters from our customers telling us how clean and easy it is to use, and how much good it did their lawn and shrubs and trees and flowers and vegetables and house plants.

Costs Less

One package of 16 ounces makes 30 gallons of liquid fertilizer. Directions on container tell how much to use for various plants, and your lawn, and you'll be surprised how little it costs to fer-tilize with Green Thumb.

Goes to Work Right NOW!

You just mix 1 tablespoonful with a gallon of water and you have liquid plant foods—a clear, green liquid—odorless and non-poisonous—and it contains the nutrition growing things need. And, being liquid, it goes directly

to the roots so the plants perk up right

No Mess-No Mixing-No Digging

If your plants get hungry and sickly, with yellowish leaves, stunted growth, small fruit and colorless flowers, they need food and water and cultivation. Now you can spend hours fertilizing these hungry plants, or you can use Green Thumb and do a good job in a short time. And we don't know of anything better for starting newly planted things off right.

GREEN THUMB is composed of important plant nutrients, plus Vitamin B-1, in a solution which is immediately available to the roots of hungry trees and plants. In a matter of days, you can see results.

4021—SEMESAN BEL-For treating potatoes to help reduce scab and Rhizoctonia, ring rot, bacterial wilt, stem rot, seed-piece decay, etc., thereby increasing yield. Quick and easy. 2 oz. treats 7½ bu. seed at about 4½c bu. 2 oz. pkg. 50c, postpaid.

GROW-AID

The Sensational Seed and Plant Stimulant

Hormone-Vitamin Concentrate

Here is the miraculous seed and plant stimulant in concentrated form. A combination of the recently discovered, very beneficial root stimulating Hormones and the better known vitamins that have made plants and seeds GROW FASTER, YIELD MORE, AND PRODUCE LARGER FLOWERS AND FRUITS. Tests by state colleges everywhere approve it. In one test, Dr. J. C. Ireland of Oklahoma Experiment station showed increases of 37 to 47% in yield when used on corn. Often, number of roots on a plant are doubled when GROW-AID is used.

This miraculous dust multiplies roots, speeds up root growth and imulates and makes larger plants when used on vegetables, plants, trubs, seedlings, trees, or flowers.

A sample of how "GROW-AID" proves plants it is used on.

PRICES

4018

3 oz. (enough for large garden and plants) 1.00, postpaid.

½ oz. (enough for the average garden and plants) 25c, postpaid.

USE AS DUST OR SOLUTION-Very Easy to Use

Can be used either as a dust on seed-ling roots or sprinkled on your vege-table seeds, or may be used as a solu-tion (about 1 teaspoonful to a gallon of water) to soak roots before plant-ing or to water plants already estab-lished. FULL INSTRUCTIONS FOR USE on Seeds, Plants, etc. on each package.

Use It on All Your Plants and Seeds for Better Results

- 1. Dust it on flower or vegetable seeds before planting.
- 2. Soak nursery stock roots in solution before planting.
- 3. Dust Seedling roots before transplanting. 4. Use as spray for fruit trees. KEEPS APPLES ON TREES UNTIL RIPE.
- 5. Use as solution to water growing SHRUBS AND TREES. 6. Use as solution to water HOUSE PLANTS.
- 7. Use as solution to water ROSES, SHRUBS, LAWN. A general—allaround product every gardener should have.

Henry Field's Improved BUG DUST The Famous All-Purpose Insecticide Dust

Almost a "Miracle"

You really won't believe how good our Bug Dust works until you see it work your-self. Some folks call it a

"Miracle Dust."

3-Way Action

Bug Dust works three ways. not only is a stomach poison but a contact poison and fungicide— all in one dust.

all in one dust.

No need to buy three dusts—use our "Bug Dust."

Henry Field's Bug Dust does not harm even the most delicate plants when used as directed. Absolutely leaves no poisonous residue.

Absolutely Guaranteed

Our reputation as a Seed and Nursery house for over 50 years is behind "Bug Dust." It does what we say or your money back. No arguments.

Sold Only by Henry Field's

Our "Bug Dust" is for sale only one place in the United States and that's right here. Beware of imitations. Our for-

mula is good, as thousands know. Others may not be.

New 1954 Formula Makes Our Dust So Powerful

The powerful ingredients in our new 1954 formula make Henry Field's Bug Dust the best multi-purpose dust we have ever offered. One of its most powerful ingre-

One of its most powerful ingredients is Rotenone, a contact and stomach insecticide from South America. Many years ago the natives there discovered that when the roots of certain plants were crushed in a stream, fish in the stream would be temporarily poisoned and come to the surface in great numbers.

The Rotenone we use if a reserved.

great numbers.

The Rotenone we use is a refined product of these same South American plants. It is largely responsible for the effectiveness of Henry Field's Bug Dust.

Another powerful ingredient used in our Bug Dust is Lethane. It gives effective help in the control of flea beetle, tomato horn worm, Colorado potato beetle, Mexican bean beetle, cabbage worm, cabbage flea beetle, cucumber beetle and many other pests.

STOP-GRASS—Keeps Grass Short

Sensational New WARFARIN

We think this is the very best rat and mouse poison on the market. Warfarin was first released in 1950 by the Wisc. Alumni Research Foundation. It since has been put on the market widely under several different brand names.

Warfarin is so effective because it is an anti-oagulant, objective because it is an anti-oagulant, objective because it is an anti-oagulant, objective to death internally. The rats die slowly and painlessly—but surely! It is a better rodenticide for these 4 reasons:

1. It is much less dangerous to humans, livestock, pets and poultry.

2. You don't have to bother with two

2. You don't have to bother with two different poisons. Warfarin gets both rats and mice.

and mice.

3. Warfarin is odorless and tasteless. Rodents do not develop "bait shyness."

4. Warfarin kills slowly; no dead and dying rats warn the rest of the colony. Warfarin has been thoroughly tested and the results are minaculous. It is recommended by state colleges and the lost for homes, schools, churches, hospitals, warehouses, office buildings, restaurants, etc.

We sell it in two forms:
(1) Warfarin Concentrate, which you

mix with bait such as laying mash, ground oats, or cornmeal.

Oats, or commeal.

4070—Warfarin Concentrate. 4-oz. can (makes 5 lbs. of bait), 1.75; 8-oz. can (makes 10 lbs. bait), 3.00, ppd.

(2) Ready-Mixed Warfarin, already mixed and ready for use.

4063-Ready-Mixed Warfarin. | lb. 98c; 5 lbs. 2.95, ppd.

Both are fully guaranteed. Simple directions come on each can.

RAT KILLER

Acts as stomach poison.

Gets them quick. Can't harm poultry or animals.

Large box (90 pieces) 50c; 2 for 95c, postpaid. Large box (90 pieces)

NEW PYRAMIDAL STRAWBERRY BED

Eight times as many strawberries can be produced in a pyramidal circular area 6 ft. in diameter

as in a similar ground area.

The bed is made of a series of aluminum bands filled with earth. The longest is bolted into a 6 ft. circle, placed on the ground

and filled with soil. Then four more bands of decreasing size are added and filled, each allowing an 8-in. terrace for plants.

A core of sand fills the bed down

to the bottom layer, making watering and fertilization simple. (Use a little Green Thumb Plant Food for ferti-lizer.) Any good soil mixed with peat

around, and along side
plants. Has a full length
handle, so you can stand
erect when using it.
Lightweight — weighs
only 24 ounces. Has a
tough, sharp blade with
7½" cutting edge and
½" point. You can hoe
with either edge. Fully
guaranteed. I.98, postpaid.

Tests Indicate Arasan Seed Disinfectant Increases Yields Up to 59%

Better stands of Alfalfa, clover, Kentucky Blue Grass and other small seeded legumes have been obtained by treating the seed with Arasan seed disinfectant before planting in tests at the DuPont Laboratory and at several state experiment stations.

Summary of 1951-52 field tests by DuPont showed increased stands after treatment with Arasan as follows: Alfalfa 32%: Red Clover 57%: Lespedeza 59%: Sudan 41%; misc. grasses 25%. Frequently the cause of poor stands in pastures is an obscure and seldom recognized disease. It is really a phase of root rot, which causes pre-emergence of it. However, by digging into the soli or examining the old vegetation, it often will be found that, although the seedlings were killed before the

HIGH WHEEL CULTIVATOR

4046—It's more fun to garden when you have a High Wheel Cultivator. Ten times easier and ten times faster than hoeing. Has 23" wheel and hardwood curved handles. Attachments are heat-treated carbon steel for long life. Complete with Moldboard Plow, 9" Sweep, and Double Pointed Shovel, 6.95 not ppd. Zone 2, add 99c postage; Zone 3, 1.21; Zone 4, 1.56.

SOOT DESTROYER

stoves, chimneys of soot and carbon. Does it easily, safely and inexpensively. Is a non-explosive p o wder for use in coal, soil or wood-burning furnaces, stoves, boilers, etc., and in chimneys. Merely put required amount into heating equipment when fire is going.

That's all there is to it. Guaranteed. 1-lb. can (enough for several normal cleanings), 65c; 3 1-lb. cans, 1.65, ppd.

BIRD BATHS

Here are the finest, most practical and most beautiful bird baths we have ever seen. Made of metal, strongly constructed and carefully enameled. Will last a lifetime. Come to you "knocked down" but are easily put together.

4096—Lawn Model. (Above left.) Has 3 legs, 8.95, ppd.

Sensational New Soil Conditioner

KRILIUM

Ross ROOT FEEDER

CYCLONE SEED SOWER

4082—Ideal for sowing alfalfa, timothy, clover, lespedeza, sudan grass, oats, wheat, or any other seed that is sown broadcast. Of strong construction. Has shoulder strap. Hand crank operates double feed, insuring a uniform flow of seed. Feed adjustment is automatic and starts or stops flow of seed instantly. 4.45, postpaid.

ALUMINUM TREE PROTECTORS

4076—Just the thing to stop rabbits from gnawing and girdling your young trees and shrubs, and to prevent sun scald. Made of sheets of aluminum 10 in. by 18 in. You just wrap them around the tree and crimp edges. Fit any ordinary-size young tree and last several seasons. Rabbits positively won't bother trees with these on. 25 for 1.65; 50 for 2.85; 100 for 4.45, postpaid.

NOW ONE SPRAY that you can use MOST ALL SEASON ON YOUR FRUIT TREES

No Need to Buy and Fuss with a Lot of Different Chemicals— Just Use HENRY FIELD'S COMBINATION FRUIT SPRAY for Fruits, Berries and Ornamentals.

HENRY FIELD'S new Combination Fruit Spray is a combination Insecticide and Fungicide, already mixed, and made especially for Fruit Trees and Berries. All you do is mix it in water and spray. You can use this one spray most all season.

EASY TO USE

The trouble with spraying fruit trees in the past has been that you had to buy a lot of different chemicals, and get a spray chart, and then try to figure out what to mix for each different fruit and different time of spraying. If you were a horticulturist or a chemist you might be able to do a good job. But it was a nuisance at best, and you were apt to get confused and disgusted and figure it wasn't worth the effort. And we can't say we really blamed you.

But with Henry Field's Combination Fruit spray, you buy just the one package and use it for different fruits at various times during the season. No guessing, no fussing around.

Another trouble with mixing your own spray is that usually you had some Lead Arsenate in it, or Bordeaux Mixture, and if you got too

much in the mixture, or sprayed too much on your trees, or used an apple tree mix on a peach tree for instance. you burned the foliage and ended up doing more harm than good.

Now, with Henry Field's Combination Fruit Spray, when used as directed, you will not harm fruit trees and it imparts no undesirable flavor to the fruit.

For Spraying Ornamentals, Too

You can use Henry Field's Combination Fruit Spray with benefit on most of your ornamental shrubs. It helps check red spiders on Evergreens and certain other insects and fungi that attack ornamental shrubs.

NO NEED to buy a lot of different chemicals and try to figure how to mix them. Just use Henry Field's Combination Fruit Spray on fruits and berries.

This

IS ALL YOU DO:

1. Mix Henry Field's Com-bination Fruit Spray with water. 2. Spray the tree or plant.

The formula for Henry Field's Combination Fruit Spray has been tested by some of the leading Experiment Stations. The results have been excel-

Now you can spray your fruit trees (even the tallest ones) and ornamental shrubs easily by using Henry Field's Combination Fruit Spray and a Trombone Sprayer. Or use an ordinary portable pump sprayer in case you already have

HERE IS WHAT IT DOES!

Henry Field's Combination Spray helps control these diseases:

Blotch Bitter Rot Brown Rot Cedar Rust Leaf Spot -and these insects:

Aphis Coddling Moth Bagworm Leaf Hoppers Curculio Oriental Fruit Leaf Rollers Moth Plant Lice Red Spiders Brown Mite All Fruit Mites European Red Mite Spruce Mite Poultry Mite

HOW TO USE:

Just mix with water and apply with any good sprayer. Do not use as a dust. Directions with each package tell you when to spray.

HOW MUCH TO ORDER

You use one pound Henry Field's Combination Fruit Spray with 12 gallons of water—enough to spray 3 average-sized fruit trees, 5 times during the season. Figure about half

Use according to directions on all of these:

Peach Gooseherries Plum Evergreens Raspberries and Black-Apple Nectarine Cherry berries

Quince

that much for young fruit trees not vet bearing.

LOW COST

Henry Field's Combination Fruit Spray makes it easier for you to get more and better apples and peaches and pears and plums and cherries and all the other fruits, and the increased production, and better fruit, more than pay for the spray. We have kept the price low because, frankly, we are more interested in seeing you get more and better fruit than in trying to make a lot of money off this spray.

GUARANTEED

We guarantee it to give satisfaction or we will refund your money. It makes good or we do. No arguments.

NOTICE: Henry Field's Combination Spray is best for your fruit trees, berries, Evergreens, Roses and orna-mental shrubs. But for your garden, Henry Field's Bug Dust is best

Some Questions and Answers About Henry Field's Combination Fruit Spray

Ever since we announced Henry Field's Combination Fruit Spray in our Spring 1950 Catalog, we have been almost swamped with orders for it. We knew that a great need existed for a spray of this kind, so we haven't been surprised. And a lot of our customers have been asking us questions about it, like these:

QUESTION: How do I use it?

Answer: Just mix it with water, at the rate of 1 pound to 12 gallons of water, and spray.

QUESTION: Do I use just this one spray on my fruit trees throughout the year?

Answer: Yes.

QUESTION: When do I use it?

Answer: At different times during the season, according to what you are sing it on. Directions on the package using it on. Di tell you when.

QUESTION: Can I use Henry Field's Combination Fruit Spray or grapes?

Answer: Yes. Spray when shoots are 6 to 10 inches long; again 2 weeks later just before bloom; again as soon as blooming is over; again 2 weeks later. Will cause slight leaf burn on tome varieties, but no permanent dam-

QUESTION: Can your new Combination Fruit Spray be used as a dormant spray?

Answer.

Manut spray?

Answer: We believe it gives sufficient control for the average back yard orchard, if used in late winter or very early spring BEFORE any buds start. After buds have started, it is too late. Commercial orchardists probably will want to use a dormant spray of lime-sulphur for 100% control of red mite.

QUESTION: Does this new spray take the place of Henry Field's Bug Dust?

Answer: No. Henry Field's Bug Dust is still best for your garden.

QUESTION: My plums have Brown Rot and are dried up and hanging on the trees. How can I get rid of Brown Rot?

Answer: Bury or burn the dried out fruit. Then spray the tree thoroughly with our Combination Fruit Spray according to directions.

QUESTION: Will your new Combination Fruit Spray burn or harm follows:

Answer: No. When used according to the simple directions, it will not burn, injure or harm foliage in any way, except for a slight inconsequential burning on some varieties of

QUESTION: We had a blight on our raspherry bushes last year and wonder if your new Combination Fruit Spray get rid of it?

Answer: Yes. Spray in late winter or early spring before buds start; again when green leaf buds first appear; again when first new shoots at base of plants are 2 to 4 in. high; again approximately 10 days before blooming begins. Discontinue spraying at least 40 days before harvest.

QUESTION: Can your Trombone Sprayer be used with a garden hose?

Answer: No. But it isn't necessary, because the Trombone Sprayer builds up its own pressure like a tire pump and shoots a fine mist or a 40-foot stream. It is well made of brass and copper and operates easily.

QUESTION: Can your Combination Fruit Spray be used on Evergreens for Red Spiders?

Answer: Yes. It also controls Bag-worm, Thrips, Leaf Rollers, Saw Fly and Aphis on evergreens. Just spray at 3 to 4 week intervals.

QUESTION: Can your new Spray

Answer: Yes. Apply when plants are in full foliage; again in midseason or when insects appear. Repeat when

QUESTION: Will it control Peach

Answer: Yes. Spray or paint trunks of apricot, peach, plum and nectarine trees from bottom or branches to ground. Uses 2 oz. of powder to 1 quart of water. Apply July 1, August 1 and

Has this new spray QUESTION: been thoroughly tested?

Answer: Yes, not only by us but by several leading midwestern colleges. All claims made for this spray, both in this catalog, and on the label on the bag, were approved by the U. S. Department of Agriculture.

QUESTION: Will I need a ladder to spray into the tops of fruit trees?

Answer: No. With the Trombone Sprayer it is easy to spray from the ground to the top of fruit trees.

HNDER-

5 for 1.25 Postpaid

6034-These are life-size wooden birds painted in bright colors like the real ones and fastened on a special long "twist-em" stem that you can wrap around shrubs or branches in your yard. They looked so life-like and real we put a bunch in our own trial grounds. We'll send one each of the 5-Oriole, Cardinal, Gold-Finch, Bluebird, and Tanager to you for only 1.25 postpaid. 2 collections 2.25 postpaid. They really will catch your eye. Make dandy

MOON SIGN BOOK

NOTE: Planting by moon signs has been argued pro and con for a long time. We are neither "for or against" planting by moon signs because we don't know. Lots of people believe in it and lots don't. If you do, here's the best book put out on the subject.

"PLANT BY THE MOON"

256 Pages
By Llewellyn George
Well-known Author and Lecturer Well-known Author and Lecturer 561—The Moon Sign Book gives complete instructions in the use of planetary influence on planting and harvesting, also business and personal affairs, etc., the result of more than thirty-five years of research. Why do farmers plant Potatoes in the dark of the moon? When should Corn, Beans, etc., be planted? Why florists plant seeds in the 2nd quarter and a certain Moon Sign? Why you should plant flowers in Libra on a certain date and Moon's phase? These and many other questions are answered and explained in a simplified yet scientific and practical manner. The Moon Sign Book has been published annually for over 39 years with sales increasing each year. A mine of useful information. Price 1.25 in the U.S.

How To Plant The Aquarium

(Balanced—Unnecessary to Change the Water)

First make sure the size of your aquarium, then find a collection (below on this page) for your size.

SAND . Place two inches of clean, common lumberyard sand, medium coarse, not too fine, in the aquarium and mound it up so the back will be some higher than the front, then fill with water. PLANTING . Put the plants in the sand. Put in all the plants snails, clams, hi-balls and one small fish. Let these grow for a week

and then put in the rest of the fish. FISH. . A good rule is to use 2 inches of fish body to each gallon of water. LOCATION. . Place the aquarium so it will have good bright daylight but very little sunshine. CLEANING. . Occasionally, use a small, clean cloth and wipe the glass on the inside. If a surplus of sediment accumulates on the bottom, dip it out with a dip tube or syphon it out with small rubber hose.

HOW TO MAKE AND PLANT A POOL WATER PLANTS

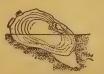

Barrels sawed in half and sunk into the ground are used as tub gardens. Metal stock tanks of various sizes make ideal pools. The most common and least expensive of all materials used is the common building cement. Mix 4 parts of the sand to 1 part of cement. Dig hole in the ground shape you wish and slope the sides in at the bottom. This enables you to plaster the cement on the sides without making a form to hold it. Let the first thickness harden a few hours then apply another and another until you have it

the desired thickness. Then pour some cement into the bottom and smooth it making sure to have one point low for

After the pool is completed, cover it over with wet burlap sacks and let the cement harden for 3 days, then fill it with water and put in 10 lbs. of rock salt to each 100 gallons of water and let set for 10 days, then drain and refill with water, using 5 lbs. of rock salt to each 100 gallons of water, let stand for 5 more days and drain.

Aquarium Hi-ball Neutralizes Water Acids

Snails and clams are shipped by mail. Cannot be shipped during June, July and Aug.

HI-BALLS Keep Water Pure

GO46—The Hi-Ball is a combination of chemicals. Its purpose is to neutralize the water acids that develop in the pool causing the water to become foul. Keeps the water pure and clear. Remember acid water is a deadly enemy fish, enalls, clams and water plants. They're a must in any pool or acquarium.

Use 5 Hi-Balls in pool up to 25 gallons; from 25 to 75 gallons use 10 Hi-Balls; from 75 to 150 gallons use 15 Hi-Balls.

"MIDWEST'S LEADING SEEDHOUSE," Shenandoah, Iowa Henry Field Seed & Nursery Co.,

You MAKE MORE and SAVE MORE When You Buy Henry Field's FIELD SEEDS

Lot Hardy GRIMM ALFALFA

Grimm is the hardiest of all Alfalfas. Its long branching roots go deep after moisture. And these roots help prevent winter heaving. Hard pan or hard clay soil territories are best for Grimm Alfalfa. Will produce a tremendous amount of leafy, fine-stemmed hay that is high in feeding value. Thus, it is especially good for feeding dairy cattle. This lot of fine quality seed is fully 97% pure, free of bad weeds. Far better than Southern or Argentine seed. This is hardy Grimm and grown in the far North. The color is not as bright as our top quality, but the value and hardiness is here. This lot gives results at low cost. It's nice seed, priced low and certainly worth the money, as it is priced \$3 to \$4 lower than it is usually priced. A real bargain!

"GOOD but CHEAP"
Permanent Hay & Pasture Mixture
A splendid mixture composed of 8 different grasses and clovers, of 8 different grasses and clovers, Includes Red Clover, Sweet Clover, Alfalfa, Kentucky Blue Grass, Korean Clover, Rye Grass and Timothy. This mixture grows on every type of soil, giving pasture all season long. Makes an excellent hay meadow, too. You can't fail with it. Contains good quality seeds. This is one of our best bargain buys.

BARGAIN PASTURE MIXTURE

This well-balanced, all grass mixture is made up of some of the best long-life grasses that are permanent—such as Kentucky Blue, Fescue, Timothy and Perennial Rye Grass. Also some Annual Rye Grass for quick nurse graph. crop. All mixed together in the right proportions to give best results in a quick, but permanent-lasting, pasture. Clovers can be added to this mixture at planting time if you prefer. Only 24.50 per 100 pounds.

50-50A Permanent Hay & Pasture Mixture 50% Clovers—50% Grasses

sound-bal-anced mix-ture of 50% Clovers and 50% Grasses. We have included 6 Clo-

sike, Sweet Clover, Alfalfa, Hubam and Lespedeza) and 6 Grasses (Kentucky Blue, Fespedeza) and 6 Grasses (Kentucky Blue, Fescue, Orchard Grass, Annual and Perennial Rye Grasses and Timothy). For a new pasture, plant 1 bushel for 4 acres, or reseed an old pasture at half 1260 per 50 lbs.

If you do not want Sweet Clover in the mixture we can supply lot 50-50B (without Sweet Clover) at only 13.90 per 50 lbs. or 27.75 per 100 lbs. Sow a bushel to 31/2 or 4 acres.

vers (Red Clover, Al-

per 100 lbs.

Certified Blue Tag RANGER ALFALFA

Ranger Alfalfa is fully winter-hardy; in addition, has wilt resist-ance that kills Alfalfa plants in many

ance that kills Alfalfa plants in many areas. De-hydrating plants prefer it, farmers and ranchers rank it tops on their list and all livestock like its fine-stemmed, leafy hay. Whatever your need, Ranger will fill the bill.

Our seed is grown from foundation seed, with Certified Blue tags attached to each sealed bushel bag. This is the lowest price we have ever had for high-quality, high-germination, noxious weedfree Ranger Alfalfa seed. We are proud of it and you will be, too, in results on your farm.

BEST GRIMM ALFALFA

This is northern-grown Grimm Alfalfa of highest grade. We are proud of the quality of this particular lot. Grimm can take a lot of punishment in the winter months, when many other Alfalfas fail to live through till spring. This seed was harvested from fields that have lived over year after year and no Alfalfa is hardier. Plant the acreage you are seeding this spring with Grimm. 36.55 per 100 lbs.

FISCHER BROME GRASS

Our seed comes from the Fischer farm where this famous strain originated. In the drouth years of 1934-1936 it grew as tall as the fence posts. Fischer gives much higher yields of hay and makes a better pasture than northern brome, because it has a greater root system and is widely adapted to the middle west. Also, it is more palatable, since it doesn't tip-burn so easily. Very high in feeding value, so carries more livestock per acre.

Our seed is new crop, heavy, bright color, fully matured and free of noxious weeds. We suggest you plant some Fischer Brome this year. It's tailor-made for all Middle West states. For the world's finest pasture and leafy hay, we think Fischer Brome, 5 lbs. Alfalfa and 1 lb. of Ladino per acre.

BROME GRASS MIX for DRY LANDS

Permanent Hay and Pasture
Here is the mixture for dry land Here is the mixture for dry land that with very little rainfall keeps coming on all season long and for years to come. Contains over 60% Brome Grass with other hardy native dry land grasses, such as Crested Wheat Grass, etc. All livestock like it. Sow 12 to 15 lbs. per acre early. Roll in well on a firm seed bed. Add 5 lbs. of Alfalfa to the acre if you wish. 24.95 per 100 lbs.

HOME-GROWN BROME GRASS

Here is the finest in southern-type, home-grown Brome. This seed is produced right here in Iowa and Nebraska, and will produce more pasture and hay tonage per acre than northern types. Will also carry more livestock per acre, as is higher in feeding value than any other grass. That is why we recommend it so highly. Brome planted along with Alfalfa makes the finest combination for hay and pasture.

WASHINGTON ALFALFA

Our Washington Alfalfa is a beautiful lot of golden berry seed. It comes from the Yakima Valley in Washington where it is grown in fields only a short distance from the Montana-Idaho line. The temperatures out there drop down to as low as 25 degrees below zero during the winter months. So, it is easy to see that there is no need to worry about winter hardiness of Washington Alfalfa. It is as hardy as any Alfalfa can be.

Washington is a Dakota 12 type Alfalfa, high yielding and very popular. This type of Alfalfa is especially adapted to upland soil because its deep tap root system will go down to fertility and moisture that many of the branching root system types cannot reach. Thus, in dry years it is especially good on upland soils. good on upland soils.

good on upland soils.

Our fine lot of seed is tops in every respect—
purity, germination and color. And, it's priced below other premium Alfalfas because we bought
early and are passing the savings on to you. Order
plenty of it. We know it will satisfy you. But better get your order in early, as there is bound to be
a big demand for this fine seed.

Field's SPECIAL BLEND ALFALFA

Here's a real Alfalfa for folks who Here's a real Alfalfa for folks who want choice seed of average color, but still want it cheap in price. We can sell for less because it was bought right. Purity 97% or better. This mixture is a blend of hardiest spreading-root type Alfalfa and the tall-growing, heavy-producing types. Fits all soil types and gives a stand most anywhere. This blend is always one of our most popular Alfalfas. Sow same as any Alfalfa—12 to 15 lbs. per acre.

BEST COSSACK ALFALFA

One of the first quality lots of Cossack Alfalfa we have offered in years. Cossack is a very winter-hardy strain that produces a lot of extra fine-stemmed, leafy hay of highest quality. Absolutely new crop seed, bright in color, free of noxious weeds and tops in every way. Grown right in the hardy production states of Nebraska and South Dakota where winter conditions are rough and tough, so it is fully winter hardy. Cossack is the ideal variety for the entire Midwestern States, or wherever good Alfalfa is planted.

ety for the entire Midwestern States, or whelever good Alfalfa is planted.

We bought this seed direct from the farmers at harvest time. It is priced the cheapest of any Cossack Alfalfa we have offered for many years. You will be more than satisfied with this Cossack seed. 37.00 per 100 lbs.

BEST DAKOTA, 12 ALFALFA

Our northern-grown Dakota 12 Alfalfa comes from hardy sources. Beautiful, perfect, pure seed, free of all noxious weeds. Dakota 12 has a deep tap root system which reaches down farther for moisture and fertility than any other Alfalfa. Because of this, it will stand lots of drouth and hot weather. It grows taller than other Alfalfas and does best on second bottom and upland soils. The favorite Alfalfa of farmer after farmer. We sell carloads every year. Color was never better. You won't find a better value than our best Dakota 12 Alfalfa. 35.65 per 100 lbs.

LINCOLN BROME GRASS

A high-yielding strain that forms a good sod. Excellent seedling vigor, stands lots of drouth and heat. Much easier to establish a stand than northern strains.

Highly recommended all over the corn belt states as the leading home-grown strain of Brome. Often as the leating none-grown strain of Brome. Offen referred to as a southern-type brome. Our seed is heavy weight, new crop, harvested in Iowa and Nebraska. No noxious weeds—it's high quality all the way through.

Hulled and Scarified KOREAN LESPEDEZA

Hulled and scarified Korean has really made friends with farmers. It germinates and grows thicker than seed with the hull on. It takes less seed per acre. Only 8 to 10 lbs. per acre is plenty. Hulled seed can be cleaned free of noxious weeds.

We always sell lots of this hulled Korean. Should be included the results of the second transfer of

we always sell lots of this nulled Korean. Should be in all permanent pastures. Add to your pasture along with other legumes. Will grow on any type soil. Korean does best in midsummer and early fall when you really need it. 99% pure seed, new crop. 30.00 per 100 lbs.

Henry Field Seed & Nursery Co., "MIDWEST'S LEADING SEEDHOUSE," Shenandoah, Iowa

"LOT IDAHO" RED CLOVER

A natural field mixture. Over 99% crop pure. 95% Idaho Red Clover, the balance other crops such as Alfalfa, Alsike, White-Dutch, etc. Just as beautiful a lot as Best Idaho Red Clover, except it has the other small per cent of crop mixture. Easily worth more money but bought right and the extra savings of 5c to 8c per pound is yours. Fine for soil building, hay and pasture. This special lot would be ideal to use to thicken up any thin stand of

he ideal to use to thicken up any thin stand of Red Clover that you may now have. "Lot Idaho" is all new crop, bright and noxious weed-free. Germination 90% or more. Plant same rate as Red Clover. Just one carload of this seed for early orders. Be sure your order reaches us early on this special.

RED CLOVER

Good home-grown Red Clover is the cornerstone of Midwest agriculture. This is our finest quality, Midwest grown. Bright, clean seed that is triple recleaned, absolutely weed-free and the best seed to be had. Don't confuse this seed with run-of-the-mill quality. We selected these lots from local-grown fields and recleaned it to the highest possible nurity. Vigorrecleaned it to the highest possible purity. Vigorous plants from this seed will produce heavy yields of fine-stemmed hay. Perfectly hardy. 991/4% pure, well-colored, plump, new crop seed.

BEST MAMMOTH RED CLOVER

Mammoth Red Clover is one of the fastest leg-umes to build up the soil. A very heavy yielding, single-cut type. Mammoth grows taller, producing The second growth is excellent for pasture or plowing under for soil improvement. Hardy, northern-grown seed, high purity and germination. Our Mammoth Red Clover is the best quality. 25.80

RED CLOVER-ALFALFA MIX

Made up of equal parts of Midwest Red Clover and Alfalfa mixed together. The faster-growing Alfalfa makes more growth first year than Red Clover. You can get a big cutting of hay first year after harvesting the small grain crop. You can plow under first fall for more green manure than straight Red Clover seeding. When left over second year, you get better quality hay of mixed Alfalfa and Red Clover. Even if Alfalfa mostly winter kills, you still have a good stand of second year Red Clover for hay. Plant 10 lbs. per acre. 21,00 per bushel. 21.00 per bushel.

TIMOTHY-RED CLOVER MIXTURE

Timothy and Red Clover work well together. A heavy producer and a soil builder, too. The Timothy helps hold the Red Clover erect, and the Clover helps make the soil more fertile for better Timothy more facilities. Timothy growth. The right mixture is 20% Red Clover and the balance Timothy. We always sell a lot of this fine mixture for hay or pasture. Comes ready to sow. This fine lot of seed is recleaned, of ready to sow. This fine lot of seed is reclean course. A bushel (50 lbs.) will plant 4 acres.

TIMOTHY-ALSIKE MIX

20 to 25% Alsike
A dandy mix that makes wonderful hay, high in feeding value and less dusty than Red Clover hay. Fine for pasture, too. Seeding will last

Timothy and Alsike are winter hardy and both like same soils and climate. Grows fine on sour soils. A bushel seeds 4 acres. 11.00 per 50 lbs.

BEST TIMOTHY

Our finest quality Timothy, grown and harvested right here in Iowa. Clean, bright, new crop seed that will make you a low cost grass seeding. Grows on a wide range of soils.

This lot is 99½% pure, high in germination and free of noxious weeds. We handle carloads every year additional transfer of the control of the cont

Year and this lot is priced right. Order plenty and get the best. It pays. 19.95 per 100 lbs.

4-Way Clover Mixture

Ideal for seeding as soil builder, pasmixture contains well-balanced portions of Al-falfa, Red Clover, Alsike, and Sweet Clover. All good quality seeds, free of noxious weeds and one of our very best bargains. If you are looking for something to be used in a fast rotation, this lot can't be beat. as it contains 4 clovers that are adapted to all types of soil Limited supply. We can't promise you how long this lot will last. Plant 4-Way with our Bargain Pasture Mix of all grasses for a swell combination of grasses and clovers.

IDAHO RED CLOVER

Best Grade—Finest of All Here is the world's finest new crop

Here is the world's finest new crop Idaho Red Clover—grown for seed in the mountain valleys from specially selected vigorous fields. This big, purple berry Red Clover will produce the highest quality hay possible here in the Midwest, with no exceptions. None finer. If you want the very best, here it is. This lot of Idaho Red Clover is high in purity, germination and free of all noxious weeds. We are featuring this fine lot of Idaho Red this year. Much local Red Clover seed is dark and discolored this year, and that is why we recommend this this year, and that is why we recommend this seed to you. Check it any way you like and decide for yourself. If it isn't the finest seed you ever bought, for the money spent, send it back to us. That's how confident we are that you will like it. Get your order in early.

RED CLOVER MIXTURE

35% Red Clover, Plus Alsike and Timothy
This super-rich mixture makes an ideal seeding This super-rich mixture makes an ideal seeding at a low cost per acre. 35% Red Clover, balance Alsike and Timothy. This natural mixture can't be beat for pasture with no danger of bloat. The Timothy provides the roughage in this mixture. Excellent for hay, too. Sow alone or with your regular oat seeding. Figure on 10 to 12 pounds per acre. Priced at only 13.50 per 50 lbs.; 27.00 per 100 lbs. A money-saving offer if we ever saw one.

NEW LADINO—The Wonder Clover

Ladino Clover is the most popular clover ever offered for pastures. Only 1 to 2 lbs. per acre needed. A fine combination with Alfalfa and Brome or other grasses. Really a giant White Dutch Clover. Grows 12 to 15 inches high. Recovers quickly after grazing, lives for years. Ladino has doubled milk production in many dairy heads. Fine top, for poultry feed. Adonted to most herds. Fine, too, for poultry feed. Adapted to most soils. 35.40 per bushel.

ORCHARD GRASS

Fine for Shade Orchard grass is a tall-growing, perennial bunch Orchard grass is a tall-growing, perennal bunch grass. Fine for shade. Starts growing early in the spring. Starts earlier and gives results a month ahead of Timothy. You will find it well-adapted to your needs as hay and pasture, grass silage and turf, as well. Orchard Grass does fine along with legumes like Ladino, Red Clover, Alsike and Alfalfa or Lespedeza. This fine grass has increased in recovery recovery residity the lest few years. Plant popularity very rapidly the last few years. Plant it alone at rate of 15 to 20 lbs. per acre or along with other grasses and clovers. 27.00 per 100 lbs.

REED CANARY GRASS

For Low, Wet Soils

Plant Reed Canary grass for low, wet soils
where most other grasses would fail. Reed Canary
will survive where water stands on ground for
long period of time. Fine for pasture or hay. Alsike and Red Top make good companion crops.
Plant alone 6 to 8 lbs. per acre. 36.00 per 100 lbs.

CREEPING FESCUE

For Shade

This fine lot of Creeping Fescue is recommended This line lot of Creeping reside is recommended for all shady areas in lawns, parks, athletic fields—regardless of type of soil, sour or clay type. Creeping Fescue does well in the sunny places, too, and stands lots of dry weather. Use regular lawn seeding rates. Special prices: 10 lbs. 8.49, postpaid; 25 lbs. 18.25; 50 lbs. 37.50; 100 lbs. 70.00, F.O.B. Shenandoah.

ALTA FESCUE

Alta Fescue is the new perennial grass that is especially adapted to all type soils. Has a long growing season. Finest of all grasses for playgrounds and athletic fields. Fine for pasture praygrounds and athletic fields. Fine for pasture or hay. Should be in all permanent pastures. Mix along with other grasses or clovers in all your mixtures. Alta Fescue helps control erosion on steep slopes. Sometimes called Kentucky 31. Try some. 100 lbs. 25.00.

MIDLAND RED CLOVER

Certified, Higher Yielding, Disease-Resistant
A new variety of Medium Red Clover that we introduced to Midwest. Much finer stemmed than regular Red Clover, yet stands up better in field. Disease-resistant, highly productive in hay and seed. Seed yields of 3 bushels per acre are reported this year. Parent stock of seed was developed through cooperation of U.S.D.A. and agricultural colleges of Middle West. Very limited supply

Big, plump seed with a lot of purple color. In sealed bushel bags. State Certified. 29.50 per bu.

BEST ALSIKE CLOVER

Alsike stands wet feet better than other legumes. Poorly drained, thin soils produce a good crop of Alsike when other legumes would fail. Its hay is high in protein and fully equals Red Clover in feeding value. A bushel plants 7 to 8 acres. Does fine along with Timothy, Alta Fescue or other good grasses. 18.00 per bushel.

WHITE & YELLOW SWEET CLOVER Mixed

Always one of our most popular buys for pasture. You will save money on your Sweet Clover needs when you buy this mixed seed, as it always gives good results. The Yellow Sweet Clover starts up earlier and comes along quicker for extra-early pasture. The White, later maturing, Sweet Clover follows to last longer in the fall months. For soil building, Sweet Clover has no equal in legumes. Full 60 lb. bushel. All seed hulled and scarified and carefully cleaned. Guaranteed to save you money at this price.

BEST SWEET CLOVER

BEST SWEET CLOVER
991/4% Pure

This is the tall-growing Sweet Clover formerly called White Blossom.
Now we just list it as Sweet Clover.
Grows much taller than Yellow variety and is ideal for plowing under as a green manure crop. Sweet Clover is the perfect soil builder and should be used on all farms in fast crop rotation. It puts more Nitrogen in the soil than any other Clover because of its greater root growth. Makes a fine pasture equal in feeding value to Alfalfa. Makes good hay, too, when cut early before reaching full growth. Purity 991/4%, good color and germination, and free of noxious weeds. One of our best Clover buys at this low price.

BEST YELLOW SWEET CLOVER

Yellow Sweet Clover is the best kind to select when you want an early maturing, extra-leafy strain. This is much finer stemmed than the White type. It is ready to pasture from 10 days to two weeks earlier. Sweet Clover will improve your soil faster than any other crop you can plant. The seed in this lot is the cream of the crop from the best producing areas If you want your dollar's worth this lot is the cream of the croy from the best producing areas. If you want your dollar's worth in Sweet Clover in a topnotch, high-quality lot, order our best Yellow. It will be money well spent. Noxious free, of course. Triple recleaned, hulled and scarified.

BEST ANNUAL HUBAM CLOVER

The annual-flowering White Sweet Clover that produces all its growth the first year. Always a favorite for a green manure crop because it fits

your rotation program to build your soils. Fine for hay and pas-ture, too. High in protein content. Seed early in spring, along with small grain or on fall-seeded grains. Use 12 to 15 lbs. per acre.

Henry Field Seed & Nursery Co., "MIDWEST'S LEADING SEEDHOUSE," Shenandoah, Iowa

MISSOURI O-205 OATS

One of the finest new oat introductions. Introduced by Mo. Station and released in 1951. Developed from cross between Columbia x (Victoria-Richland). Very high yielding. Has 4-year average in Iowa State Yield Test of 70.5 bu. per acre in southern Iowa. Also has high test weight. Mediumearly maturing variety. Moderately resistant to race 45 of crown rust. Outstanding in southern and central areas on lighter soils. Certified Blue Tag seed, sacked 3 bu. per bag. See price list on page 63. page 63.

BIRDSFOOT TREFOIL (Lotus Corniculatus)

A long-lived perennial legume with a much branching tap-root and crown somewhat like Alfalfa. The plants have many fine stems. Very palatable as hay. Birdsfoot Trefoil will improve both yield and quality of hay and pasture on dairy and livestock farms. Plant in established pastures at rate of 2 to 3 lbs. per acre. Equal in protein to Alfalfa—no danger of bloat. 33.00 per bu.

DWARF ESSEX RAPE

Nothing beats Rape for hog pasture. The crop is short this year, and we have genuine Dwarf Essex seed for early orders only.

for early orders only.

Rape is rich in protein—just what young pigs need. It is far cheaper to grow this protein in the form of Rape pasture than to buy it in the form of tankage or other feeds.

Plant 6 to 8 lbs. per acre any time from April 1 through the summer months. Ready to pasture in

SWEET SUDAN

New crop Sweet Sudan doesn't cost New crop Sweet Sudan does to too.

A cent more per acre than other Sudan. It is far superior to regular Sudan. Greater disease resistance, less seed shattering, produces more growth per acre. Livestock prefer it because it is very palatable, due to its sweet leaves. Our opening price will save you money. will save you money.

BEST SUDAN

Excellent quality, bright Sudan grass, that is 98% to 99% pure Sudan. Sow lots of Sudan for midsummer feed. Nothing will yield as much pasture per acre and carry more livestock per acre during hot periods of weather. Sudan is the an-swer for cheap livestock pasture. Seed 25 to 30 lbs. per acre.

PIPER SUDAN GRASS

PIPER SUDAN GRASS

Piper is the new Sudan selected and introduced by the Wisconsin Experiment Station. It is absolutely the latest word in Sudan. Outstanding because it gives increased forage yields and has resistance to important diseases, plus low level of prussic acid in the plants (in comparison with other Sudans). Forage yields of Piper fully equal (often superior) to other Sudan strains. Extrafast early growth because of high seedling vigor. Regrowth after pasturing has been good in tests. Piper Sudan is widely adapted for planting innorthern and central states. We offer you the finest quality, Blue Tag Certified seed. High in purity, color and germination. With the germination of this seed, you can plant 20 to 25 lbs. per acre and get a heavy stand.

NORGHUM

New, Early Combine Grain Sorghum

New, Early Combine Grain Sorghum

Norghum is a Kalo-type grain sorghum. It is early, stands up well, gives good yields of grain, ripens fast because of spreading-type heads.

This combine grain sorghum has medium-slender stalks, grows to a height of 3 to 3½ feet, ideal for combining. Heads dry out fast and ready for harvest by early September. Seeds are medium in size, reddish brown in color.

The seeds of Norghum germinate rapidly and at low temperatures. Does fine where an early maturing grain sorghum.

grain sorghum

Certified ELLIS SORGO

A brand new introduction, Ellis is a cross between Atlas Sorgo and Leoti. Ellis is earlier than Atlas, much sweeter stalk, doesn't grow as tall, easier to handle and has much softer rind. Excellent for silage or cured bundle feed. Ellis has bright, green leaves, resistant to rust and other diseases. This new Sorgo has an open head, cures rapidly, white seeded and grows to a height of 5 to 6 feet, requiring about 100 to 110 days to mature. Be sure to plant some Ellis for lots of fine feed. Figure on 5 lbs. per acre. All Certified Seed—supply limited. 25 lbs. 3.95; 50 lbs. 7.50; 100 lbs. 14.00; all F.O.B. Shenandoah.

THE SENSATIONAL NEW GURNO

Gurno will give you a huge yield of grain in a hurry— will yield as much as corn will on the same ground. Gurno is an early vhite seeded Com-

bine-type grain sorghum. Early maturing in 70 to 80 days. Yields heavy, even if planted late. Makes a good fodder, as stalk is semi-sweet. Is a fine feed for all

kinds of livestock.
Stands drouth and resists chinch
bug injury. Stands well after maturing. Plant 5 lbs. per acre.

1145 per 100 lbs.

We guarantee to satisfy or no deal. We absolutely guarantee our Field Seed to arrive in good condition and to be satisfactory in every way. Send a sample for a State Test if you like. If not satisfactory in everyway, you may return the seed anytime within 30 days after you receive it and we will return your money or send you seed that will suit. That's plain and lived up to. However, we don't guarantee a crop as that depends upon conditions beyond our control, such as weather, soil, etc. We guarantee to satisfy or no deal. We absolutely

If You Want More Information, Send Us This Coupon

There is a United-Hagie number for every purpose, for every type of soil, and every latitude. If you are in doubt about the best numbers for you, fill in the coupon below, and send it to us. We have corn books describing numbers especially adapted to these states: Mo., Kans., Nebr., S. D., Minn., and Iowa; if you live in one of these states, and would like a copy, indicate that on the coupon.

• •

in Any Kind of Weather

Last fall, did you get dropped ears, barren talks, borer damage, unfilled ears, reduced rield? If so, you should talk to a farmer who slanted United-Hagie. He will tell you how be got good yield in spite of the dry year.

Don't Plant "Fair Weather" Corn

Don't Plant "Fair Weather" Corn
There are a lot of hybrids that will give
you a good crop when weather and soil and
moisture and everything is just right. But,
as you know, you have to have hybrid seed
that's bred to "take it" to get a good yield
in a bad year—one that's bred to withstand
whatever disease, cold, drouth, excessive
water, or winds, it may encounter.
Read at the right some actual letters, typical of the many received from farmers who
planted United-Hagie last year. They know
it paid them to plant United-Hagie. Order
yours, by mail, from Henry Field's.

Here are the varieties we offer you:

Here are the varieties we offer you:
UH24a, UH28 and UH43a: Adapted to all of
So. Dakota, No. Dakota, Minn., Wisconsin,
and extreme northern Ill. UH30a is, in our
opinion, the largest eared early corn grown.
UH32a, UH36, UH39: Especially adapted to
the two southern tiers of counties in Minn.
and the three northern tiers of counties in Minn.
and the three northern tiers of counties in
Iowa, southern Wisc., northwest Nebr., and
southeast So. Dak. UH32a has been right up
at the top in the Iowa Yield Tests for northern Iowa for the last four years.
UH40, UH41, UH47a, UH52a: For central
Iowa, central Nebraska, central Ill., and
northwestern Kansas.
UH52b, UH59b: Especially adapted to
all of Iowa south of Des Moines, southern
Ill., northern Mo., southeastern Nebr., and
all of Kansas.

OH65, UH65a, UH67b: For all of Mo., southern Ill., and all of Kansas.
UH30 Blend: For northern Iowa, northern

UH40 Blend: Adapted to central Iowa, central Nebr., central Ill., and northwestern

Kansas.
UH50 Blend: For all of Iowa south of Des
Moines, southern Ill., northern Mo., southeast Nebr., and all of Kansas.
UH60 Blend: Adapted to all of Mo., southern
Ill., and all of Kansas.
UH3 White: For northern Iowa, northern
Ill., and northwest Nebr.

Ill., and northwest Nebr.
UH4 White: For central Iowa, central
Nebr., central Ill., and northwest Kansas.
UH5 and UH6 Whites: For southern Iowa,
all of Mo., all of Kansas, and southern Ill.

"I planted some UH36 and UH39 on my farm. The yield was checked by Gene Burton, Vo-Ag. Instructor at Edgewood, Ia.; it showed 153.5 bushels. This corn came along fast all summer and has cer-tainly sold me on United-Hagie."—Lloyd McManigle, Edgewood, Northeast, Ia.

"We've planted United Hagie for the past five years. This year we planted 805 acres to United Hagie and in spite of drouthy conditions we are well pleased with the yield, see no signs of excessive ear droppage."—Magel Bros., Sidney, Southwest, Ia.

"I planted United-Hagie this year for the first time. Even though it was extremely dry here, this corn filled well, had few barren stalks, compared to my other corn. It took 6 rows of other corn to equal the yield of 4 rows of United-Hagie. I'm going to plant United-Hagie in 1954."—Herbert Pulte, Logan, West Central, Ia.

"I have grown United-Hagie for four years and it has always out-performed any other corn I have tried. This year my United-Hagie yielded 122 bushels per acre with practically no ear droppage."—Harry C. Sorenson, Thornton, North Central, Ia.

"My United-Hagie 42a and 47a gave 20% more yield than two other popular varieties. United-Hagie deep root system certainly proved itself in this drouthy year. 8 rows of United-Hagie equalled 10 rows of my other corn."—Virgil Andrew, Rural Route, Atkins, East Central, Ia.

"Planted 7 bushels of United-Hagie 47a and 52a. It produced 85.6 bushels of corn per acre in spite of extremely drouthy conditions. The balance of my corn, another popular brand, produced only 50.3 bu. per acre. United-Hagie deep roots really paid off this year."—Rex Denning, Ottumwa, Southeast, Ia.

"My United-Hagie made 111 bushels per acre. When our County Agent checked this field he was surprised to see how well it was standing and how little ear droppage there was. Considering conditions, I think this was an excellent yield. I'm all for United-Hagie."—Milo I. Peiffer, Fonda, Northwest, Ja.

9-Foot Roots Dig for Food, Moisture

This is an actual picture of some United-Hagie corn washed out by water to show the 9-foot roots that really dig for food and mois-ture. Every United-Hagie number is bred to produce deep roots like this, and is one of the reasons why United-Hagie often gives you a good yield where other hybrids right beside it won't.

CHINESE ELM

GENUINE SIBERIAN STRAIN

Chinese Elms are planted by the millions throughout the midwest and western United States because of their rapid growth and beauty, and because they will withstand climatic and soil conditions few other trees will tolerate. They take extreme cold and extreme dryness equally as well, and thrive on the poorest of soils, even

Many Uses

Chinese Elms make a good tree for quick shade, cannot be beat for shelterbelt and windbreak planting, and make as good a hedge, pruned low or high, as you've ever seen.

Field's Have Selected Strain

Henry Field's Chinese Elm seedlings and trees are well-rooted and wellbranched-good enough so that over the years we have built up a demand that takes hundreds of thousands of them each year. Seed for our Chinese Elms is gathered in South Dakota, and originally came from Siberia, where only the hardiest of trees survive. They will stand temperatures of 30 degrees or more below zero, thrive on soil good and bad, weather wet or dry.

CHINESE ELM FOR SHADE

A4220—The 3 to 4-ft. size is shipped postpaid.
The other sizes are shipped Express not prepaid:
Each Per 2 Per 4 Per 10 1.89 4.49 .59 .98 Heavy Rooted, 1.69 2.98 Heavy Rooted, 5 to 6 ft..... 1.25 2.29 4.39 Extra Heavy Rooted, 6 to 8 ft..... 1.79 3.38 6.35 14.89

13/2000000 See Listing of Windbreak Evergreens on Page 69 windbreak illustrated

A good windbreak will protect the home and feed lot, help cut the fuel bill, and provide firewood and lumber. It is easy and inexpensive to plant one, and once established, it practically takes care of itself.

Most windbreaks are designed to give protection from the north and west winds, but the location primarily depends upon the direction of prevailing winds, buildings, orchards or crops to be protected. Trees for each row may be chosen according to needs or taste, but generally, low trees should be on the outside, then taller ones to about % way back, and then low ones again. (Evergreens are best for the inside rows. See listing of windbreak Evergreens on page 69.)

The trees below are ideal for: windbreaks, shelterbelts, erosion control, wild life food and shelter, screens, farm woodlots, fence posts, shade and protection for the farm animals. Orders for 200 or more shipped Express Not Prepaid.

A4012—CHINESE ELM—Ideal for quick windbreak clear to ground. Fastest grower known, Drouth-resistant, See prices top part of page.

A4006—BLACK LOCUST—Best to prevent soil washing. Used a great deal by the government. Black Locust best for fence posts.

Henry Field Seed & Nursery Co., "MIDWEST'S LEADING SEEDHOUSE," Shenced Co.), Iowa

First, with a plow, throw out a deep furrow along the row of trees to be planted. Second, put each tree against the straight edge of the furrow, then throw the loose dirt back in over the roots, Pack firmly with the feet. Then CUT ALL SEEDLINGS OR TREES BACK TO LESS THAN HALF THEIR HEIGHT (except Evergreens, which require no pruning). Cultivate plenty the first two summers.

A4259—This is the most popular hardy Magnolia; the one with the great, plnk, cup-shaped flowers in the spring before the leaves come. Seldom gets over 12 feet tall—so makes a nice lawn tree. Plant in sheltered place. Folks south of lowa should have no trouble but is doubtfully hardy from lowa north. There are several beauties right here in Shenandosh. We don't believe you will find this tree priced so low in any other catalog. 18 to 24" root-wrapped plants, 2.49 each; 2 to 3' root-wrapped plants, 3.50 each, prepaid.

Remember. young white birches have dark brown bark. May not turn a good white for several years.

CUTLEAS WEEPING

WEEFING
A4211—White
bark with
graceful weeping branches. Leaves finely
cut, a beautiful in spot by
itself. 4 to 6
ft. trees, 2.45
each, 2 for
4.69. Exp. not
prepaid.

BIRCH TREES

This is the beauty tree of the American woodlands. Hardy and easily grown. Water well in dry spells, as its roots are close to the surface. The branches cast a light, filtered shade which allows a good lawn to grow under the tree

PAPER WHITE

A4302—An upright variety whose leaves turn a brilliant, golden yellow in the fall. 4 to 5 ft., 1.95 each; 2 for 3.69, express not prepaid.

(See Page 69 for **Evergreen Hedges**)

ROSA MULTIFLORA **Beauty That Protects**

A1624—Rosa Multiflora, the hardy Japanese Rose, gained its popularity first as a living field fence and for shelter belts and erosion control. But now many people are discovering that it also makes a fine trimmed or untrimmed hedge, even on a small city lot as shown in picture at right.

It makes a dense, thorny barrier that stops traffic across your yard or garden. And just as it keeps livestock in a field, it keeps your pre-school youngsters from wandering out of the yard.

In the spring, even if trimmed, it bears clusters of small, white, wild roses and, in the fall, the berries turn a pretty, bright red. If you let it grow, it will get tall enough to make a good screen and you never have to

Ideal on terraces because it stops washing. Does not sucker or spread, so does not interfere with nearby plants or garden, and you'll find it easy to run a lawn mower under its arching branches.

Grows 2 ft. to 6 ft. high, depending upon how you trim it. We do not offer the small conservation grade as we believe the loss in planting is too great with that size plants. And our 18" to 24" Super Grade will make you a hedge in a hurry.

SPIREA VAN HOUTTEI (Bridal Wreath)

A1623-A perfect border for the back yard. Ideal for an informal untrimmed hedge. Beautiful white flowers in spring, lovely foliage all summer. Set 21/2 ft. apart. Trim if desired, or allow to grow 6 to 8 ft. high.

12 10-15 in., ppd. 1.98 3.79 7.10 13.29 12-18 in., ppd. 2.46 4.89 8.98 16.50 18-24 in., ppd. 3.25 6.49 12.50 22.98

Rosa Multiflora Field Fencina

Rosa Multitlora:
The picture at right tells its own story. The barbed wire fence was unnecessary when the Rosa Multiflora grew up, which takes only two years. It is tight enough to hold all live stock except an occasional breachy sow. Fine for birds and small game refuge, pasture divider, snow stop, fire break, crosion control. And you never have to repair it.

NEW! CRIMSON KING MAPLE Reddest of All

A4214—This new French hybrid of the crimson leaved, hardy maple tree (covered by Plant Pat. No. 735) is the most showy of all trees in foliage. In early spring, the young leaves are a brilliant, fiery crimson. They continue this bright color until well along in the summer, when the upper side of the leaves deepen to a rich black-red tinted green, with undersides of green. This is the reddest of all red maples, including Schwedler's. Never grows more than about 30 feet tall. 3 to 5-foot size, 4.29 each, postpaid.

HARD MAPLE

G. excepting that it has been grown into tree form. Makes a beautiful small tree for yard, lawn or parkway. It is just as hardy and tolerant of most all conditions as the bush form. 2.25 each;

2 for 4.29, postpaid.

Beautiful SHADE TREES Tall, Stately LOMBARDY POPLAR

Henry Field's offer you an unusually large variety of shade and ornamental trees. Here you can find exactly the tree or trees for your particular need—ornamental or skade—for yard, feed lot or field, for windbreaks, and for soil erosion control.

ABOUT SHIPPING TREES: Many trees are too tall to skip by Parcel Post so we have to ship them express. So please watch and, when necessary, be sure to tell as where your nearest express station is.

IMPORTANT: Trees over 6 feet in height should be staked and tied for the first year. Look at your ties occasionally to see that they are not cutting into the bark. Also, do not plant trees too deeply. If you do, they may die. Plant them at the same depth they grew in our nursery row; you can see the ring of discoloration.

Oak Leaf MOUNTAIN ASH Small and Beautiful

Amail and Beautiful
A4263—Here is a
really rare, yet fine,
small shade tree. Its
leaves are sharply
cut like oak leaves,
and in the fall it has
great clusters of
bright red berries.
An, unusual, attractive, small tree that
will fit beautifully
into your landscaping. 3 to 5-foot size,
2.25 each, postpaid.

GRAFTED PECANS

The secret of getting grafted Pecan trees to live

is to dig them with a long root, which we do. Heavy bearers of valuable nuts—

will pay your taxes. Plant 35 feet apart. Ordinarily will bear in about 5 years.

A4116—Giant Mahan. World's largest and most popular. True paper shell.

A4117-Stuart. Large, well-filled nuts. Bears regularly. Suited to all sections and soils. Some thriving here in Shenan-

A4118—Success. One of the best varieties for the midwest and the eastern half of the U. S. Beauti-fully shaped tree with targe, oblong nuts, plump, sweet and medium thin shell. Trees bear heavily and are self-fertile.

GOLDEN WILLOW

Large-Branches Yellow
A4301 — Very rapid
growing; unusual shade
tree that gives quick results. Branches and
bark bright, shiny yellow, beautiful in winter,
and very hardy. Leaves
long and narrow. Good
in mass plantings or as
shade trees.

LOMBARDY POFLAR EARGAIN

A290 IX—10 beautiful Lombardy Poplars, 4 to 5-foot size trees, for only 2.59, express not prepaid. They are too big to mail parcel post.

Remarkable NEW MORAINE LOCUST

This is a new tree having much the same shape as the American Elm, but it is much bet-Elm, but it is much better in many ways. It is a very clean tree, having no seed pods, and fine foliage (the falling leaves practically disappear into the lawn) which allows enough light on the lawn for good growth, yet gives enough shade to be cool and stop crab grass growth.

It is not susceptible to disease; is hard-wooded and as long-lived as a common Honey Locust; is tolerant of smoke an soot; stands transplant ing well, and grows well on practically any type of soil.

Covered by Plant Patent No. 836; prices standard No. 836; prices standard throughout the U.S. No. A4261-5 to 6 ft. whips, 5.00 each. 6 to 7 ft. 5.00 each. 6 to 7 ft. branched trees, 8.00 each, exp. not ppd.

A HARDY PECANS

A4115-The native midwest, hardy type. Gives heavy yield of fine quality delicious nuts and also makes beautiful orna-mental and shade tree. Very vigorous grower. 2 to 3', 98c each; 3 for 2.79, postpaid.

How to Plant Nut Trees

Cut back the branches heavily if trees you receive are branched. Dig a deep hole as the roots are generally long. Set trees just as deep as they stood in the nursery row. Firm the soil well and water thoroughly. Stake and tie for first year. Water from time to time during first summer unless you get heavy rains. Some nut trees start slowly, so be patient with them.

HICKORY

A 4 1 0 7 -These are the grand old Shagbark

nuts so beautifully flavored, so much a favorite with everybody. Plant some on your own place so you won't have to go hunting for them. Wood is very valuable. 12 to 18" size, 69c each; 3 for 1.89; 25 for 12.75, postpaid.

EVERGREENS Priced as Low as Other Shrubs

Here are evergreens priced as cheap as shrubbery. Our illustrations are of mature plants; however, we do not ship plants of this size—we ship young, vigorous, smaller plants which will quickly grow been transplanted 2 times in the field to make heavy, compact roots. You save money by buying this size.

We ship them at correct planting time in a special most that keeps roots moist. Remember, these are not balled and burlapped evergreens—they do not need to be in these smaller sizes.

HOW TO PLANT: Keep in

smaller sizes.

HOW TO PLANT: Keep in moss till hole is dug. Do not expose roots to air. If they look dry, soak in water a few minutes before planting. Keep at least 3 ft. from house foundation. Water well in dry spells, both summer and winter.

Upright Evergreens

Upright Evergreens
IN3—PYRAMIDAL SILVER
JUNIPER (Scopulorum). Tall,
pyramidal-growing tree. Set
at each side of doorway for
accent. Color is a soft silvery
green. Grows 10 to 12 ft, tall.
Can be trimmed any height.
Very hardy. 12 to 18", 2.00
each; 3 for 4.90, ppd.
INI4—AMERICAN ARBORUITAE. A hardy, adaptable,
upright evergreen of rich dark
green. Grows to a 15-ft, pyramidal or can be kept to 4 to
5 ft, by shearing. Occasionally
follage browns in early spring
hut greens up immediately
after. 12 to 18", 1.75 each; 3
for 4.10, ppd.

IN17—HEMLOCK. The most graceful of all evergreens. Wild do well in partial shade and even make a good showing in heavy shade. Growen in full sun, too for the shade of the sha

IN19—RED CEDAR (Virginia Juniper). A beautiful, silvery green pyramidal tree. Perfectly hardy and resistant to drouth. Is native to the midwest, thus is well adapted to our soils and temperatures. Bright blue berries, 25 to 18", 1.65 each; 3

IN18—UPRIGHT YEW (Taxus Cuspidata Capitata). The aristocrat of upright evergreens. One of the most beautiful. Makes pyramid of deep green, waxy foliage. Has bright red berries size of small marbles in fall. Does well in partial or heavy shade. Shears well. 12 to 18", 2.90 each; 3 for 7.60, ppd.

Low-Growing Evergreens

Low-Growing Evergreens
IN4—PFITZER JUNIPER.
Most popular of all low-growing, spreading evergreens.
Dark green. Ideal in front of
tall evergreens or shrubs, at
corners of lot, cemetery planting or rock gardens. Spreads
3 to 4 ft., and sometimes more,
across when full grown. 12 to
18",2.25 each; 3 for 5.55, ppd.

INI5—ANDORRA JUNIPER. A comparatively new variety originating in Maine. Very low and spreading. Beautiful silvery green in the summer, turning an unusual pinkish red throughout the winter. Drouth resistant and hardy. 10 to 12', 1.85 each; 3 for 4.35, ppd.

INIO—SPREADING YEW
(Taxus Cuspidata), One of the
most beautiful of all evergreens. Grows like a Pittzer
Juniper, but has shiny, wazy
dark green foliage, and in the
fall bright red berries the side
of small marbles. Does well
in partial shade—even quite
heavy shade, 50 to 12", 2.25 neavy snade. 10 to 12 each; **3 for 5.55**, ppd.

IN12—SAVINS JUNIPER. A low-growing, many branched evergreen. Rather vase-shaped. Eventually reaches a height of around 4 ft. Hardy, and drouth resistant. Excellent for mass planting in beds or along foundations. 12 to 18", 2.25 each; 3 for 5.55, ppd.

IN13-GLOBE ARBORVITAE A grand low-growing, naturally globe-shaped Arborvitae. Fine on each side of steps or at front entrance. With a very little shearing will remain perfectly round. 10 to 12", 2.00 each; 3 for 4.90, ppd.

IN7—MUGHO PINE. The best ball evergreen. Perfect dwarf round bail. The new growth looks like tiny candles at the end of each branch. Usually does not get over 2 ft. high, and keeps a well-rounded shape without trimming. 8 to 12°, without trimming. 8 to 2.00 each; 3 for 4.90, ppd.

Transplanted SEEDLING EVERGREENS

TEA ROSES

All Two-Year-Old FIELD GROWN PLANTS . . . Bloom THIS YEAR from JUNE until FROST

POSTPAID PRICES of HYBRID TEA ROSES

These are the postpaid prices of all Hybrid Tea Roses on these two pages (70 and 71) excepting Field's Giant, and the Potted Roses described at right:

Each Per 3 Per 6 Per 12 Select 2-year No. 1 1.10 3.15 5.98 11.40 Standard 2-year

Medium .98 2.80 5.39 10.19

Please specify on your rose order whether you want "Select" or "Standgrade. An explanation of these grades is given below.

Here's Why You Get Extra Value When You Buy Henry Field Roses

When our Roses come in from the field, we separate them into three grades:

- 1. Select Two-year No. 1
- 2. Standard Two-year Medium
- 3. Light (not for sale)

Now most nurseries make 4 grades, the other one being Jumbo XX, the largest ones, a premium grade, and they sell them for a premium price—1.35 or more apiece. We put the Jumbo XX sizes right in with the "Select-Two-year No. 1" grade. Our regular Select Two-year No. 1 grade complies absolutely with the Horticultural Standard of The American translation of Nurserymen, of which we are Association of Nurserymen, of which we are a member. But by throwing this premium grade in at no extra cost to you, you get a bargain, over and above standard grading requirements. That's the good old Henry Field policy of giving extra value.

Our Standard Two-year Medium grade is a little smaller; otherwise just as good. Grown at the same time in the same field. It is a big value. Bloom first year from June to frost and soon get just as big as any grade.

The "Light" grade we don't sell. We put those back in the field to grow up.

"Two-Year-Old, Field Grown"

All of the above is an explanation of the grading according to size and shape. But there is another quality in roses that you want, and which Henry Field's gives you. This is the inherent ability of the rose plant to grow when you plant it—its vigor and hardiness.

To assure this to you, we ship you only rose plants that already have been grown for two years. They have enough age and size to grow well, and bloom the same year you plant them.

And all Henry Field's rose plants are grown outdoors in carefully tended nursery fields.
There they are watched and tended with great care but, because they are field grown, they have developed hardiness.

Henry Field roses are good varieties to begin with; they are grown properly; and they are graded properly. That's why we say you can't

WHY ALL HENRY FIELD ROSES ARE CLEAN

IN

Grade

There are no germs or fungus spores on any rose you get from Henry Field's! Here's why: we have special ultra-violet lights in our big modern storage rooms that kill instantly any germs or fungus spores that might be on the plants. And Henry Field's cleaner roses cost Because Thousands Have Been Delighted with HENRY FIELD'S POTTED TEA ROSES, This Year We Add POTTED BROWNELL HYBRID TEA ROSES and CLIMBING ROSES

Your Henry Field "Garden Fresh" rose comes to you well packed in a heavy cardboard container that covers pot, stems, leaves and all. When you unwrap the package, you take out a plant, heavy rooted, green leafed, and usually in bud or blooming,

This is the same "Garden Fresh" rose with the tarred paper container, or pot, removed, and ready to plant. No pruning necessary. Don't be afraid the ball will break and fall away; it won't. Just dunk the ball in a pail of water and start digging a hole.

Here the same rose is ready to go in the ground. Dig the hole a little larger than the ball, preferably in good, rich ground. Set the ball in the hole so that the top of the ball is a little below ground level. Be sure the tarred paper pot has been removed before planting.

Henry Field's Offer "Garden Fresh" TTED ROSES

in Many Favorite Varieties

THEY REACH YOU GREEN, FRESH, GROWING AND USUALLY IN BUD

Now You Can Have a New Rose Garden in Full Leaf and Bloom the Day Your Plants Arrive!

Why waste a month waiting for dormant plants to start growing and coming into bloom? Now you can get Henry Field's pot-grown roses in full leaf and bud, even a bloom here and there, as shown in these actual pictures taken here at the Seedhouse.

Henry Field's "Garden-Fresh" potted roses are two-year-old Se-lect Grade rose plants grown in a pot filled with a pre-fertilized growing media, not dirt.

You can plant them any time after danger of frost is over, from late spring way through the summer. If you can't get them planted right away, they keep right on growing in their own pot. (Of course, remove the tarred paper pot when you do put the plant in the ground.) They are easier to plant and practically eliminate any loss in planting.

You get a longer blooming season because they start giving you blooms practically from the day you plant them right up to freezing time in the fall.

These plants will be shipped to you by parcel post (we pay postage right to your door). Do not expect them too soon; we can not ship until danger of frost for your area is past. Therefore, you porbably will receive them as a separate package. arate package

arate package.

These potted roses are the result of several years of painstaking research on our part. We have grown them and planted them under all sorts of conditions and they give perfect satisfaction. Last year, thousands of our customers bought them and were happy with them. You pay a little more for them than you do for bare-root, dormant roses, but you get a whole lot more. We don't see how you possibly could lose one of these potted roses.

Henry Field's "Garden-Fresh" potted roses are available this

year in these fine, well-known Hybrid Tea Roses:

A1215-Poinsettia
A1201-Countess Vandal
A1209-Golden Charm

A1202-Crimson Glory.	. 2.35
A1222-Charlotte	
Armstrong .	. 2.75
A1223-Helen Traubel.	. 2.98
A1224-Fred Howard	. 2.85
A1225-Buccaneer	. 2.98

Collection of POTTED PATENTED ROSES

A2256X—I each of Peace, Mirandy, Buccaneer, Helen Traubel and Charlotte Armstrong—5 of the world's most beautiful roses—potted—for only 12.75, postpaid.

Potted Climbing Roses

This is the first year we have been able to offer potted climbers. We have these top varieties for

ou:
Beauty
A1232—Climbing American
Beauty
A1233—Blaze
A1235—Paul's Scarlet
A1236—New Dawn
A1239—Primrose

Prices on above 5 climbers in potted grade is 2.25 each; 3 for 6.25, postpaid.

Pull the dirt in around it; tamp it down firmly to keep air out. Then water it good. Fer-tilizer already is in the ball. You then have a big, live growing rose bush. Chances are you can pick roses the same day!

POTTED CLIMBERS COLLECTION

A2247X—1 each of Paul's Scarlet, Primrose and New Dawn—all 3 for 5.98, post-paid.

Potted Brownell's the Extra Hardy Hybrid Tea Roses

Also this year for the first time, we have the super-hardy Brownell Hybrid Teas that withstand so much cold without winter-killing.

MIZ41Queen of the	
Lakes	2.35
A1243—Orange Ruffels.	2.35
A1244-The "Henry	
Field"	2.50
A1245—Curly Pink	2.35
A1247-Anne Vanderbilt	2.35

POTTED BROWNELL'S BARGAIN

A2248X—1 each of all 5 Brownell's listed above, potted, for only 10.59, postpaid.

NOTICE: We introduced "Garden-Fresh" potted roses three years ago and have done a big business in them ever since. Each year we have not been able to fill all the orders, and had to refund on the last ones. So please order early. Incidentally, we continue receive letters from people who have bought these potted roses telling us how much they like them. Many say they never again will buy any other kind!

Beautiful BROWNELL HYBRID TEA ROSES are SUPER HARDY

The Brownell roses are very beautiful, having size, form and color that are equal to any hybrid tea rose's, and superior to many. But their great advantage is that they are more vigorow, bloom more abundantly and more con-

stantly than most roses, and live longer.

They withstand cold of 25 degrees below zero without killing out, which means that they actually cost you less in the long run because you avoid costly, frequent replacement of your roses.

Special Offer of BROWNELL ROSES

A2208X — 1 each of Curly Pink, V for Victory, Queen of the Lakes and Tip Toes—all in 2-year, field-grown, commercial grade—for only grade—for only 5.64, postpaid.

THE "HENRY FIELD" ROSE

Alo25—Named after "Henry himself" who always said, "My favorite color in roses? I'll take any color just so long as it is red." So this rose is red, and it's big, and beautiful. It's the very best of Brownell's new strain of red tea roses. There is no better red rose than this. 2.00 each, postpaid.

POSTPAID PRICES for Brownell Hybrid Teas (excepting the Henry Field and Orange Ruffels)

Brownell's are among the very few patented roses you can buy for less than 1.75 each. They are the only patented roses giving you a choice of grades to suit your pocketbook and purpose. All are 2-year-old, field-grown plants:

2-year Jumbo Grade.... 2.00 5.85 22.79
Large select 2-year No. 1 1.75 5.10 19.80
A mighty good 2-year
commercial grade... 1.50 4.35

A mighty good 2-year commercial grade..... 1.50 4.35 16.85 There are no cull plants or No. 2's in the above grades; you wouldn't want them.

BROWNELL BUSHES

This picture was taken right here in Shenandoah in our garden. The bushes were left untrimmed and unprotected for four winters. They came through almost 100%, with hundreds of flowers, each one about as large as those on the lower trimmed bushes of common hybrid teas.

PATENTED HYBRID TEA ROSES

A1251—ALLURE (Pat. #886). A new and gorgeous pink. Fully opened flowers 5" to 6" across. Buds large, pointed, perfect form. Pleasing fragrance. 1.75 each; 3 for 4.65, ppd.
A1260—CRIMSON GLORY (Pat. #105). Widely held as the best crimson rose in the world. Perfect in form, large, and richly fragrant. 1.75 each; 3 for 4.65, ppd.
A1291—PEACE (Pat. #591). All America Award Winner, First rose ever to win National Gold Medal of American Rose Society. Blooms often are 6" across. 2.50 each; 3 for 6.50, ppd.

A1287—NEW YORKER (Pat. #823). One of the most intensely scarlet roses we have ever sen, and holds its color until the last petal has fallen. 2.00 each; 3 for 5.25, ppd.

\$.25, ppd.

A1262—ETERNAL YOUTH (Pat. #332). Clearest of all pinks and we think one of the most beautifully shaped of all roses. Fragrant; long stemmed; vigorous. 4" to 5"

flowers. 1.75 each: 3 for 4.65,

flowers. 1.75 each; 3 for 4.65, ppd.
A1274—ECLIPSE (Pat. #172). Has world's most beautiful bud—sleek and tapering with long, green stipules. 1.75 each; 3 for 4.65, ppd.
A1259—CHARLOTTE ARM-STRONG (Pat. #455). Another All-America Winner. Perfectly formed blood-red buds open to 4" flowers of deep carmine pink. 2.25 each; 3 for 5.98, ppd.
A1284—LOWELL THOMAS (Pat. #555). All-America Award Winner, and one of the best yellow roses. Beautiful buds open to large 4" flower with high, cupped centers. 2.00 each; 3 for 5.25, ppd.

ppd.
Al267—FRED HOWARD (Pat.
#1006). Al1-America winner.
Blooms through hottest weather.
Large, shapely buds, and blooms
often 4" across. Keeps its color
well. 2.50 each; 3 for 6.59; 6 for

often 4" across. Keeps its color well. 2.50 each; 3 for 6.59; 6 for 12.98, ppd. Al286—MIRANDY (Pat. #632). All-America Award Winner. Does

not fade in August sun. A hardy grower particularly well adapted to midwest conditions. 2.25 each; 3 for 5.98, ppd.
Al276—HELEN TRAUBEL (Pat. #1028). A gorgeous blend of pink and luminous apricot. "All-America" Award Winner. Flowers often 6" across with very large, thick petals. Adapted to all sections of country. 2.75 each; 3 for 7.20, ppd.

ppd.

A 1258—BUCCANEER (Pat.

#1119). All-America Award winner. Gold medal from Switzerland
trials. Certificate of Merit from
Begatele (Paris) and City of
Rome trials. Beautiful long stems
but not floppy. Plant to the back
or middle of rose bed. Undoubtedly the very finest of all yellow
roses. 2.75 each; 3 for 7.20, ppd.

A1277—HUNTSMAN (Pat.).
Long red and yellow buds open to a very satisfactory grower. 2.00 each; 3 for 5.25; 12 for 21.00, ppd.

Bushy, Colorful FLORIBUNDAS

PATENTED FLORIBUNDAS

(Illustrated at far left)

A1385-FASHION (Pat. No. 789). The only rose to win four International Awards: America, England, France and Switzerland. 2.00 each; 3 for 5.25; 12 for 21.00, ppd.

A1393-RED PINOCCHIO (Pat. No. 812). Double, cup-shaped blooms of velvety crimson. 1.50 each; 3 for 3.90; 12 for 15.60.

A1386-GERANIUM RED (Pat. No. 811). Most brilliantly colored rose we have ever seen. Spicy fragrance. 1.50 each; 3 for 3.90; 12 for 15.60, ppd.

A1389 - LAVENDER PINO-CCHIO (Pat. No. 947). Actually lavender-a brand new color in roses, and one that will give you not only something different for your rose garden, but will give you an entirely new series of color arrangements. Color varies greatly with the season. 2.00 each; 3 for 5.25; 12 for 21.00, ppd.

A1387-GOLDILOCKS (Pat. No. 672). Clusters of brilliant yellow flowers like miniature tea roses open to large golden blooms, 1.50 each; 3 for 3.90; 12 for 15.60, ppd.

A1391_NEARLY WILD (Pat. Applied for). A Brownell Flori-

bunda with large clusters of single flowers that are appleblossom pink and white, and about the size of a silver dollar. Makes a dense, broad, three-foot tall shrub solid-full of bright blooms all summer. This is one of the few varieties our grower chose to plant around his house. 1.75 each; 3 for 5.10; 12 for 19.80, ppd.

NON-PATENTED **FLORIBUNDAS**

(Illustrated at left)

PRICES of the following 6 non-patented Floribundas: 1.10 each; 3 for 3.15; 6 for 5.98; 12 for 11.40, postpaid.

A1337-EUTIN. Glowing carmine-red. Up to 125 semi-double blossoms in one cluster. Showiest and "bloomingest" plant in our whole rose field.

A1358--- "THE SWEETHEART ROSE" (Cecil Brunner). Small, exquisite buds and flowers of light pink with yellow base.

A1354-RED LAFAYETTE. Flaming red. Fine cut flower too. Stands dryness better than any other rose.

A1332-DAGMAR SPATH. Clusters of very large, white, semi-double blossoms.

Floribundas are bushy and many-flowered, having clusters of brilliantly colored blooms that cover the bush continuously from June until And the flowers are large, fully double, and fine for cutting. Being so bushy and floriferous, they have many uses—in the rose bed, for borders, among evergreens, as hedges, inter-planted with shrubs, or in any place you want a splash of color all summer. Some colors have appeared in Floribunda roses, such as the soft vibrant salmon-pink of Fashion, and the delicate lavender of Lavender Pinocchio, that have not been duplicated in hybrid tea

A1336-ELSE POULSEN. Always in bloom. Big clusters of apple-blossom pink. Hardy. Good for border or cemetery, as are all the Floribunda roses.

A1340-FLORADORA. Another new color in roses-a clear, brilliant orange. You'll like it.

The hardy, bushy **BABY ROSES**

The bushes of these roses are absolutely cov-ered with hundreds of blooms all summer long until freezing weather. Even hardier than the ordinary Hybrid Teas. Wonderful for masses of color, in beds, for borders and for hedges. The best plant for a cemetery. Set a group of 3 at each corner of the lot. Dwarf compact-

growing.
Prices: 1.10 each; 3 for 3.15; 6 for 5.98; 12 for 11.40, postpaid.

CATHERINE ZIEMET

A1303 — Always covered with clusters of dainty little double white roses and fine cut foliage.

GOLDEN SALMON

A1308 — A vivid salmon colored, heavy blooming variety. Has great masses of bloom all summer and continues until ground is almost frozen.

IDEAL

A1312—The deep black-red baby rambler. Blooms so profusely it hides the leaves. Fine for filling stations, beds and ceme teries.

POLYANTHUS ROSE TRIO

- 1 Golden Salmon-Vivid
- 1 Catherine Ziemet— Pure white.
- 1 Ideal-Black-red.

A2312X All 3 postpaid, 3.10

HARDY SHRUB ROSES

These are ideal for hedges, borders, and around the foundation. They are tough, hardy, and bloom profusely even in poor soil.

PRICES (excepting Nearly Wild): 1.15 each; 3 for 3.36; 12 for 11.98, post-paid. A1320 — HARRISON'S YEL-

LOW. A grand old rose; best yellow shrub rose of all. Semi-double, sweet scented. Lives for years.

A1319—F. J. GROOTEN. DORST. Blooms from June un-til frost. Will grow to a large. trimmed smaller. Showers are bright red.

A1321—PINK GROOTEN-DORST. Just like above except-ing that the double, carnation-like flowers are clear, bright

A1322—NEARLY WILD. This is pictured under Patented Floribunda Roses on the opposite page. However, it is so hardy, makes such a beautifully rounded shrub, and flowers so freely, that you can plant it with the usual flowering shrubs. Particularly valuable as its maximum height is only about 4 feet. 1.75 each; 3 for 5.10; 12 for 19.80, postpald.

SHRUB ROSE BARGAIN

RED GROOTENDORST

A2314X—1 Pink Grooten-dorst, 1 F. J. Grootendorst (red) and 1 Harrison's Yellow—all 3 for only 2.98, postpaid.

MINIATURE "FAIRY ROSES"

THE TINY ROSE

Miniature rose bushes only about 10" high, flowers no larger than a thimble, but perfectly formed double roses complete with long, pointed buds, beautifully shaped flowers, and a real and very noticeable tea rose fragrance. Not a house plant. Makes a neat edging for the taller, larger roses, as shown in picture at right, Good in window boxes. And ideal to plant in pockets of soil in the rock garden. Dainty, but hardy and free-blooming.

B2174—New Red Rose ROU-LETTE (Tom Thumb, Pat. #169). Ruby-red color. 98c each; 3 for 2.69. ppd.

82175—WHITE ROSE ROU-LETTE (Pixie, Pat. #408). Double white. 98c each; 3 for 2.69, ppd.

B2173—PINK ROSE ROU-LETTE. The original Roulette rose. Soft pink. 89c each; 3 for 2.55, ppd.

82176—BABY GOLD STAR (Pat. #407). Golden yellow from heart of the double flower to the tips of the petals. Little larger than the other minia-tures. The only yellow minia-ture and an enchanting variety. 1.25 each; 3 for 3.30, ppd.

ROULETTE Twin Collection B3275X—I each of New Red Roulette and Pink Roulette—both for only 1.75, postpaid.

BIG Little Collection B3276X—I each of Tom Thumb, Pixie and Pink Roulette—all 3 for only 2.49, postpaid.

A1751—Sure to bloom because grown from blooming plants. Get more beautiful each year and last for generations. Fragrant flowers in May-June come in big purple clusters with long, narrow, attractive foliage. Far superior in color to washed-out lavender of common Wistaria. 79c each; 2 for 1.49, postpaid.

Ornamental Vine Collection A2407X—1 each of Bittersweet, Purple Wistaria, and Silver Lace—all 3 vines for only 1.89, postpaid.

A1761—Grows very fast—25 to 30 feet first summer. Will cover a building, wall or barn in 2 years. Foliage clean; flowers lacy white and cover the vine from ground to tips in early fall. Does best in warm, sunny exposure and soil that is well-drained, sandy, fairly rich. 79c each; 2 for 1.49; 5 for 3.39, postpaid.

SILVER LACE VINE

.IMBING®

We offer here the varieties of climbing roses that we think are among the very best available. All of our plants are two-year, field-grown stock. Plant 6 ft. apart.

Choose Varieties to Fit Your Color Scheme

When most houses were A1052-The individual blooms standard. Red still is most popular, but with houses now in all colors of the rainbow, give consideration to the whites, yellows and pinks. Even for lawn or garden planting, the different colors may be helpful.

PROSPERITY

A1079—This one has great clusters of pure white blooms on a strong, free-growing plant. (Especially good against red brick wall.) Blooms the first year you plant it. That is unusual in a climbing rose. 1.10 each; 3 for 3.15; 6 for 5.98; 12 for 11.40, ppd.

BEAUTIFUL RED AND GOLD COMBINATION

A2215X-1 Paul's Scarlet and 1 Primrose, a beautiful combination for a trellis or arbor. Both fine, 2-year-old plants for only 1.98, post-

CLIMBING AMERICAN BEAUTY

white, a red climber was are exactly like its hothouse namesake. The flowers are a big, double rose-pink on long strong stems. Fragrant and hardy. 1.10 each; 3 for 3.15; 6 for 5.98; 12 for 11.40, ppd.

PAUL'S SCARLET

A1078—This is the most brilliantly colored of all climbing roses, and one of the tallest growing. It has large, full showy flowers so thick on the branches you can hardly see the foliage. It is the great climbing rose; more of them are planted than all other varieties combined. 1.10 each: 3 for 3.15; 6 for 5.98; 12 for 11.40, ppd.

NEW DAWN

A1074—The first everbloom ing climbing rose, and fast becoming one of the most popular. No other climber produces flowers so constantly from spring until frost.

The blooms are a large. double, apple-blossom pink borne on long stems. Fine for cutting. Also very fragrant. 1.25 each; 3 for 3.49, ppd.

CLIMBING ROSE
BARGAIN

WHITE DAWN

A1096-The beautiful white counterpart of New Dawn. The finest everblooming white climbing rose. Hundreds of pure white, completely double, Gardenia-like blooms on long stems. A fine new origination from the University of Minn. 1.75 each; 3 for 5.00.

GOLDEN PYRAMID

A1066-A hardy Brownell climber of brilliant cadmiumyellow. The large flowers are as shapely and beautiful as tea roses, and the plants are the most vigorous of any yellow climber we have ever seen. 1.75 each; 3 for 5.00. ppd.

YOU SHOULD BEFORE YOU BUY ROSE PLANTS

There is such a wide variation in the quality of roses, and in the sizes and grades, and in the prices different nurseries ask for their roses, that it is confusing

So we want to tell you this: First, all Henry Field's roses are two-yearold, field-grown plants. No other kind is shipped. Second, they are true to name. healthy, heavy, and hardy. They are absolutely free of disease and fungus-we are one of the very few nurseries using germicidal lamps in our rose storage

There are no better roses than Henry Field's. You can pay more for roses, but they will not be any better. Also, we advise you

lvies are the most use-

ful of vines because they are entirely hardy practically everywhere and do well in almost any soil.

They grow higher, stronger and broader than any

other vine—Boston lvy will cover a 5-story building solid if you want it to.

ENGLEMANN'S IVY

A1742—Also clings to rough walls and is extra hardy.

Never injured by coldest

winter. Grows fast and soon covers an entire wall.

Select vines, 59c each; 2 for 1.08; 5 for 2.49, post-

All Henry Field Roses are graded according to the Horticultural Horticultura Standards of the American Associa-tion of Nurserymen

to be careful about buying exceptionally cheap roses. They usually are low-grade culls, in very small sizes or frozen roses. When you get them you will be disappointed, and a lot of them probably will never live and grow for you.

ROSE DUST. An insecticide made especially for roses. Keeps them clean and blooming. See page 55 for price, details.

ROSETONE. A hormone and vitamin mixture that causes more luxuriant growth, earlier blooms. See page 55 for price, details

Henry Field's ROSE GUARANTEE

- Field-grown, clean, healthy, free of disease. All hybrid teas will bloom the first year.
- State and government inspected,
- 5. Carefully handled, packed and shipped to arrive in perfect planting condition.
- 100% guarantee of satisfaction in every way.

Hardy CLEMATIS VINES

When planted around a house, large-flowered Clematis always do best on the east or northeast side. In very cold climates, mulch well with straw or leaves in late fall. Will stand 40 below zero if roots are properly protected with mulch.

FINEST WHITE HYBRID CLEMATIS

A1714-(Lanuginosa Candida). One of the finest of the large-flowered Clematis. Plant with purple or red varieties a beautiful effect. If soil is inclined to be acid, or sour, work in a little lime be-fore planting Clematis. Potted plants, 98c each; 2 for 1.85,

Fragrant, Fall-Blooming CLEMATIS PANICULATA A1713—This is the fragrant,

fall-blooming Clematis vine. Has a mass of dainty white blooms all through the late summer and fall. Plant one by the kitchen door where it will scent up the entire house.
Will grow well in considerable shade. 89c each; 2 for CHA

GOLDEN FLOWERED

CLEMATIS
A1711—(Tangutica). Did you
ever see a Clematis vine with ever see a Clematis vine with golden bells hung all over it? Well, here it is. Hardy as a rock and will grow anywhere. Beautiful cutleaf, dark green foliage. Like the fragrant fall Clematis, it dies down each year, then grows 15 to 20 feet next year. 89c each; 2 for 1.69; 5 for 3.98, ppd.

LADY BETTY BALFOUR A1715—A wonderful new

brid Clematis bearing bloom on the current season's growth. Velvety purple-blue flowers up to 4" across. Potted plants, 98c each; 2 for 1.85, ppd.

CRIMSON KING A1710—Rare, new, large-flow-ering variety of Clematis—

CLEMATIS BARGAIN

the same type as Jackmani

except the flowers are rich red. Flowers often 4 to 6 inches across. Blooms over a long period and is extremely beautiful. Potted plants, 98c each; 2 for 1.85, ppd.

A1717—Truly an unusual and striking variety of hybrid Clematis. Red bars accentuate the pale mauve petals. Profuse bloomer. Vigorous grower—gets 10 to 12 feet tall. Potted plants, 98c each;

2 for \$1.85, ppd.

COUNTESS de BOUCHAUD

A1716—A beautiful new hybrid Clematis in satiny rose to rich pink. Profuse bloomer from July to Sept. Reaches 8 to 10 feet height. Delightfully different and appealing. Potted plants, 98c each; for 1.85, ppd.

Lovely IVIES

BOSTON IVY

A1741—Clings tightly to brick or stone support. Small leaves very close to-gether, of dark green, gether, of dark gr makes this a real vine r walls. Select vines, each; 2 for 1.29, ppd.

A2401X—Special wall covering Boston Ivy Bargain. Plant 8 to 10 feet apart. 5 for 2.89; IO for 5.49, postpaid.

AMERICAN IVY

A1739-A fast grower, with dense green foliage that turns to vivid colors in the If you want shade in a hurry plant this vine. Select vines, 49c each; 2 for 89c, postpaid.

TRUMPET VINE

A1767-Great big striking orange-scarlet flowers make this a prized vine. Super hardy and a rank, heavy grower. One of the old fa-vorites that continues popular because of its gorgeous honey-filled blooms. Improved strain. Select vines, 59c each; 2 for 1.98; 5 for 2.49, ppd.

A1740-Like English Ivy but hardier and has smaller, more cut leaf. Does best in shade A good indoor pot plant. A wonderful evergreen vine on north or west side. An ideal ground cover and bank binder (as pictured) because it stays green the year around and grows in shaded

times won't. Spreads and covers rapidly, but does not become a pest. Plant 2 ft. apart each way for ground cover. We ship you potgrown plants, which start growing for you as soon as you plant them, 59c each; 2 for 1.12: 10 for 5.29: 50 for 22.50: 100 for 38.95, ppd.

Hardy HONEYSUCKLE VINES

These climbing forms of the loneysuckle make an ideal work vine and are very useful of drape a fence or post. They are not only good space covers but have beautiful flowers.

MPORTANT TIP: Hall's ioneysuckle Vine makes a very cood, almost evergreen, ground over-ideal on terraces where grass is difficult to mow, or washes out.

"Pink Flame" HONEYSUCKLE

A1731-A mass of color from early summer to killing frost with long tube-shaped flowers of delightful fragrance. Foliage almost evergreen. Extremely hardy. Extra select vines, 89c each; 2 for 1.69, postpaid.

Henry's Hardy GOLDEN SUN A1729—Henry Field found this vine growing in the Ozarks. Very hardy and most fragrant of all Foliage big, round, and glossy green way into winter. Fast growing. A mass of golden trumplet flowers in June and July. 89c each; 2 for 1.69, ppd.

HALL'S HONEYSUCKLE

A1730—Masses of fragrant white and yellow flowers from late spring throughout summer. Will bloom some on the north side. Foliage shiny and glosgy. Useful as a bank binder too. Select vines, 59c each; 2 for 1.08; 5 for 2.49, ppd.

SCARLET TRUMPET

A1732—Valued for both its foliage and the showy orangered trumpet—shaped flower. The semi-evergreen foliage is a glossy, shiny green. Grows any place, even in a somewhat shaded location. Select vines, 69c each; 3 for 1.89; 5 for 2.98, ppd.

SALMON SULTANA

BABY TEARS VINE

RED PINOCCHIO GOLDILOCKS Bushy, Large - Flawered FLORIBUNDA VARIETIES

Bloom profusely ALL SEASON!

GERANIUM RED Patented NAMED

Again this year, as last, we sold more of the new Floribunda Roses than the traditional "Garden ueen"—hybrid tea roses.

This is amazing, but it just proves that more and more people are learning that the Floribundas give great masses of blooms from spring

until late fall, and they are learning also that some of the Floribunda colors are more brilliant than any known tea rose's.

Ball Dahlias are the most popular of all the Dahlias because they are so brilliantly colored and perfectly formed, and also because the provide such a wide variety of colors, including the comparatively scarce blue. And they thrive almost anywhere for anyone, bloom pro-fusely, and make won-derful cut flowers.
